Founded 80 years ago in the provinces by the father of the present principal, owing to its growth and expansion abroad, the business was transferred to London in 1892. For 36 years my announcement has appeared on this page, which should be a proof of stability. My trade was originally devoted to the fostering of IRISH Industries (peasant and mill), hence the block at side. In process of time I added the very genuine but little known WELSH tweed and flannel industry, established by the FLEMINGS in Henry II's reign, and which I felt was well worthy of public patronage. During the last quarter of a century, as our trade developed, particularly in foreign countries, we have also stocked WOOLLENS from various centres in ENGLAND and SCOTLAND from those mills only of established repute. Continuing to do our best to encourage the peasant industries of IRELAND and SCOTLAND, which is now a big branch of my trade, my motto is and always has been to cherish the industries of my own country, unlike the average trader; and the methods of the big stores who, guided by fashion simply, are constantly giving prominence to foreign merchandise. For all that, British woollens stand supreme in all the markets of the world.—W. B.

HOMESPUNS—Irish and Scotch, peasant-made from all districts; for country wear, sport, and travelling.

SCOTCH CHEVIOTS; for warm, rough suits, and wraps.

IRISH FRIEZES; for heavy travelling, and motoring ulsters.

FLEECEES; for warm, soft, woolly overcoats, and capes.

HOMESPUNS; natural cream, brown, & grey; also dyed colours.

IRISH TWEEDS; for hard useful wear; winter and summer weights.

TWEEDS; for ordinary town wear; various weights and mixtures.

WORSTEDS; for business and professional wear.

SERGES; navy, grey, and black; rough, and smooth; all seasons.

CASHMERES; for tropical, and semi-tropical wear.

TROUSERINGS; winter, and summer weights.

WELSH FLANNEL TWEEDS; for light summer, and semi-tropical wear.

COSTUME TWEEDS; for ladies' country, and town wear.

OVERCOATINGS; light, medium, and heavy.

MOTOR & TRAVELLING RUGS. 21/- to 50/-

SHETLAND, AND FAIR ISLE jumpers, jerseys, scarves, shawls, socks, gloves, body belts, tams, &c.

SOCKS AND STOCKINGS; hand-knitted; Irish and Scotch.

WELSH SHIRTINGS; for country, and colonial wear.

Prices are not yet sufficiently stabilized to quote for twelvemonth, but will be marked on tickets. Pattern applications must be definite and descriptive of requirements, otherwise delay will result. They can only be sent to the provinces and abroad.

A visit to the warehouse is recommended whenever possible in order to view the extent of the stock, handle the goods, judge of their merit, and make a judicious selection.

SHIPPERS, the TRADE, and PUBLIC supplied at prices corresponding to extent of purchase. Tailoring firms in connection. TERMS:—Cash with order. Carriage paid in U.K.

Warehouse: 31 & 29, GREAT PORTLAND ST.,
Branch: 93, New Bond Street, LONDON.

Telephone: Langham 2426. (Founded 1846.) T.A.: "SELPHÉP, LONDON."

“Monomarks”

A Revolution in Methods of Communication.

Manufacturers, Monomark your products! The Monomark system provides a remarkable means of placing buyers all over the world in immediate touch with you. Use your Commercial Monomark as a means of identification on everything you handle. Every private individual should also own a Monomark. Use your Private Monomark on your luggage, your laundry, your umbrella, your keys and all your private property, and lessen the risk of loss. A Monomark enables you to disclose or hide your identity at will. A Monomark is a group of letters or figures, or both, which stands for its owner's full name and address. There are two kinds of Monomarks: the Commercial Monomark for firms and business concerns and the Private Monomark for private individuals.

Any letter from any part of the world addressed to a Monomark (as in the illustration) will be delivered to Monomark House, where it will at once be enclosed unopened in a covering envelope addressed to the registered owner of the Monomark, and re-posted to him immediately.

Every Monomark is exclusive to its owner throughout the world. Early application for a Monomark is advisable. Write at once for a copy of “The Miracle of the Monomark,” which gives full particulars of this wonderful Wm. Morris system of Monomarks.

BRITISH MONOMARKS, LTD.,
MONOMARK HOUSE,
HIGH HOLBORN,
LONDON, W.C. 1.

*A Commercial Monomark costs from £2 2s. a year.
A Private Monomark costs 5s. a year or £2 12s. 6d. for life.*

PREFACE TO THE LVIIITH ANNUAL VOLUME.

(1926.)

SPECIAL attention has been paid to the arrangement and indexing of the 58th annual volume of "WHITAKER."

From the "Table of Contents" it will be seen that the sections are arranged in a logical sequence and printed, wherever possible, in a self-contained alphabetical order. The "Subscriber for many years" is thus able to find instinctively the page containing the information he is seeking, and the novice can quickly acquire the habit of ready reference.

In order, however, that time may not be lost in tracing matters of detail, an Index of over 10,000 references is also provided, so that anyone in search of information concerning "Accidents," "Bee-keeping," "Broadcasting," "Cost of Warships," "Drunkenness," "Fascists," "Goats," "Hospital Funds," "Jacobites," "Locarno," "Marks on Plate," "Noah's Ark," "Snake Bite Deaths in India," "Taungs Skull," "Trade with Russia," "Women's Athletic Records," or "Zenana Missions" (to choose references at random from among the 10,000), may readily find the information required or the address of a Society whose Secretary will reply to a serious enquiry.

With regard to the various sections the Editor has endeavoured to develop those containing matters of particular interest at the moment, and much additional information has been provided with regard to Finance and Trade, the source of Imports and the destination of Exports being shown in specially prepared tables which will not be found in any other publication in the world, while "Questions of the Day" are again the subject of a series of short articles, arranged in alphabetical order.

The Editor wishes to express once again his indebtedness to correspondents in every quarter of the globe for the suggestions they have made, and to encourage them to continue in helping him to confirm the truth of the proverb, "You'll find it in 'WHITAKER.'" The co-operation so obligingly rendered is very highly appreciated, and it will always be the Editor's aim to foster and maintain the friendly interest of his readers, especially of those who take the trouble to communicate their criticisms and suggestions.

Correspondents are earnestly requested to note the first day of October as the latest date when suggestions should reach the Office, at the address given below.

12 WARWICK LANE, E.C. 4,

THE DOGS' HOME

OR TEMPORARY HOME FOR
LOST AND STARVING DOGS

(An Institution for the Protection of Dogs & Cats)

4, BATTERSEA PARK ROAD, S.W. 8,
and HACKBRIDGE, SURREY.

(For Boarder and Quarantine Dogs Only.)

Patron:

His Most Gracious Majesty the King.

President:

His Grace The DUKE OF PORTLAND, K.G.

OBJECTS:

1. To provide food and shelter for the lost, deserted, and starving dogs of London and the immediate neighbourhood.
2. To restore lost dogs to their rightful owners.
3. When good dogs are unclaimed, to find suitable homes for them at nominal charges.
4. To destroy, by a merciful and painless method, all valueless and diseased dogs.

Out-Patients (Dogs and Cats only), at Battersea, Tuesdays and Thursdays, 3.0 p.m.

Since the Foundation of the Home in 1860, over 1,370,000 dogs have received food and shelter.

Dogs and Cats can be received as Boarders at Hackbridge, and
Dogs for Quarantine under the Importation of Dogs Order, 1914.

Contributions will be thankfully received by

G. GUY S. ROWLEY, *Secretary*. [150]

Humber

Cars, Motor Cycles, Cycles

¶ The attractive range of Humber Cars for 1926 reflects our traditional policy of improving upon our best. There are three models, 9/20 h.p., 12/25 h.p. and 15/40 h.p., comprising 2/3 Seaters, 4/5 Seater Tourers and Saloons, whilst the 12/25 h.p. range includes a beautifully designed $\frac{3}{4}$ -Coupé. All 12/25 h.p. and 15/40 h.p. Open Cars are equipped with a perfect weather-proof fitment.

9/20 h.p. 2 2/3-Seater with Dicky Seat	-	£260
9/20 h.p. 4-Seater Touring Body	-	£260
9/20 h.p. 4-Seater Saloon	-	£315
12/25 h.p. 2 2/3-Seater with Double Dicky Seat	-	£440
12/25 h.p. 4-door 4/5-Seater Touring Car	-	£440
12/25 h.p. 3/4-Coupe with Double Dicky Seat	-	£555
12/25 h.p. 4-door Saloon	-	£555
15/40 h.p. 4-door 5-Seater Touring Car	-	£645
15/40 h.p. 4-door Saloon	-	£860
15/40 h.p. Saloon Laudaulette	-	£860

Dunlop Tyres standard.

Illustrated Catalogue of Cars, Motor Cycles or Cycles sent free on request.

¶ The Humber range of cycles, comprising 16 models, includes a mount for every class of rider at prices ranging from £6 15s. 0d. to £16 5s. 0d. Any model can be purchased on instalment terms if desired.

¶ The 2 $\frac{3}{4}$ h.p. Humber has 2 Gold Cups, 16 Silver Cups, 56 Gold Medals, 7 First-class Team Prizes, 59 Highest Awards behind it. Its reliability brought it British Motor Cycling Championship Honours in the International Six Days Trials, and was 1 of only 8 out of 84 to get through the gruelling of this trial and the Brooklands test without losing a mark.

The Nottingham Guardian

THE LEADING BUSINESS MAN'S NEWSPAPER
THROUGHOUT THE NORTH AND EAST MIDLANDS,
INCLUDING THE WHOLE OF NOTTINGHAMSHIRE,
DERBYSHIRE, LEICESTERSHIRE, LINCOLNSHIRE
AND RUTLAND.

COVERS an area containing a population of nearly 2,500,000 people engaged in the Lace, Hosiery, Boot and Shoe, Engineering, Chemical, Tobacco, Motor, Cycle, Coal Mining and Agricultural Industries.

As an aid to the stimulation of British Trade with the British Overseas Dominions and Colonies, and Foreign Countries throughout the World, the "Nottingham Guardian" conducts a

TRADE INTELLIGENCE BUREAU

which is of great value and practical utility to manufacturers and business men both at home and overseas, as is testified by an ever-increasing demand for its services and by numerous appreciative acknowledgments of its helpfulness. The purpose of this Bureau is

Q To GIVE INFORMATION AND ADVICE to Manufacturers in this country, overseas and abroad, on all matters which may assist in the expansion and development of trade and commerce.

Q To SUPPLY INQUIRERS with Particulars of Trade-marks and the names of manufacturers of patented goods and specialities.

*INQUIRIES should be addressed to the Secretary,
"Nottingham Guardian" Trade Intelligence Bureau,
Nottingham.*

London Office : 59, Fleet Street, E.C. 4.

Known all over the World

as the finest restorative and tonic wine before the public, WINCARNIS is a rich red wine made from choice grapes, extract of beef and extract of malt.

There are no drugs in this popular and palatable product ; it is a tonic, not a medicated, wine.

WINCARNIS

"The Wine of Life."

builds up your health after an illness, enriches the blood, restores wasted tissue, and feeds the nerves. It acts almost at once. It is delicious in taste and economical in price. Over 10,000 doctors have recommended and prescribed it, while it has been on the market for over 40 years.

Obtainable everywhere from wine merchants, licensed grocers and chemists, bazaars, etc., Great Britain, India, Malay States, China, Australasia, Africa, Canada, West Indies, Central America, etc.

*Try it. See that you get the genuine
Wincarnis wrapped in pink paper
with the well-known label.*

Manufactured solely by
COLEMAN & COMPANY, LIMITED,
Wincarnis Works,
Norwich.

*It's Quality that tells
choose a Sunbeam!*

EVEN a few miles on a Sunbeam will convince you as to what Sunbeam quality really means. Extraordinary engine power, ample braking security and luxurious cantilever springing are all embodied in this perfect car.

There are four types:—14/40 h.p. 4 cylinder; 20/60 h.p. 6 cylinder; 30/90 h.p. 8 cylinder; and the 3 litre 6 cylinder super sports.

See the latest models for yourself at the nearest Sunbeam dealers.

Prices from £625 to £1850

SUNBEAM

"The Supreme Car."

THE SUNBEAM MOTOR CAR CO., LTD., MOORFIELD WORKS, WOLVERHAMPTON.

London Showrooms: 12, Princes St., Hanover Sq., W.1. Manchester Showrooms: 106, Deansgate.

Important New Books

Science Religion and Reality

Edited by JOSEPH NEEDHAM. 12s. 6d. net

The contributors to this important volume are:—

THE EARL OF BALFOUR, O.M., F.R.S.	JOSEPH NEEDHAM, M.A.
BRONISLAW MALINOWSKI, Ph.D., D.Sc.	JOHN W. OMAN, D.Phil., D.D.
CHARLES SINGER, M.D., D.Litt.	WILLIAM BROWN, M.A., M.D., D.Sc.
ANTONIO ALIOTTA, D.Phil.	CLEMENT C. J. WEBB, LL.D.
ARTHUR S. EDDINGTON, M.A., F.R.S.	WILLIAM RALPH INGE, D.D., LL.D.

SCIENCE and SCIENTISTS in the NINETEENTH CENTURY

By ROBERT H. MURRAY, Litt.D. With an Introduction by SIR OLIVER LODGE, F.R.S. 12s. 6d. net.

SIR OLIVER LODGE writes: "An eminently readable book, full of personal reminiscences and biographical details . . . a serviceable storehouse of reference for the coming generation of students in all branches of science."

FRANCESCO PETRARCA: The First Modern Man of Letters. His Life and Correspondence

A Study of the Early Fourteenth Century (1304-1347). Volume I: Early Years and Lyric Poems. With a Frontispiece. By EDWARD H. R. TATHAM, M.A., F.S.A. 18s. net.

This book is an attempt to set the career of the Italian poet, as elucidated by the discoveries of the last fifty years, in the light of contemporary history.

A VOYAGE IN SPACE

By H. H. TURNER, D.Sc., D.C.L., F.R.S., Savilian Professor of Astronomy in the University of Oxford. With over 130 Illustrations. Second edition, enlarged. 7s. 6d. net.

Professor Turner has added to this edition a masterly chapter dealing with recent developments in astronomy, including the Einstein theory.

CLAY, AND WHAT WE GET FROM IT

By ALFRED B. SEARLE. With copious Illustrations. 3s. 6d. net.

SURVEYING FOR EVERYONE

By A. FRANKON WILLIAMS, F.R.S.G.S. With copious Diagrams and Maps. 3s. 6d. net.

CHARMIAN: CHAUFFEUSE

By ALICE WILSON FOX. 3s. 6d. net. (A Story of the Great War.)

Obituary.

Her Majesty Queen Alexandra, born Dec. 1, 1844; married March 10, 1863, H.R.H. the Prince of Wales (afterwards King Edward VII.); crowned with King Edward VII. at Westminster Abbey, Aug. 9, 1902; died at Sandringham, Nov. 20, 1925.

A Suggestion

by the
Proprietors of

“WHITAKER”

“Now that you have purchased a
1926 ‘Whitaker,’ instruct your book-
seller to send one to your friend!”

Your Bookseller will gladly under-
take this if you will complete
the ORDER-FORM overleaf.

*To give a “Whitaker” ensures a
twelve month’s grateful thanks
from the recipient*

The cloth-bound edition, 6/8 post free.
888 pages, costs - -

The paper-bound edition, 3/6 post free.
568 pages, costs - -

Jupiter is in conjunction on January 25. Because the planet is near the Sun, and therefore above the horizon almost wholly in daylight hours, the satellites will not be visible in this month nor in February and the first part of March. See note, p. 8.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

January 1. Day breaks 6h. am. Civil twilight ends, 16h. 52m. Night begins, 18h. 5m. The length of the day from Sunrise to Sunset is 7h. 51m.

The ending of Civil twilight is here defined as the time when the Sun's centre is 7 1/2' below the horizon. Day breaks and Night begins when it is 18' below.

Jan. 2, 4h. Earth at least distance from the Sun. Perihelion 91,337,000 miles.

Jan. 2. 20h. Venus at greatest brilliancy.

Jan. 5. Mean time taken by Sun's semi-diameter in crossing the meridian, 1m. 10' 6".

Jan. 10. Saturn in conjunction with ♄, 2h. 47m. ♄ 2° 40' S.

Jan. 11. Mars in conjunction with ♄, 6h. 50m. ♄ 3° 48' S.

Jan. 12. Mercury in conjunction with ♄, 20h. 40m. ♄ 1° 58' S.

Jan. 14. Total eclipse of the Sun, invisible at Greenwich. See p. 58.

Jan. 14. Jupiter in conjunction with ♄, 20h. 19m. ♄ 0° 10' N.

Jan. 15. 21h. Venus at a stationary point.

Jan. 16. Venus in conjunction with ♄, 7h. 10m. ♄ 6° 6' N.

Jan. 25. Mean time taken by Sun's semi-diameter in crossing the meridian, 1m. 8' 0".

Jan. 25, 6h. Jupiter in conjunction with Sun.

Uranus, Jan. 1, R.A. 23h. 31' 7m., Dec. 3° 52' 5" S. Sets, Jan. 1, 22h. 33m. : sets Jan. 31, 20h. 41m.

Neptune rises Jan. 1, 19h. 49m. Jan. 31, 17h. 47m.

In this month the Mornings increase 25m., the Afternoons 45m.

Constellations near the South meridian at 22h. : Perseus, Taurus, Eridanus, Auriga, Orion, Gemini, Canis Minor, Canis Major.

Note on Tables of the Moon,

&c.—According to the practice of recent years, the day as treated in this Almanack is divided into 24 hours, numbered from 0 to 23, the hour following the midnight which begins the day being called 0. This system was adopted in the Nautical Almanac in 1925, and the time is called Mean, whereas it has hitherto been called Civil Time. (See p. 77.)

On page 3 of each month the position of the Moon, and other details relating thereto, are now given for the midnight which ends the day specified in the first column. As in the issues of recent years the second column gives the time of the rising which happens during that day, and the figures in the two following columns show the time

MORNING AND EVENING STARS.

☿ MERCURY, which was at Western elongation on December 31, is a morning star, and may be seen low down in the south-east about 7 o'clock in the first week of this month.

♀ VENUS is a brilliant evening star and will be seen in the south-west soon after sunset not very high in the sky. At greatest brilliancy (Jan 2) its magnitude is -4.4. Its brightness decreases to magnitude -3.6 at the end of the month when the planet sets an hour and a half after sunset, south of the west point.

♂ MARS, moving in the region where the constellations Ophiuchus and Scorpius meet, rises 3 hours before the Sun. About January 9 at 6 o'clock it will be nearly 5 degrees above Antares, then rising in the S.E., and will be to the left of that star later. The planet is scarcely as bright as Antares.

♃ JUPITER being in conjunction on the 25th is above the horizon only in daylight hours.

♄ SATURN is a morning star rising nearly south-east by east. Magnitude +0.7.

of the southing and of the setting which next follow that rising, and these sometimes happen after the midnight which ends the day. In such cases the figures are in heavy type, and it is to be remembered in using this table that these distinctive figures always indicate a time on the *morning* of the day of its line. A similar system is followed in the Tables of the planets. (See pages 13, 17, 21, &c.)

MONTHLY NOTES.

Feb. 1. Pheasant and Partridge shooting ends.

4. Last day for Objections to persons on New List (Spring Register) to be sent to Registration Officer.

10. Last day for Claims (Spring Register).

11. Scottish general salmon-fishing begins.

15. Objections and New Claims to be published.

24. Last day for Objections to New Claims (Spring Register).

HALF QUARTER DAYS are—Feb. 8. May 9. Aug. 11. and Nov. 11.

RAIN FELL IN FEBRUARY, 1925, on 18 days; total fall 3'13 inches; above the average by 1'56 inches.

The periods of revolution of the four satellites of Jupiter discovered by Galileo (see p. 69) are 47h. 38m. 17s. and 16.75 days respectively, and these bodies therefore change their relative position fairly rapidly. Their order from left to right as seen in an inverting telescope, is shown in these columns for the moment of the night stated in the heading. The open

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

February 1. Day breaks at 5h. 44m. Civil twilight ends at 17h. 34m. Night begins at 18h. 43m. The length of the Day is 9h. 6m.

Feb. 4. Mercury and Jupiter in conjunction, 10h. $\delta^{\circ} 32' S$.

Feb. 5. Mean time taken by Sun's semi-diameter in crossing the meridian, 1m. 7^{ths}.

Feb. 6. Saturn in conjunction with γ , 14h. 47m. $\gamma^{\circ} 27' S$.

Feb. 7, 15h. Venus at inferior conjunction.

Feb. 9. Mars in conjunction with γ , 3h. 50m. $\delta^{\circ} 33' S$.

Feb. 11. Jupiter in conjunction with γ , 18h. 1m. $\gamma^{\circ} 43' N$.

Feb. 12. Venus in conjunction with δ , 0h. 27m. $\gamma^{\circ} 16' N$.

Feb. 12. Mercury in conjunction with γ , 12h. 42m. $\delta^{\circ} 8' N$.

Feb. 12, 21h. Neptune in Opposition. Distance from Earth 2,704,900,000 miles.

Feb. 16, 21h. Mercury in Superior conjunction.

Feb. 25. Mean time taken by Sun's semi-diameter in crossing the meridian, 1m. 5^{ths}.

Feb. 27, 8h. Venus at a stationary point.

Uranus sets **Feb. 1, 20h. 38m.**

Neptune rises **Feb. 1, 17h. 43m.**

Feb. 28, 15h. 52m.

In this month the Mornings increase 51m.; the Afternoons 50m.

Constellations near the S. meridian at 22h.: Auriga, Taurus, Orion, Gemini, Canis Minor, Monoceros, Canis Major, Argo, Cancer, Hydra.

Venus at Conjunction.

When Venus, moving in her orbit within that of the Earth, passes immediately between Sun and Earth she is said to be in inferior conjunction. When the three bodies are similarly in line, Venus and the Earth being on opposite sides of the Sun, the conjunction is said to be superior. Venus describes her orbit in 225 days, and after an inferior conjunction moves ahead of the Earth in the orbital race, and after passing round her orbit twice and more she overtakes the Earth, and there is another inferior conjunction in 584 days. This 584 days is called the Synodic period. Since the plane of Venus' orbit is inclined $3^{\circ} 24'$ to that in which the Earth moves round the Sun, and 584 is not an integral multiple of 225, it follows that she must be at different distances from the latter (the plane of the ecliptic) at different conjunctions, and therefore is seen at varying

* The days thus indicated throughout the Almanack are those on which High Tides may be expected. Strong northerly winds in the North Sea and a low barometer with heavy rains in the counties drained by the Thames will probably cause a higher rise of the river, and the low lying riverside districts to be flooded.

RISING, SOUTHING, and SETTING OF PLANETS at intervals of Seven Days. (Noon = 12h.)

MORNING AND EVENING STARS.

☿ MERCURY. at Superior Conjunction on the 16th, is an evening star at the end of the month, but sets only about an hour after the Sun and is not likely to be seen.

♀ VENUS sets in the twilight south of west in the early days of the month. Towards the end it will be a conspicuous object in the dawn in the E.S.E. Magnitude (on Feb. 25). -4¹.

♂ MARS is a morning star, rising half-an-hour earlier than last month nearly in the S.E. Magnitude +1⁷.

♃ JUPITER now rises shortly before the Sun. Magnitude -1⁵.

♄ SATURN rises an hour or two after midnight. It will be seen between S.E. and S. at 4 o'clock.

with Spica at some distance on its right, and Arcturus 40 degrees above.

distance above or below the Sun. If Venus is at one of the Nodes, or points where her orbit intersects the plane of the ecliptic, at Inferior conjunction she will be seen to cross the Sun's disc, and there will be a Transit of Venus, a rare phenomenon that happens in pairs at intervals of about 120 years. If she is near a Node at Superior conjunction, there may be an occultation of Venus by the Sun which is less rare. On the other hand, Venus may be high above the ecliptic at conjunction, as on February 7, when it will pass north of the Sun's edge at a distance of about 8 degrees.

Venus derives her light wholly from the Sun, and one hemisphere only is illuminated at any moment. At Inferior conjunction the dark half is presented to the Earth and the planet is, in general, invisible, but when it is high above the ecliptic, as it is this month, the southern edge of the bright hemisphere may be within our view, and Venus may be seen by telescope as a small crescent, quite near the time of conjunction.

See Note p. 4.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

March 1. Day breaks at 4h. 56m. (Civil twilight ends 18h. 23m. Night begins 19h. 29m. The length of the Day is 10h. 48m.

Mar. 5. Mean time taken by Sun's semi-diameter in crossing the meridian, 1m. 5' 0s.

Mar. 5. Saturn in conjunction with ♃, 22h. 33m. ♄ 2° 9' S.

Mar. 6, 15h. Saturn at a Stationary point.

Mar. 9. Mars in conjunction with ♃, 23h. 12m. ♄ 1° 2' S.

Mar. 11. Venus in conjunction with ♃, 7h. 59m. ♄ 7° 22' N.

Mar. 11. Jupiter in conjunction with ♃, 14h. 18m. ♄ 1° 18' N.

Mar. 14, 5h. Venus at Greatest brilliancy.

Mar. 14, 5h. Mercury at Greatest Elongation. 18° 23' E.

Mar. 15. Mercury in conjunction with ♃, 5h. 20m. ♄ 7° 51' N.

Mar. 21, 5h. Mercury at a Stationary point.

Mar. 21, 9h. 2m. Sun enters the sign Aries (Spring Equinox).

Beginning of the Tropical Year.

Mar. 22, 11h. Venus and Jupiter in conjunction. ♄ 4° 34' S.

Mar. 31, 6h. Mercury in Inferior conjunction.

The Zodiacal Light may be seen after sunset in the first half of this month, the Moon being then absent from the sky.

Uranus is not visible in the night sky during this month.

Neptune rises **Mar. 1, 15h. 48m.**; sets **Mar. 1, 6h. 27m.**; **Mar. 31, 4h. 28m.**

In this month the Mornings increase 68m.; the Afternoons 52m.

Constellations near the S. meridian at 22h.: Gemini, Canis Minor, Monoceros, Argo, Lynx, Cancer, Hydra, Leo, Crater.

Reform of the Calendar.

The Committee convened under the auspices of the League of Nations of representatives of the Roman, Eastern and Anglican Churches and others to consider and discover any changes that might be made in the calendar with advantage have continued their labours. It is understood that in the views of all the churches there is nothing of dogma or of doctrine to stand in the way of discarding the present method of determining the date of Easter, and of arranging that the festival should fall at the same time in every year, or nearly so, and the Committee agree that the adoption of any scheme of this kind should be settled by general public opinion. On the other

MORNING AND EVENING STARS.

♂ MERCURY is an evening star. There will be an opportunity of seeing this planet from about the 7th to the 17th a few degrees above the western horizon, at 19h. or earlier. It sets nearly with the Sun at the end of the month.

♀ VENUS is at greatest brilliancy in the morning sky on the 14th. It will be in the east-south-east at an altitude of about 5° an hour before sunrise. Magnitude on March 14. -4'3; on March 31. -4'2.

♂ MARS continues to rise earlier day by day, but will not be above the horizon until daybreak.

♂ JUPITER rises south of E.S.E. rather more than an hour before the Sun. Venus and Jupiter will be comparatively near together in the latter part of the month; about 5' apart on the 22nd. Jupiter being the lower.

♂ SATURN in the constellation Libra rises before midnight towards the end of the month nearly E.S.E.

hand, representatives of the Jewish Church and other religious bodies object to any scheme that would destroy the exact succession of weeks of seven days and therefore interfere with the perpetual recurrence of the Sabbath on the seventh day. This would be the result of the omission of the first or other day of the year from the system of weeks, that has been proposed as a means of making any day fall always on the same day of the week. A list of questions has been circulated among business corporations and other public bodies to collect their opinions for consideration. Some representatives of railways are in favour of dividing the year into thirteen months.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

April 1. Day breaks at 3h. 38m. Civil twilight ends 10h. 15m. Night begins 20h. 29m. The length of the Day is 12h. 51m.

Apr. 2. Saturn in conjunction with ♃, 3h. 1m. ♄ 1° 53' S.

Apr. 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 4' 48s.

Apr. 7. Mars in conjunction with ♃, 16h. 38m. ♄ 0° 31' N.

Apr. 8. Jupiter in conjunction with ♃, 7h. 13m. ♄ 1° 52' N.

Apr. 9. Venus in conjunction with ♃, 1h. 23m. ♄ 4° 56' N.

Apr. 11. Mercury in conjunction with ♃, 2h. 20m. ♄ 5° 21' N.

Apr. 12, 16h. Mercury at a Stationary Point.

Apr. 18, 19h.. Venus at Greatest Elongation. 46° 16' W.

Apr. 23, 10h. 47m. Mars and Jupiter in conjunction. ♄ 0° 51' S.

Apr. 25. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 5' 48s.

Apr. 28, 6h. Mercury at Greatest Elongation. 29° 4' W.

Apr. 29. Saturn in conjunction with ♃, 6h. 29m. ♄ 1° 48' S.

Neptune sets Apr. 1, 4h. 24m.; Apr. 30, 2h. 29m.

In this month the mornings increase 62m.; the afternoons 48m.

Constellations near the South meridian at 22h.: Cancer, Hydra, Leo, Leo Minor, Crater, Corvus, Virgo.

Mean Longitude of Moon's Ascending Node, April 1, 112° 31' 20".

The first Sunday after Easter was called Low Sunday because it was the custom to celebrate the day as a feast of the same kind as the chief Christian festival but lower in degree. Quasi-modo is another name for this Sunday which occurs in old records. *Festi Quasi-modo Geniti* being the first words of the introit, or hymn for Mass of that day.

Septuagesima Sunday.—The third Sunday before Lent is supposed to have its name because it is about seventy days (actually 63) before Easter. Since that may be on any day from March 22 to April 25, the earliest date on which Septuagesima can fall is January 18, and the latest February 22, the latter happening if Easter falls on April 25 and the year is a leap-year. This latest date has not occurred since the introduction of the Gregorian Calendar into England in 1752, but it will do so in the year A.D. 3784, if the present system then prevails. Septuagesima has fallen on the earliest date, January 18, four times since the year 1752, but it will not do so again until 2285.

☿ MERCURY rises not long before the Sun and will not be seen.

♀ VENUS is also a morning star, rising earlier day by day. It may be seen in the dawn south of east. Magnitude at the end of the month -3.9.

♂ MARS, as last month, is a morning star, but only in the brightening sky. It is moving from right to left towards Jupiter at the beginning of the month, and the two planets will be in conjunction on the 23rd. Magnitude 1.1 to 0.8.

♃ JUPITER (mag. -1.7) rises about daybreak, and the five bright planets will be above the horizon in the hour before sunrise. On the 18th, at 4h., Mars and Jupiter will be nearly in the south-east, Jupiter being on the left, with Venus nearer to the east point, all at a low altitude. Mercury rises due east half an hour later, and Saturn is rather higher than these in the south-west.

♄ SATURN is a conspicuous object in the south-east sky at midnight. Magnitude 0.5 to 0.3.

Summer Time.—In 1916 an Act dated May 17 enjoined that during a period of that year then defined the time for general purposes in Great Britain should be one hour in advance of Greenwich Mean Time, and that in any subsequent year of the war then in progress, a similar prescribed period might be fixed by an Order in Council. This system was continued until after the end of the war, and was further prolonged by an Act of 1922 (July 20), which specified that the period should begin at 2 o'clock P.M.T. in the morning of the day following the third Saturday in April, or if that day is Easter-Day, the day following the second Saturday, and should end at 2 o'clock G.M.T. in the morning of the day next following the third Saturday in September. This Act was to continue in force until the end of the year 1923, and no longer, "unless Parliament otherwise determines." The Act was renewed for 1924 and 1925, and was made permanent by a further Act (August 7, 1925) which modified the length of the period by substituting the first Saturday in October for third Saturday in September.

Mean Longitude of Moon's Ascending Node, May 1, 109 56' 23.

CONJUNCTIONS, ECLIPSES, AND
OTHER CELESTIAL PHENOMENA.

May 1. Day breaks at 2h. 4m. Civil twilight ends at 2h. 12m. Night begins 2h. 50m. The length of the Day is 14h. 45m.

May 4, 14h. 43m. Venus and Uranus in conjunction. ♀ 0° 21' N.

May 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 6' 18.

May 5. Jupiter in conjunction with ♀. 19h. 59m. ♀ 2° 21' N.

May 6. Mars in conjunction with ♀. 8h. 37m. ♀ 1° 52' N.

May 8. Venus in conjunction with ♀. 9h. 30m. ♀ 3° 51' N.

May 10. Mercury in conjunction with ♀. 1h. 17m. ♀ 2° 21' N.

May 14, 8h. Saturn in Opposition. Distance from Earth, 828,200,000 miles.

May 25. Mean Time taken by Sun's semidiameter in crossing the meridian, 1m. 7' 78.

May 26. Saturn in conjunction with ♀. 10h. 52m. ♀ 1° 56' S.

Uranus rises May 1, 3h. 28m.

Neptune sets May 1, 2h. 25m. May 31, 4h. 28m.

In this month the Mornings increase 43m.; the Afternoons 43m.

Constellations near the S. meridian at 22h.: Leo, Leo Minor, Crater, Hydra, Corvus, Virgo, Bootes, Libra.

Sunspots.—Though it is not possible to predict the appearance of individual spots, it may be said with some confidence that there will be many and perhaps large groups on the Sun in the current year, for there is nothing more certain in nature than the increase and decrease of the number and area of the sunspots in a period of about eleven years. Maximum follows minimum by about 4½ years, and as minimum happened in the middle or latter half of 1923, the maximum may be put down for the end of the year 1927, and the intensity spreads a year or two on either side of the actual highest point. The cause of the waxing and waning is not known but it appears to be an indication of some periodic change in Nature which manifests itself not only in other ways on the Sun, such as the appearance of prominences and in changes in the corona, but also in the terrestrial phenomena of magnetism and the aurora. No definite relation has been found between the sunspot period and weather cycles, though this has been looked for, and the appearance of a spot on the Sun has no effect on the immediate weather as is sometimes erroneously suggested.

MORNING AND EVENING STARS.

☿ MERCURY is still a morning star not visible to the naked eye. It is in the western half of its apparent orbit and is approaching the Sun.

♀ VENUS as last month rises in the early dawn. It will be approximately East at an altitude less than 10° between 3 and 4 o'clock throughout the month.

♂ MARS rises in the E.S.E. at the beginning of the month, nearer to the east point at the end. Magnitude +0.8 to +0.4. Mars will be to the left of Jupiter as at the end of last month, and the distance between the planets is increasing.

♃ JUPITER rises in the E.S.E. at the times shown. Magnitude -1.8 to -2.0.

♄ SATURN at opposition on the 14th is above the horizon throughout the night. Magnitude +0.2.

Heliographic Elements.—The second column in the small Table at the bottom of page 2 of each month shows the position of the Sun's axis of rotation as seen on the disc, the figures giving the arc of the Sun's circumference between the North point and the end of the projection of the axis. The third and fourth columns give respectively the solar latitude and longitude of the centre of the disc (that is of the Earth), referred to parallels of latitude and meridians on the Sun's surface based on its axis of rotation and an adopted Prime Meridian. The fourth column shows that with respect to the Earth the Sun rotates on an axis in 27 $\frac{1}{4}$ days (see p. 67). These quantities are used in computing the solar latitude and longitude of spots or other markings.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

June 1. Civil twilight ends at 21h. 8m. There is no closed night in this month in the latitude of London. The length of the Day from Sunrise to Sunset on June 1 is 16h. 14m. Its length is nearly 16h. 34m. from the 20th to the 24th.

June 2. Jupiter in conjunction with ♃, 5h. 3m. ♃ 2° 37' N.

June 3. Mars in conjunction with ♃, 23h. 51m. ♂ 2° 43' N.

June 4, 16h. Mercury in Superior conjunction.

June 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 8.35s.

June 7. Venus in conjunction with ♃, 1h. 8m. ♀ 2° 56' N.

June 11. Mercury in conjunction with ♃, 1h. 44m. ♀ 3° 18' N.

June 12, 22h. 15m. Mars in conjunction with Uranus. ♂ 1° 44' S.

June 16, 21h. Jupiter at a Stationary Point.

June 22, 4h. 30m. Sun enters the sign Cancer (Summer Solstice).

June 22. Saturn in conjunction with ♃, 17h. 0m. ♃ 2° 10' S.

June 25. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 8.7s.

June 29. Jupiter in conjunction with ♃ 11h. 39m. ♃ 2° 35' N.

Uranus rises June 1, 1h. 24m. ; June 30, 23h. 27m.

Neptune sets June 1, 0h. 24m. June 30, 22h. 27m.

In this month the Mornings increase about 7m. up to the 17th, and then decrease 4m. The Afternoons increase about 14½m. up to the 25th, and then decrease slightly.

Constellations near the S. meridian at midnight: Corona, Hercules, Ophiuchus, Serpens, Scorpius, Lyra, Aquila, Sagittarius.

The Ether.—When, as alternative to the corpuscular theory, light is taken to be the effect of a wave-motion, it is natural to ask for a medium in which this wave-motion shall inhere. Ocean waves are made of water, sound waves of air, light waves of —, and to supply this want in our knowledge, a medium called the ether was imagined. It is in truth hypothetical, but still its existence; so far as our reason goes, is so necessary for many things that are patent to our senses that we have to accept it as reality. Mendeleeff, a leader in chemical science, conceived, in fact, the idea that the ether instead of being some mysterious form of non-matter, as generally believed, is actually the lightest and simplest of the elements, and a definite form of

MORNING AND EVENING STARS.

☿ MERCURY after Superior Conjunction on the 4th, becomes an evening star. It may perhaps be seen by naked eye in the last week of the month, low down in the W.N.W.

♀ VENUS is a bright object in the early morning sky, at a low altitude N. of E. about 3 o'clock. It passes from the constellation Aries into Taurus. Mag. - 3.5.

♂ Mars rises at midnight at the end of the month slightly N. of E. Its brightness increases from magnitude 0.4 to 0.1 during June.

♃ JUPITER rises before midnight and will be low in the S.E. at 2 o'clock. Mag. - 2.2.

♄ SATURN will be seen in the south when the sky is sufficiently dark, and sets after midnight.

matter whose atomic weight is nearly one-millionth of that of hydrogen. When it was found that electro-magnetic oscillations, such as those of radio-telegraphy, were transmitted with the same velocity as light, the same all-pervading medium was taken as their home. Not only through interstellar space, but through the world in all its complexity, this ether prevails. But if our earth is moving through the ether there should be an ether-wind, whose velocity it might be possible to measure, for a conception of the Earth covered with a blanket of ether travelling with it seems impossible as an alternative hypothesis. Nevertheless, a famous experiment by Michelson and Morley failed to show any velocity of the Earth relative to the ether, which cast a doubt on the existence of the latter and led to the Einstein theory of Relativity. The discoveries of new types of rays and of the electron may have led to some modification of view, but the facts of radiation and of other familiar phenomena demand a connecting medium which is conveniently called the "ether."

RAIN FELL IN JULY, 1925.

on 12 days; total fall 3⁶/₆ inches; above the average by 1⁴/₂ inches.

See note on page 18.

MONTHLY NOTES.

July 1. Special Sessions for Licences to deal in Game to be held this month.

— Quarter Sessions to be held in the first whole week after June 24.

5. Dividends due.

9. Fire Insurances to be paid.

15. Registration Officers to publish New Lists of all Electors on Autumn Register.

31. Gun and Game Licences expire.

Mean Longitude of Moon's Ascending Node, July 1, 100° 42' 20".

CONJUNCTIONS, ECLIPSES AND OTHER CELESTIAL PHENOMENA.

July 1. Civil twilight ends 21h 23m. In this month there is no closed night in the latitude of London until after the 21st, when the Sun will be 18° below the horizon at midnight. The length of the Day on July 1 is 16h. 29m.

July 2. Mars in conjunction with ☿, 14h. 27m. ♂ 2° 52' N.

July 5, 14h. Earth at greatest distance from the Sun. Aphelion. Distance, 94,452,000 miles.

July 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 8'48".

July 6. Venus in conjunction with ♃, 23h. 4m. ♀ 1° 33' N.

July 9, 23h. Annular Eclipse of the Sun. Invisible at Greenwich.

See p. 58.

July 10, 17h. Mercury at Greatest Elongation, 26° 22' E.

July 12. Mercury in conjunction with ♃, 5h. 43m. ♂ 3° 18' S.

July 20. Saturn in conjunction with ♃, 0h. 22m. ♀ 2° 20' S.

July 23, 20h. Mercury at a Stationary Point.

July 25, 4h. Saturn at a Stationary Point.

July 25. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 7'08".

July 26, 7h. Jupiter in conjunction with ♃, 17h. 7m. ♀ 2° 18' N.

July 31. Mars in conjunction with ♃, 3h. 6m. ♂ 2° 24' N.

Transits rises July 1, 23h. 23m.; July 31, 21h. 20m.

Neptune sets, July 1, 22h. 23m.; July 31, 20h. 27m.

Meteors of the Perseid stream begin to appear in July.

In this month the Mornings decrease 34m., and the Afternoons 29m.

Constellations near the S. meridian at midnight: Hercules, Ophiuchus, Serpens, Lyra, Cygnus, Aquila, Delphinus, Equuleus, Aquarius, Capricornus, Sagittarius.

Distance of the Horizon.—The limit of distance to which one can see varies with the height of the spectator. The greatest distance at which an object on the surface of the sea, or of a level plain, can be seen by a person whose eyes are at a height of 5 feet from the same level is nearly 3 miles. At a height of 20 feet the range is increased to nearly 6 miles, and an approximate rule for finding the range of vision for small heights is to increase the square root of the number of feet that the eye is above the level surface by a third of itself, the result being the distance of the horizon in miles,

MORNING AND EVENING STARS.

☿ MERCURY, being at eastern elongation on the 10th, is an evening star during the month, and in the first fortnight may be seen above the west-north-west horizon about 21h.

♀ VENUS is a morning star, rising about 2 o'clock, N.E. by E. It passes from Aldebaran through Aurus into Gemini. Magnitude -3.4.

♂ MARS rises in the two hours before midnight, E. by N. It will be a bright object in the south-east in the early morning. Magnitude +0.1 to -0.3.

♃ JUPITER rises in the late evening, and will be in the south-east about midnight or earlier.

♄ SATURN will be seen low in the south-western sky during the evening, with Spica on its right, Antares nearer, on its left, and Arcturus above. Magnitude 0.6.

It is slightly in excess of that in the table below which is computed by a more precise formula. The table may be used conversely to show the distance of an object of given height that is just visible from a point in the surface of the earth or sea. Refraction is taken into account both in the approximate rule and in the Table.

At a height of		the range is		At a height of		the range is		At a height of		the range is	
5 ft.	2.9 miles.		500 ft.	29.5 miles.		4,000 ft.	83.3 miles.	
20 "	5.9 "		1,000 "	41.6 "		5,000 "	93.1 "	
50 "	9.3 "		2,000 "	58.9 "		20,000 "	186.2 "	
100 "	13.2 "		3,000 "	72.1 "

Mean Longitude of Moon's Ascending Node, August 1, 105° 3' E.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

August 1. Day breaks at 1h. 31m. Civil twilight ends at 2oh. 43m. Night begins, 22h. 42m. The length of the day is 15h. 23m.

Aug. 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 6.18.

Aug. 6. Venus in conjunction with ♄, 2h. 5m. 0° 14' S.

Aug. 7. 14h. Mercury in Inferior Conjunction.

Aug. 8. Mercury in conjunction with ♄, 6h. 41m. ♄ 7° 17' S.

Aug. 15, 20h. Jupiter in Opposition. Distance from Earth, 374,280,000 miles.

Aug. 16. Saturn in conjunction with ♄, 9h. 25m. ♄ 2° 19' S.

Aug. 17, 2h. Mercury at a Stationary Point.

Aug. 22. Jupiter in conjunction with ♄, 22h. 32m. ♄ 1° 57' N.

Aug. 25, 10h. Mercury at Greatest Elongation, 18° 20' W.

Aug. 25. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 4.68.

Aug. 28. Mars in conjunction with ♄, 1oh. 28m. ♄ 1° 43' N.

Uranus rises, Aug. 1, 21h. 16m. ; Aug. 31, 19h. 22m.

Neptune is absent from the night sky during August.

Meteors of the Perseid stream are expected this month, the nights of most abundance being from the 10th to the 12th. As the Moon will then be in phase between new and first quarter, and sets early, it will not interfere with their observation.

In this month the Mornings decrease 47m., and the Afternoons 58m.

Constellations near the S. meridian at 22h. are those which were in that position at midnight in July. (See p. 28.)

The first of August is known as Lammas-day and formerly as the Cule of August, the word being Celtic or early British for a holiday. Lammas, is by some, derived from lamb-masse, because of an ancient custom that tenants of the cathedral church at York were bound by their tenure to bring a lamb into the church on that day at high mass. But this was evidently purely local, and others derive the name more surely from a Saxon word signifying loaf-mass, because on that day our forefathers made an offering of bread made of new wheat. In the Romish Church the day is sacred to St. Peter *ad vincula*, and on it in Roman Catholic times the people of England paid Peter's Pence.

MORNING and EVENING STARS.

♂ MERCURY is a morning star after the 10th. At elongation near the end of the month, it rises early 2 hours before the Sun and may be seen above the E. by N. horizon about 4 o'clock. It moves into the constellation Cancer (see Venus).

♀ VENUS is a morning star, rising N.E. by E. It moves from the constellation Gemini into Cancer and joins Mercury at the end of the month. It will be about 10 degrees above the horizon at 4 o'clock on the 22nd with Mercury 4 or 5 degrees below.

♂ MARS is a late evening star rising in the E.N.E., and will be a bright object in the morning sky at the S.E. Magnitude - 0.4 to - 0.9.

♃ JUPITER, in the constellation Capricornus, being at opposition on the 15th is above the horizon almost throughout the night. It will be seen in the S.E. as soon as the sky is dark. Mag. - 2.4.

♄ SATURN is coming to the end of its Apparition. It will be low in the S.W. for an hour or two after sunset.

This month was originally called Sextilis being the sixth of the ten months into which the year was divided in the Roman Calendar instituted by Romulus. Though it became the eighth month when January and February were added by his successor Numa Pompilius the numerical name remained; and those of other months until B.C. 8, when it was changed in honour of Octavius Caesar, to whom the name Augustus was first given. This month was chosen because in it he took possession of his first consulate and reduced Egypt. The name of the month Quintilis had been altered by Julius Caesar, because it was his natal month. Unsuccessful attempts were made later to change the names of other months in the same way as personal honours.

Mean Longitude of Moon's Ascending Node, September 1, 103° 25'. 0'1 respectively.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

September 1. Day breaks at 3h. 7m. Civil twilight ends at 19h. 33m. Night begins 20h. 53m. The length of the Day is 13h. 33m.

Sept. 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 4'0s.

Sept. 5. Venus in conjunction with ♄, 8h. 33m. ♄ 2° 12' S.

Sept. 6. Mercury in conjunction with ♄, 0h. 47m. ♄ 2° 9' S.

Sept. 12. Saturn in conjunction with ♄, 18h. 52m. ♄ 2° 8' S.

Sept. 19. Jupiter in conjunction with ♄, 4h. 33m. ♄ 1° 48' N.

Sept. 19, 14h. Mercury in superior conjunction.

Sept. 21. Uranus in opposition. Distance 1,773,200,000 miles.

Sept. 21. Harvest Moon.

Sept. 23, 19h. 27m. The Sun enters the Sign Libra (Autumn Equinox).

Sept. 25. Mars in conjunction with ♄, 6h. 43m. ♄ 1° 33' N.

Sept. 28, aft. Mars at Stationary Point.

Uranus, Sept. 1, rises 19h. 18m.; sets 7h. 12m. Sept. 30, rises 17h. 22m.

Neptune rises Sept. 1, 3h. 57m.

In this month the Mornings decrease 46m.; the Afternoons, 1h. 6m.

Constellations near the S. meridian at 22h.: Lyra, Cygnus, Aquila, Delphinus, Aquarius, Capricornus, Equuleus, Pegasus, Pisces.

Stellar Magnitude. — The numerical magnitude of a star shows its order in a scale of brightness, the terms of which are, in geometrical progression. Stars just visible to the naked eye are of magnitude 6. A 5th mag. is about 2½ times as bright as a 6th. A 4th magnitude the same multiple of a 5th and so on, and from this it follows that a first magnitude star is a hundred times as bright as a 6th. The scheme may appear paradoxical because the faint stars have the larger numbers, but this is reasonable because the word "first" implies pre-eminence. It follows logically that a star 2½ times as bright as a 1st should be of magnitude 0, and a star 2½ times as bright as zero of negative magnitude, i.e. -1 and so on. The use of fractional magnitudes for the stars whose brightness falls between these integral multiples at once suggest itself. Capella and Vega, which are nearly but not quite 2½ times as bright as a star magnitude 1.0 are of about zero magnitude, or 0.0 and

MORNING AND EVENING STARS.

♂ MERCURY being at superior conjunction on the 19th is a morning star in the first part of the month, and an evening star at the end. It may possibly be visible in the early days.

♀ VENUS is a morning star rising later day by day. It moves eastward through Leo, and on the 6th will be a degree from the star Regulus.

♂ MARS rises E.N.E. in the evening, and will be in the East about 22h., and in the south in the early morning. It is rapidly approaching Jupiter in brightness. Mag. - 1.0 to - 1.6.

♃ JUPITER is low in the southern sky during the evening. It is decreasing in brightness. Magnitude - 2.4 to - 2.2.

♄ SATURN sets little more than two hours after sunset, and will be seen with difficulty.

Regnal Years.—The years of a king's reign are the regnal years, and each begins on the anniversary of his accession: e.g., Regnal year 16 of the present King began on May 6, 1925; regnal year 17 began on May 6, 1926. The system is used for dating Acts of Parliament. The Summer Time Act of 1925, for example, is quoted as 15 and 16 Geo. V. ch. 64, because it became law in the session which extended over part of these two regnal years. The regnal years of Edward VII. began on January 22, so that acts passed in that reign are, in general, quoted with only one year number, but year 10 of this series ended on May 6, 1910, and Acts of the Parliamentary Session 1910 are headed 10 Edw. VII. and 1 Geo. V.

The Historical Year.—A date before 1752 written, for example, as February 25, 1650, implies a day in the first part of the year 1659 (Julian or Historical). It would have been in the year 1658 (Civil), because before 1752 the Civil and Legal year ended on March 25.

RAIN FELL IN OCTOBER, 1924,
on 15 days: total fall 3²⁷ inches; above the
average by 0⁷⁴ inch.

MONTHLY NOTES.

October 1. Latest day for receiving corrections
for next year's "WHITAKER."—Quarter Sessions
to be held in the first whole week after Oct. 11.
—Pheasant shooting begins.—Common Lodging-
houses to be whitewashed in the first week.

5. Dividends due.
9. Various Licences expire.
12. Fire Insurances must be paid.
15. Autumn Register of Voters in force.
24. Borough Councillors to be nominated.

Mean Longitude of Moon's Ascending Node, October 1, 101° 49' 25".

CONJUNCTIONS, ECLIPSES, AND

OTHER CELESTIAL PHENOMENA.

October 1. Day breaks at 4h 8m.

Civil twilight ends at 18h. 23m.

Night begins, 19h. 32m. The length

of the Day is 11h. 37m.

Oct. 5. Mean time taken by

Sun's semidiameter in crossing

the meridian, 1m. 4' 38".

Oct. 5. Venus in conjunction

with ☿, 17h. 57m. ♀ 3° 42' S.

Oct. 7. Mercury in conjunction

with ☿, 21h. 54m. ♀ 5° 36' S.

Oct. 10. Saturn in conjunction

with ♃, 5h. 17m. ♂ 1° 57' S.

Oct. 14. noon. Jupiter at a

Stationary Point.

Oct. 16. Jupiter in conjunction

with ♃, 11h. 29m. ♀ 1° 59' N.

Oct. 22. Mars in conjunction

with ♃, 10h. 18m. ♂ 2° 43' N.

Oct. 25. Occultation of ♀ Gem-

inorum (mag. 3.2). See p. 59.

Oct. 25. Mean time taken by

Sun's semidiameter in crossing

the meridian 1m. 5' 9".

Uranus, Oct. 1, rises 17h. 18m.

sets 5h. 8m.; Oct. 31, sets 3h. 4m.

Neptune, Oct. 1, rises 1h. 51m.;

Oct. 31, rises 0h. 11m.

In this month the Mornings

decrease 51m., and the Afternoons

1h. 3m.

The Zodiacal light may be seen

before dawn in the middle of

this month, when the Moon is

absent.

Constellations near the S. meri-

dian at 22h.: Delphinus, Equi-

lus, Aquarius, Capricornus, Pega-

sus, Andromeda, Pisces, Piscis

Australis, Cetus.

The Companion of Sirius.

The star Sirius, otherwise known

as the Dog Star, the brightest

star in the heavens, which is

in view in the morning sky in

October, has a faint companion

which revolves round the primary

in about 50 years. It has long been

known that the faint star is very

massive in relation to its bright-

ness, its mass being approximately

that of our Sun, whilst the mass

of the bright star is little more

than twice that amount. From

its type of spectrum it is inferred

that its surface brightness per

unit area is large, and since it is

known to be one of the near stars,

its faintness, as seen, must be

due to its small size, from which

it follows that this body must be

extremely dense, and that the

force of gravity at its surface

must be large.

Recent examination of its

spectrum has shown that the dark

lines which cross it are consid-

erably displaced towards the red

end compared with those in a

spectrum from a terrestrial source.

This is an effect that, according

MORNING AND EVENING STARS.

☿ MERCURY is an evening star but is above the horizon scarcely half-an-hour after sunset.

♀ VENUS as last month rises in the brightening sky, and will not be conspicuous.

♂ MARS, which is moving from left to right in the constellation Aries, rises nearly in the E.N.E. a long after sunset. Its brightness increases from magnitude -1.6 to -2.1, and at the end of the month Mars will be as bright as Jupiter. During the evening, it will be in the east and south, and the south-west at 3 or 4 o'clock in the morning at an altitude of about 45°.

♃ JUPITER will be at a stationary point on the 14th, and begins its eastern journey among the stars. It will be in the south and south-west during the evening, setting more or less at midnight. Magnitude = -2.2 to -2.1.

♄ SATURN now sets in the twilight, and is not likely to be seen.

the theory associated with the name of Einstein, would appear in the spectrum of a body with the normal qualities above mentioned. Displacement of this kind had been before detected in the spectrum, but much less in amount and because of the difficulty in distinguishing from placements due to other causes these earlier observations were scarcely considered conclusive. It that made recently has been accepted as a successful application of the proposed third test the theory of Relativity, and it also fits a theory which claims that atoms, stripped of their outer electrons, may be packed so tightly that the stars which they form, while still remaining gaseous, have a density enormously greater than that of any terrestrial element. The theories and observations here offered seem to give one another mutual support.

RAIN FELL IN NOVEMBER, 1924.

on 13 days; total fall, 3' 15 inches; above the average by 0' 87 inch.

MONTHLY NOTES.

November 1. Salmon-fishing with rod and line ends (with some local exceptions).

— Fox-hunting begins.

— Ordinary day of election of Borough Councillors.

— Holiday at London Stock Exchange.

9. Lord Mayor's Day. Mayors and Aldermen of Boroughs to be elected and Sheriffs appointed.

12. County Sheriffs for next year nominated.

15. Solicitors', notaries', proctors', and sworn clerks' certificates expire. See Note, Dec. 15.

Mean Longitude of Moon's Ascending Node, November 1, 100° 11' E. and therefore very bright. Its

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

November 1. Day breaks at 5h. 0m. Civil twilight ends at 17h. 20m. Night begins 18h. 29m. The length of the Day is 9h. 39m.

Nov. 4, 9h. Mars in Opposition. Nearest to Earth on Oct. 27 Distance 42,620,000 miles.

Nov. 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 7' 15".

Nov. 5. Venus in conjunction with ♄. 3h. 34m. ♄ 3' 41" S.

Nov. 5, 4h. Mercury at Greatest Elongation. 23° 22' E.

Nov. 6. Saturn in conjunction with ♄. 17h. 20m. ♄ 1° 36' S.

Nov. 7. Mercury in conjunction with ♄. 11h. 54m. ♄ 5° 34' S.

Nov. 12. Jupiter in conjunction with ♄. 19h. 55m. ♄ 2° 23' N.

Nov. 14-15. Meteors of the Leonid stream may be seen after midnight.

Nov. 15, 19h. Mercury at a Stationary Point.

Nov. 18. Mars in conjunction with ♄. 4h. 45m. ♄ 4' 50" N.

Nov. 21, 12h. Venus in Superior conjunction.

Nov. 21, 18h. Saturn in conjunction with Sun.

Nov. 21, 23h. 27m. Venus and Saturn in conjunction. ♄ 1° 27' S.

Nov. 25, 14h. 25m. Mercury and Venus in conjunction. ♄ 0' 28" N.

Nov. 26, 0h. Mercury at Inferior conjunction.

Nov. 28, 14h. 28m. Mercury and Saturn in conjunction. ♄ 0' 11" S.

Uranus sets Nov. 1. 3h. 0m. ; Nov. 30, 1h. 3m.

Neptune Nov. 1. R.A. 9h. 56' 5m. ; Dec. 12 59' 9" N. Rises 6h. 7m.

In this month the Mornings decrease 49 m. ; the Afternoons 39m.

Constellations near the S. meridian at 22h. : Pegasus, Pisces, Cetus, Andromeda, Aries, Perseus, Taurus.

Mars in Opposition. Mars will be in Opposition on Nov. 4.

The last Opposition was on Aug. 23, 1924, and the interval, 803

days, is longer than the average synodic period (see note, p. 8).

Mars completes a revolution round the Sun in 687 days, and describes more than a revolution between Oppositions. The additional are described since last

opposition has been near perihelion, where the planet moves faster than average, so the Earth

has taken longer to overtake Mars, which accounts for the long

synodic interval. Mars passed through perihelion on Aug. 30,

1924, and therefore at Opposition on Aug. 23 it was near the Sun

and unusually near the Earth, and therefore very bright. Its

MORNING AND EVENING STARS.

☿ MERCURY sets half an hour after the Sun at the beginning of the month, and rises less than an hour before sunrise at the end. In neither case will it be visible.

♀ VENUS being in superior conjunction on the 21st rises and sets nearly with the Sun throughout the month.

♂ MARS at Opposition on the 4th is a conspicuous object throughout the night. Subject to changes with date it may be said that it will be in the East at altitude 25° an hour or two after sunset, and in the west at 3 or 4 o'clock in the morning. Magnitude - 2.1 to - 1.4.

♃ JUPITER sets in the late evening nearly in the W.S.W. It loses its brightness more slowly than Mars, so that it is again the brighter object at the end of the month. Magnitude - 1.9.

♄ SATURN being in conjunction during the month will not be visible.

distance from the Earth was then less than 35 million miles. This year perihelion passage was on July 18, and the distance at Opposition is therefore greater than in 1924 (see opp. page), but still its brightness is greater than the average at Opposition. The greatest brightness this year, compared with that in 1924, is in the ratio 3 to 5. The next bright Opposition of Mars will be on July 23, 1930.

The configuration of the planets in their orbits is rather remarkable this month. Saturn, Venus, Mercury and Mars will be nearly in line with the Sun and Earth, the two first named being on the side of the Sun remote from our globe, Mercury and Mars on the same side. The effect of this is an unusual number of planetary entries in the list on the opposite page, but nothing further.

RAIN FELL IN DECEMBER, 1924,

on 15 days; total fall 2' 73 inches; above the average by 0' 47 inch.

MONTHLY NOTES.

- Dec. 10. Grouse and Black Game Shooting ends.
 15. Last day for renewing solicitors' certificates.
 Six months qualifying period for Spring Register of Voters ends.
 Notices to owners and occupiers affected by private Bills in Parliament must be delivered.
 25. Quarter Day.
 27. Bank and General Holiday.
 31. Various Licences expire.

Mean Longitude of Moon's Ascending Node, December 1, 98° 36' 25".

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

December 1. Day breaks at 5h. 40m. Civil twilight ends 16h. 45m. Night begins 17h. 57m. The length of the Day is 8h. 9m.

From Dec. 18 to 25 the length of the Day is about 7h. 46m.

Dec. 3. Mercury in conjunction with ♄, 22h. 37m. ☿ 0° 57' S.

Dec. 4. Saturn in conjunction with ♄, 7h. 18m. ♄ 1° 22' S.

Dec. 5, 10h. Mercury at a Stationary Point.

Dec. 5. Venus in conjunction with ♄, 12h. 30m. ♀ 2° 3' S.

Dec. 5. Mean time taken by Sun's semidiameter in crossing the meridian, 17m. 10' 38".

Dec. 8, oh. Mars at a Stationary Point.

Dec. 10. Jupiter in conjunction with ♄, 7h. 4m. ♃ 2° 51' S.

Dec. 14, oh. Mercury at Greatest Elongation, 21° 13' W.

Dec. 15, 3h. 54m. Mercury in conjunction with Saturn. ☿ 0° 18' N.

Dec. 15. Mars in conjunction with ♄, 8h. 18m. ♄ 6° 11' S.

Dec. 19, aft. Occultation of μ Geminorum (mag. 3.2). See p. 59.

Dec. 22, 14h. 34m. The Sun enters the sign Capricornus. (Winter Solstice.)

Dec. 25. Mean time taken by Sun's semidiameter in crossing the meridian, 17m. 11' 08".

Dec. 31. Saturn in conjunction with ♄, 22h. 27m. ♄ 1° 9' S.

Uranus, Dec. 1, R.A. 23h. 44' 8m.; Dec. 2, 28' 5" S. Sets, Dec. 1, oh. 59m.; Dec. 31, 23h. 0m.

Neptune rises, Dec. 1, 22h. 6m.; Dec. 31, 20h. 11m.

In this month the Mornings decrease 23m., the decrease being continuous throughout the month. The Afternoons decrease 4m. up to the 13th, and then increase 9m.

Constellations near the S. meridian at 22h.: Andromeda, Triangulum, Aries, Cetus, Perseus, Taurus, Eridanus, Auriga, Orion.

Precession.—In the table of Fixed Stars on page 60 two columns give respectively the Precession in R.A. and in Declination, and the accompanying notes state that this is caused by movement of the lines of reference on the Celestial Sphere. In explanation of that movement we must visualize the Earth moving round the Sun with its centre in the plane of the Ecliptic. The Earth's axis is inclined to that plane always at the same angle, appreciably, so that the plane of the Earth's Equator which marks the Equator on the Celestial Sphere makes a (nearly) constant angle with the plane of the Ecliptic. But the Earth's axis without altering its inclination to the fundamental plane, has a slow

MORNING AND EVENING STARS.

MERCURY is a morning star and may be seen at 7 o'clock or earlier a few degrees above the north-east by east horizon in the first part of the month.

♀ VENUS is above the horizon almost wholly with the Sun. It sets half-an-hour after sunset at the end of the month. Magnitude - 3.4.

♂ MARS will be in the south in the first part of the evening and in the west later. Its brightness decreases from magnitude - 1.4 to - 0.4 during December.

JUPITER may still be seen in the south and south-west during the early evening at an altitude of 20 degrees or less. Magnitude - 1.8.

♄ SATURN, now in the constellation Scorpius, rises in the two hours before sunrise S.E. by E.

ical movement about an axis at right angles to the plane of the Ecliptic, which it completes in 5,800 years. The effect of this motion, transferred to the Celestial Sphere, is first, that the points at which the Equator intersects the Ecliptic move round the Ecliptic in that period, and secondly, that the Equator moves among the stars, and their distances from that line, i.e., their declinations change. A star, for instance, if there were one at the intersection of the Equator and Ecliptic, one whose R.A. was *oh. om.*, and declination zero, would after a time, though it had not itself moved, be off the Equator, and since the point of intersection of the two circles would have removed itself, its R.A. as well as its declination would have changed. Similarly for other stars. The movement of the Earth's axis happens because the Earth is not exactly spherical, and the attractions of the Sun and Moon act on the equatorial ring of matter which projects above the true sphere.

50] NOTES FOR THE YEAR 1927.

BEING THE THIRD YEAR AFTER BISSEXTILE OR LEAP YEAR, AND 17 AND 18 OF KING GEORGE V.

Calendar Elements and Dates for the Year.

Golden Number	IX	Union Day, South Africa	May 31
Epaet	27	Birth of King George V. (1865)	June 3
Solar Cycle... ..	4	Whit Sunday	" 5
Roman Indiction... ..	10	Trinity Sunday	" 12
Dominical Letter	B	Corpus Christi	" 16
Julian Period (Year of)	6640	Birth of Prince of Wales (1894)	" 23
New Year's Day (Saturday)	Jan. 1	Dominion Day, Canada	July 1
Septuagesima Sunday	Feb. 13	Independence Day, U.S.A.	" 4
Ash Wednesday	March 2	Jewish New Year	Sept. 27
Good Friday	April 15	Armistice Day (1918)	Nov. 11
Easter Day	" 17	Sundays after Trinity	" 23
St. George's Day	" 23	First Sunday in Advent	Nov. 27
Accession of King George V. (1910)	May 6	St. Andrew's Day	" 30
Ascension Day	" 26	Birth of Queen Alexandra (1844)	Dec. 1
Birth of Queen Mary (1867)	" 26	CHRISTMAS DAY - Sunday	" 25

The Tropical Year 1927-1928.

THE TIME OF HIGH WATER at the undermentioned Ports and Places may be approximately found by taking the Time of High Water at the Standard Port (as shown on pp. 5, 9, &c.) and adding to or subtracting therefrom the quantities annexed. The time thus found will be Greenwich Time for British, Irish, French and Belgian Ports, and Amsterdam Time for Netherlands Ports. The rise of the tide at Springs and Neaps is given in the last two columns.

EXAMPLE 1.—Required the time of high water at

Aberdeen on January 9th, 1926:—

Time of high water at LEITH 9h. 58m. Morn.

Subtract tide interval 2 33

Time of high water at Aberdeen .. 8 25 Morn.

EXAMPLE 2.—Required the time of high water at

Chepstow on January 16th, 1926:—

Time of high water at BRISTOL 8h. 38m. Morn.

Add tide interval 0 13

Time of high water at Chepstow 8 51 Morn.

It may happen that the "tide interval" to be subtracted is greater than the quantity from which it has to be

taken, in which case 24 hours must be added to the Standard Port time; the resulting difference will be the preceding day's afternoon tide where the Standard Port morning tide was used. Sometimes the sum "high water at Standard Port" + "tide interval" will exceed 24 hours; in this case, the excess will be the time of high water after the midnight following.

EXAMPLE 3.—Required the time of high water at

Aberdeen, January 25th, 1926, aft.

Time of high water at LEITH on

January 25th 1h. 4m. Morn.

(+ 24 hours =) 25 4

Subtract tide interval 2 33

Time of high water at Aberdeen on 25th 23 31 After.

54 Tables for Finding the Times of Sunrise and Sunset.

THIS double entry table provides the means for finding, with sufficient accuracy for practical purposes, the times of sunrise and sunset at any place situated between latitude 60° N. and 60° S.

To use the table: In the horizontal line with the Sun's declination in the first column, and under the required latitude in the heading, there will be found figures which added to 12h. give the local apparent time of sunset. Subtracting these quantities from 12h. will give the local apparent time of sunrise. To obtain from this the local mean time, the equation of time for the day in question which is given on the second page of each month, must be added to or subtracted from the apparent times of sunrise and sunset, as shown in the heading.

To find the corresponding Greenwich mean time, the difference of longitude of the place from Greenwich must be added if the place be West, subtracted if East.

The table is arranged for northern latitudes, but will serve equally well for places south of the Equator, if the declination North in the first column be considered South, and *vice versa*.

If the times of sunrise or sunset are required for any declination or latitude falling between the arguments in the table, they may be found by simple proportion.

THE TIME OF SUNSET.

The times of sunrise and sunset given in this Almanack are the times when the centre of the Sun's disc is seen on the horizon from sea-level at Greenwich, computed on the assumption that the horizontal refraction is 34". It is doubtful whether there is a precise legal definition of sunrise and sunset. The above has generally been adopted as a correct statement, though in some Tables the instant when the upper limb, or edge, of the Sun is on the visible horizon is given as

DECLINATION.	LATITUDE.

the time when the Sun rises and sets. The legal question has been more concerned with the distinction between local sunset and Greenwich sunset, rather than with a precise definition. It has been held by a legal tribunal, as would be expected, that the words "sunset" in laws and regulations must be taken to mean the time when the sun sets at the place in question, whether it be stated in local or Greenwich time.

TO FIND THE GREENWICH TIME OF SUNRISE AT CERTAIN PLACES IN THE BRITISH ISLES IN EACH MONTH OF THE YEAR.

The Table gives the number of minutes to be added to or subtracted from the time of sunrise at Greenwich, to find the Greenwich time of sunrise at the place named in the first column, for the first day of each month. The corrections to be applied on other dates and for other places in the neighbourhood of these may be inferred approximately by interpolation.

The sign + means that the time required is later than that at Greenwich. The sign - that it is earlier.

If these Tables be considered in conjunction with a map it will be seen that the places at which the Sun rises at the same moment lie in a nearly straight line across the map, the lines for different moments being parallel. The lines change their inclination to the meridian throughout the year. Similarly for the setting.

0	-0 53 3+	16 0	8 0	+0 7 28-	20 0	12 0	+1 0 32-	0 0

The sign on the left hand side of the correction is to be used when the argument is on the left.
+ means that the correction is to be added to the reduced altitude, and - that it
is to be subtracted.

The corrections in Tables II. and III. are always to be added (with the exception of the figures in italic in the last two columns of Table III.); 1' is to be subtracted from the final result because the quantities in Table III. above have been increased by that amount.

Solar and Sidereal Time.

TO CHANGE INTERVALS OF MEAN SOLAR TIME INTO THE EQUIVALENT INTERVALS OF SIDEREAL TIME AND VICE VERSA.

THE length of a Sidereal day is 23h. 56m. 4⁹/₁₀s. of Mean Time. One hour of Sidereal Time is therefore, equivalent to 59m. 50¹/₁₀s. of Mean Time, and one hour of mean solar time is equivalent to 1h. 0m. 9⁸/₁₀s. of Sidereal Time. This may be expressed otherwise by saying that the Mean Time clock loses or retards 9⁸/₁₀s. per hour on the sidereal clock, and that the sidereal clock gains or accelerates 9⁸/₁₀s. per hour on the Mean Time clock. These quantities—"acceleration" and "retardation"—are tabulated below for the argument (common to both) in the middle columns. If the argument be considered as Mean Time, its equivalent in Sidereal Time is obtained by adding the acceleration. On the other hand, if it is considered to be Sidereal Time, its equivalent in Mean Time is found by subtracting the retardation.

Acceleration.	Argument.	Retardation.	Acceleration.	Argument.	Retardation.	Acceleration.	Argument.	Retardation.	Argument.	Acceleration or Retardation.	Argument.	Acceleration or Retardation.

See p. 77.

ECLIPSES IN 1926.

In the year 1926 there will be two Eclipses, both of the Sun.

I. A Total Eclipse of the Sun on January 14. Visible at Greenwich and throughout Europe. The path of totality begins its course in Central Africa, leaves that Continent not far south of the Equator and, when at a point in the Indian Ocean due south of India in latitude 10° S., turns northward, and crosses the islands of Sumatra (Benkoolen being within the track), Borneo and Mindanao in the Philippines. The Greatest duration of Total Phase on the central line will be 4m. 10s. in longitude 82° E., latitude 10° S. The duration in Sumatra will be about 3 minutes. A Partial Eclipse will be seen from Mauritius (mag. 0.61); Johannesburg (mag. 0.13); Bombay (mag. 0.16); Madras (mag. 0.32); Hong Kong (mag. 0.43); and Perth (mag. 0.03). The Greenwich Time of Greatest Phase at these places being between 5h. and 8h., according to position.

Eclipse begins January 14, 3h. 58.6m. Central Eclipse begins 4h. 55.1m. Central Eclipse happens at Local Mean Noon at a place in longitude 82° 45' E., latitude 10° 5' S. at 6h. 37.9m. Central Eclipse ends 8h. 17.8m., Eclipse ends, 9h. 14.3m. by Greenwich Mean Time in all cases.

II. An Annular Eclipse of the Sun about midnight of July 9. Invisible at Greenwich. The path from which the Annular Eclipse may be seen lies wholly in the South Pacific Ocean, beginning its course in longitude about 147° E., latitude 11° N., at 21h. 15m. G.M.T., and ending in longitude 111° W., latitude 5° N. an hour after midnight. The middle of the path lies in the neighbourhood of the Hawaii or Sandwich Islands, longitude 170° W., latitude 25° N., approximately, but the larger of these islands are south of the path. It is possible that the Annulus may be seen from Gardner Island and from some others of the group. The duration of Annular Phase on the central line in this longitude is about 3m. 50s. At Hong Kong the Sun will rise with about a quarter of its diameter eclipsed, and the Eclipse will end for that place 20 minutes later.

Two Eclipses, both of the Sun, is the minimum

number that can happen in any calendar year. The greatest number is seven, five of the Sun and two of the Moon, or four of the Sun and three of the Moon. In the year 1927 there will be five Eclipses, and one of them, on June 29, is remarkable, for it will be a Total Eclipse of the Sun visible in England, an event which has not occurred since the year 1724. The duration of Totality will be short, and the central line of the path from which totality may be seen runs in a north-easterly direction across the North of England, passing just south and east of Richmond in Yorkshire, where it will last about 25 seconds. Totality, seen from the north of Norway, will last about 45 seconds.

ECLIPSES OF JUPITER'S SATELLITES.

The following Table gives the times of Disappearance (D.) and of Reappearance (R.) of the Satellites of Jupiter at Eclipse that will be visible from Greenwich in the year 1926, with a few additional just beyond that limit, and the times of some occultations as mentioned below. The local mean time of the phase for any place other than Greenwich may be found by applying the longitude (in time) to the times given in the Table, adding if the place is East of Greenwich, and subtracting if it is West. If Standard Time be required the zone difference is to be treated in the same way; or, in other words, the phenomena of Jupiter's Satellites are seen simultaneously from all places where the planet is above the horizon at the time.

From March to the Opposition of Jupiter (August 15) the Eclipses take place on the Western side. In this period I., and sometimes II. and III., disappear by Eclipse and reappear at the Eastern edge. The times of these reappearances from occultation (Oc. R.) are given, the satellite referred to being that of the preceding line. From Aug. 15 to December, these Satellites disappear in some cases by occultation at the Western edge, and reappear after Eclipse on the Eastern side. The times of these disappearances by occultation are given (Oc. D.), the reappearance after Eclipse being in the following line. The times of the phases of an occultation of IV. on July 23, which happens soon after an Eclipse, are specially added.

The above is a list of the stars of the 6th magnitude (to mag. 6.5) and brighter that will be seen occulted from Greenwich during the year, with the times of disappearance and reappearance. The occultations if seen from other places will be *in general*, earlier if the place is West, later if it is East, but an occultation visible from one place is not necessarily to be seen from some other. Disappearances usually happen on the East or left-hand side of the Moon, reappearances on the West, so that before Full Moon the star disappears at the dark edge, and reappears at the bright, these circumstances being reversed in the latter half of the lunation. The exact position is shown by the angle from N. Point, or the point of the Moon's disc nearest the Pole of the heavens, counting towards the East from 0° to 360°. The stars B. D. + 17° 750 and B. D. + 19° 893 are double stars. B. D. - 22° 5403 have faint companions, which may not be visible except in large telescopes. When Disappearance and Reappearance occur on opposite sides of midnight, the hour of the latter is printed 24.

Alternative names of stars (see next page)—Polaris = α Ursae Minoris; Aldebaran = α Tauri; Rigel = β Orionis; Capella = α Aurigae; Betelgeuse = α Orionis; Sirius = α Canis Majoris; Castor = α Geminorum; Procyon = α Canis Majoris; Pollux = β Geminorum; Regulus = α Leonis; Spica = α Virginis; Arcturus = α Boötis; Antares = α Scorpii; Vega = α Lyrae; Fomalhaut = α Piscis Australis; Altair = α Aquilae; Markab = α Pegasi; Achernar = α Eridani; Canopus = α Argus.

The position of a star is defined by its Right Ascension and Declination, which are analogous to longitude and latitude on the terrestrial sphere. For reasons known by the word Precession (see page 48), the lines of reference on the celestial sphere are continually changing, hence these co-ordinates, Right Ascension and Declination of each star change, each by the annual amount shown in the Table. Observations of position of the stars show that they do not conform precisely to this change by precession, and the outstanding amount for individual stars, which is known as Proper Motion (see page 64) is also shown. The angular parallax of a star is inversely proportional to its distance, it being the angle that the mean radius of the Earth's orbit would subtend at the distance of the star. The determination of a star's parallax is attended with some difficulty, and the results by different observers and methods are to be considered possibly of unequal value. The parallaxes in the adjoining table have been collected from various sources, preference being given to the more recent adoptions. The entry 0.00 indicates that the parallax to find the parallax have shown that the star is very distant. For some few stars no value is available. The last column shows the distance from the Sun corresponding to this parallax in parsecs. A parsec is equivalent to about twenty billion miles.

There are in the list certain stars which are double,

and in general the Mean place given for these is that of the brighter star. In the case of Castor (α² Gemini) the second of the components is the brighter, and the place of this is given. Sirius, Procyon, which have faint companions, and α Centauri are binary stars, and of these the Mean place given is that of the centre of the orbit.

These tables give Mean places. The position on any day of the year differs from this because of Precession, Nutation, Aberration and Proper Motion. The Mean place with these effects added is called the Apparent place, and for the purposes of navigation and surveying it is the Apparent place that is required.

The Stellar System.

THE objects of the sky, Sun, Moon, Planets, Stars, appear to us to be fixed on the interior surface of a hemisphere of which the observer is the centre. Actually the different classes of objects are at very different distances. The stars are the farthest away, and individual stars are at great and very various distances from us, and are themselves separated from one another by equally large distances. The nearest star to the Sun is nearly ten thousand times as far from it as is the planet Neptune. It is the purpose of modern astronomy to investigate the method of distribution of these bodies in space, their movements, their sizes, their physical condition as to temperature and density, the methods of mathematical physics being invoked to show how these conditions have been brought about. There are about 10,000 stars visible to the naked eye in the whole celestial sphere, the cases where two or more faint stars close together combine to form one which is so visible being included. The number actually seen naturally depends on the efficiency of the observing eye and the clearness of the atmosphere, and the estimate will be less generous if the stars to magnitude 6.0 and no fainter, which is sometimes taken as the limit of naked-eye visibility are counted. The whole number of stars down to this limit of magnitude is 4,300, of which more than 3,000 are visible during the year from latitude 60°. By the aid of the photographic plate objects are detected and recorded which no eye can see, even with the best optical aid. One hundred millions is an under-estimate of the number of stars already photographed, and it may be supposed that this number would be much increased with increased exposure, though 2,000,000,000 has been assigned as a limit to their number. The Yerkes telescope, whose object glass has 40 inches diameter, will just show stars of the 17th magnitude. A star of magnitude 21 has been photographed.

THE STRUCTURE OF THE UNIVERSE.

The stars are divided according to their apparent brightness into series known as magnitudes (*see* page 36), and down to the 9th or 10th magnitude the number of each magnitude is known, for all to this order have been catalogued. For fainter stars the numbers have been derived from counts in sample areas. If the Universe be supposed to be an aggregation of stars in which the individuals of each of the varying degrees of intrinsic brightness are distributed uniformly throughout an endless space, it is to be expected that the number of stars brighter than the 4th magnitude would be about four times as great as the number brighter than the 3rd; the number brighter than the 5th magnitude greater than the number of those brighter than the 4th in the same ratio, and so on indefinitely. When the numbers of stars of different magnitudes obtained by counts are compared, it is found that the ratio decreases continually as the stars are fainter, until at the 26th magnitude it is only about two. The explanation of this observed fact is that the universe of stars accessible to vision is limited; either there are few or no stars beyond a somewhat indefinite boundary, or we are prevented from seeing them by absorbing material distributed throughout interstellar space.

To a casual glance it is clear that the stars are not uniformly distributed over the sky, but have a tendency to congregate near the great belt of cloud-like forms which encircle the heavens,

known as the Milky Way or Galaxy. Applying the method of sounding by "star ratios" above outlined it is found that the stars appear to thin out less rapidly as we go out in the plane of the Milky Way than they do in the direction of the galactic poles. The deduction is apparent; the boundaries of the stellar systems are more distant in the plane of the Galaxy than they are at the poles. In other words, the stellar system is an extremely flattened organisation, whose general form is, roughly, that of a double convex lens or of a watch. Looking along the galactic plane we find, as we should expect, the stars crowding together, since this is the direction of greatest extension, and the Milky Way is therefore largely a depth effect. But examination of its prominent features, the great star-clouds, the irregularities in its form, and the deep rifts in its structure shows that its appearance is not wholly due to depth, and that the region is the home of bodies and masses other than uniformly distributed stars.

Statistical study of the distribution of the brighter stars shows that they, too, are arranged in a flattened spheroidal system in which the star-density, more or less uniform at its centre, diminishes as we go outward. It was formerly a general belief that the Milky Way surrounded this Universe of bright stars as a girdle, whether continuous with it or not was an open question. A more modern view pictures the total Universe as a number of local clusters, such as the aforesaid Universe of bright stars of which our own Sun is a unit, all lying more or less in the Galactic plane. The greatest condensation of stars as we see them occurs in the bright galactic clouds in Sagittarius, while the opposite portion of the Milky Way is a region of low concentration and brilliancy, from which it is inferred that we are not precisely at the centre of the whole Universe, but that its boundaries are more remote in Sagittarius than elsewhere. The fact that the central line of the Milky Way deviates slightly from a great circle and that the southern Galactic hemisphere is slightly richer in stars than the northern, is generally assumed to indicate that the position of our Sun is a little north of the Galactic plane.

Attempts have been made to estimate the probable dimensions of this Universe of stars. The diameter of our own local system is generally regarded as about 3,000, or 4,000 light years. As to the larger system comprehending all the faint stars we know of, Newcomb derived a diameter of about 30,000 light-years in the Galactic plane, the shorter diameter at right-angles to this plane being about $\frac{1}{4}$ th of this amount, and there have been other estimates of the same order, whilst more recently, Shapley approaching the question from an entirely different point of view has given 300,000 light-years as the larger diameter of the Stellar Universe, the dimension at right-angles to the Galactic plane being one twentieth of this. It will be gathered from this that the matter is highly conjectural. There is a type of body called Spiral Nebulae (*see* p. 65) which do not inhabit the region of space about the central Galactic plane, and are supposed by some to be Island Universes, not forming part of the Galactic system, but this again is a point still under discussion. It is recognised that in the space which comprises the Universe of stars there is dark obscuring matter which it is suggested is the cause of some of the dark patches in the

THE FIFTEEN BRIGHTEST STARS.

The last column of each table shows the brightness, irrespective of distance, compared with that of our Sun, which is taken as a star of apparent magnitude -26.57 on the stellar scale. A star marked thus * is the brightest component of a binary or multiple system; a small star of the Centaurus group is the nearest star to us so far known.

Milky Way. As seen in the sky the Galaxy always passes through the same constellations, sharing with them the diurnal motion, but its direction bears no special relation to the direction of the Ecliptic, Equator, or horizon. Such a relation is not to be expected, for these three planes pertain only to our Sun and Earth, which are minor bodies of the Cosmos of which the Galaxy is a main outstanding feature.

STAR SPECTRA.

Most of the bright stars and many of the fainter have been examined with a spectroscope, and have been divided into classes according to their type of spectrum as indicated by the lines which cross them, the spectral types being named by the letters O, B, A, F, G, K, M, N. The stars of the first two classes, O and B, have spectra characteristic of helium and hydrogen, and have some affinity to planetary nebulae. Stars whose spectra range between A and F—and it is to be remarked that there is no rigorous line of division between the classes—are white or blue stars, and in their spectra broad absorption lines of hydrogen are conspicuous. In the next groups—F to G, and G to K—lines characteristic of metals appear, fine but numerous, and the stars of this class are yellow. The spectrum of our Sun falls within the group F to G. The characteristic of the spectra of the remaining classes, M (and N), is the existence of a considerable number of flutings, and the stars are red. Antares, Betelgeuse, and α Herculis are notable stars in sub-classes of this type. (See Table above.)

STELLAR EVOLUTION.

The classification of the stars according to their type of spectrum is purely empirical, but there is strong evidence that the principal differences in stellar spectra arise in the main from the variation in a simple physical condition in the stellar atmosphere. It is now generally agreed that this dominant physical condition is temperature, and there is definite knowledge from observation that the intense white Class B stars are the hottest, the red Class M, the coolest

in our series. These facts point to a genetic or evolutionary relationship between the stars of the different spectral classes, and the question arises as to how, and in which direction, the evolution proceeds. Formerly, the idea obtained, perhaps rather vaguely, that each star passed through stages from hot to cold, its spectrum changing in type in the order above indicated. The system of evolution which is now proposed assumes that in the beginning of their stellar stage, all stars are of Class M. They are then bodies of gas of extraordinarily low density, and of low temperature and surface brightness. They contract, grow continually hotter, and pass through the successive spectral classes towards B, but only the more massive stars can generate enough heat to reach the white hot state required to produce spectra of that class, the others reach their critical density at spectral Class A, F, G, or even K. After this critical point in their contraction is reached the stars begin to fall off in temperature and in luminosity, and gradually pass through the spectral classes in the reverse order until they have again become red stars of Class M before they finally sink to invisibility. The stars on the ascending branch are, according to the adopted terminology, chiefly "giants," those on the descending branch "dwarfs," the words referring to intensive brightness rather than to mass, though they involve difference in volume. This theory, so far as its fundamental principle goes, was conceived by Sir Norman Lockyer from general physical considerations, but it emerged about twelve years ago from a research by Prof. H. N. Russell of Princeton, U.S.A., correlating absolute magnitude with spectral type, and is generally associated with his name.

The question is being attacked on the theoretical side by analysing on general physical principles the constitution of a mass of gravitating matter and the probable sequence of its changes, and some modification of this new theory is being found necessary. That the low surface temperature of the denser dwarf stars is to be ascribed not to low internal temperature, but to increase of opacity, which prevents the heat from passing outwards to the surface, is one point of theory

that modifies the views derived from observation; but in its main features the scheme of stellar evolution above outlined still stands, and is, in fact, supported by the physical theory.

SIZE OF THE STARS.

The stars are too remote for even the largest to show an appreciable disc in any telescope as do the planets, and obviously the size of a star is not proportional to its brightness as we see it, for this depends on its distance, and on its surface brightness, which may depend on its temperature or other physical condition. It is found that the colour-index of a star, which is the name given to the difference of its magnitude determined photographically and visually, is independent of its size and distance, and depends, assuming ideal radiation only, on its temperature. Consequently a determination of the colour-index is equivalent to determining the temperature and hence the surface-brightness, and with this the angular diameter of a star is to be found by dividing its total brightness by the surface brightness per unit area. A more direct way of measuring stellar diameters has lately been found by utilizing an optical principle as proposed by Fizeau, and elaborated more recently by Michelson, and an apparatus known as an "interferometer," has been invented and constructed for the purpose. It is satisfactory that the angular diameters, as measured with this instrument, agree closely with the values derived from consideration of the surface brightness. Since the distances of these large stars that have been thus measured are known approximately, the following values of their diameters in miles have been deduced:—

Betelgeuse	240 million miles
Antares	120 " "
Aldebaran	32 " "
Arcturus	17 " "

The distance of Antares being somewhat uncertain, a larger value of its diameter than the above is sometimes given. Measures with the interferometer have shown that Mira Ceti at maximum is as large as Betelgeuse.

ABSOLUTE MAGNITUDE.

This phrase is much in use in the astronomy of the present day, and implies the luminosity of a star irrespective of its distance. The precise definition of absolute magnitude is that it is the number that expresses, according to the usual system of stellar magnitude (see p. 36), the brightness of the star as it would be seen at the distance of 10 parsecs (parallax 0.1"). It is clear that if the distance of a star is known, its absolute magnitude can be computed from its apparent, or by reversing the formula, if the absolute and the apparent magnitudes are known, the distance of the star can be determined.

DISTANCE OF THE STARS.

The distance of the stars from us is so immense that its determination is perhaps the most difficult problem of astronomy, and not until comparatively recent years has it been effected in any quantity and with much certainty. The direct method of determination of a star's parallax, as this quantity is called, consists in measuring the minute difference of direction of the star as seen from opposite points of the Earth's orbit, which is now usually done by photographing the star and its surroundings at

appropriate epochs and finding by measurement the change of position of the star with relation to its neighbours. A spectroscopic method of finding parallax through the absolute magnitude has been evolved. It has been found that in the spectra of stars of like type the ratio of the intensity of the two components of certain pairs of lines is a function of the absolute magnitude of the star. In stars intrinsically brilliant, for example, a certain Calcium line is very strong whilst a line due to Iron is very weak, but in an intrinsically faint star the case is exactly contrary. This principle has been adopted, and by help of the spectra of stars whose distance has been found trigonometrically it is found possible to infer the absolute magnitude of a star from examination of its spectrum, and hence its distance.

The distances of some stars or groups of stars are found by indirect methods such as the following. If by any means it is possible to know the mean parallax movement (see *Stellar Motion*) of a group of stars the mean parallax or distance of this group follows from a simple computation. In other words the space through which our Sun travels, which is about twice the diameter of the Earth's orbit in a year, is taken as the base-line with which to measure the distance of the stars.

The distances of many of the stars are given in the lists on pages 60 and 61. To express these large distances a large unit is required. One of these is the space that light moves through in one year, which in miles is 6 followed by 12 zeros; another unit is the *parsec*, or the distance at which the mean radius of the Earth's orbit would subtend an angle of 1" (parallax = one second). This is $3\frac{1}{2}$ times the light year and is represented roughly by 2 followed by 13 zeros. There is also a unit little used called the *Siriometer*, which is equivalent to a million times the distance of the Earth from the Sun.

Within the sphere of 10 parsecs radius about the Sun as centre, there are rather more than a hundred stars whose distance has been measured. It is estimated from knowledge of the general density of stars in space that there are nearly twice that number. The others remain to be discovered.

STELLAR MOTION.

Many, if not all, of the so-called Fixed Stars are gradually changing their positions relative to one another, the movement of each star being called its Proper Motion. Consideration of these proper motions has led to the conclusion that they are in part due to an actual movement in space of the star itself, but in part to the movement of our own Sun, which causes an apparent motion of the star in the opposite direction, this latter being called the star's parallax motion. In this way, it has been found fairly conclusively that the Sun, and with it the Earth and planets, is moving through space with a speed of 19.5 kilometres per second towards a point on the celestial sphere not far from the bright star Vega, speaking roughly, but there are differences in the determinations of the position of this point. The Proper Motions of Stars of spectral type F and G are found to be much larger on the whole than those of other types, and it is therefore to be supposed that these classes are nearest to us. It has already been mentioned that our Sun is of this spectral type. By an optical principle

known as Doppler's, it is possible to find by the spectroscope the rate at which a star is approaching or receding from us from certain

peculiarities of the lines in its spectrum. The "line of sight" or "radial" velocities of many stars have been found in this way.

STAR CLUSTERS AND NEBULÆ.

Among the other apparently solitary stars we may notice groups of stars gathered close together, sometimes easily separable into individual stars, others that can only be separated in the most powerful telescopes, and some that appear as unresolvable patches of light; the latter are called nebulae, and were aptly described by Sir William Herschel as "shining fluid." A short list of the more interesting of these various objects is given herewith.

No. in New General Catalogue.	Messier's or Herschel's Number.	R.A. 1920.	Declination 1920.	Constellation.	Appearance.

7078	M 15	21 26 +11 49		Pegasus ...	Magnificent cluster of stars.

There are nebulae called planetary that are small, regular in outline, and show a uniform disc. Analogous to these are some which are dark in the centre called annular or ring nebulae. Beyond this the spectroscope divides the nebulae into two great classes. The first spectroscopic observation of a nebula, made by Huggins in 1864, showed a spectrum of one bright line only, which indicated that these bodies, or at least some of them, are constituted of glowing gas. Later investigation showed that the spectra of some nebulae are continuous, from which it may be inferred that these are in a later stage of progress, assuming the evolution of celestial bodies from a primitive nebula. The nebulae with continuous spectrum are called "white"

nebulae, in distinction to those with bright line spectra, which are "green" or gaseous. Photography has brought the means of studying the number and form of these objects in great detail, and it is found that the white nebulae are as a rule of a spiral form, and that there are many thousands of them. The larger gaseous nebulae lie mostly in the Milky Way, and the smaller, the so-called planetary and stellar nebulae, do not markedly avoid it as do the spirals which lie in a zone of the sky, roughly at right angles to the Galaxy. Globular star clusters also lie outside the Milky Way, but irregular clusters are within its limits. The gaseous green nebulae are in a small minority. There are also masses of Dark nebulae in space.

These are approximate times of the middle of minimum phase.

VARIABLE STARS.

Although the stars generally shine with unchanging brightness, there are some among them which are exceptions to this rule, and of these Algol, the star β of the constellation Perseus, is

the best known. In general this star is of about the second magnitude, but at regular intervals of something less than 69 hours it fades away to between third and fourth magnitude, remains so for about 20 minutes, and then regains

its light. The whole eclipse occupies about 9½ hours. The approximate times when this star will be at minimum in the months when it is suitably placed for observation are given in the table above. The position of Algol is given by R.A. 3h. 3m., Declination 40° 39' N.

There are variable stars of types other than those like Algol. The Cepheid variables have an average period of about 7 days, and the rise from minimum to maximum takes only about one-third of the whole period, so that the decrease of light is more gradual than the increase. Stars of the β Lyre type pass from minimum to minimum in about 6½ days, but are not of the same brightness at all minima, the alternate being equal. There are variable stars of a class with periods varying from 30 to over 500 days, a large proportion of which, however, are in the neighbourhood of 330 days, whose range of apparent brightness during a light-cycle may be as great as 9 or 10 magnitudes. The spectra of most of these long-period variables show bright emission as well as dark absorption lines, and a periodic outflow of incandescent gases and vapours is suggested as the cause of the light variation. Mira Ceti (R.A. 2h. 16m., Declination 3° 19' S.) is the most famous of these. It will be at maximum in the month of October, 1926, and again in September, 1927. Its magnitude at maximum may be anything between 2 and 5.

The variation of stars of the Algol type is believed to be caused by the partial eclipse of the bright star by a dark companion which moves in an orbit round it. A secondary minimum that has been noted in the period of variation of Algol can be accounted for by this theory. The variation of the Cepheid variables, on the other hand, is not caused by eclipse, though many of them have been found to be binary stars. It has been suggested that it may be due to a pulsation or periodic swelling and contraction of the star. A curious relation has been found between the absolute magnitude and the period of variation of Cepheids, those of longer period being the brighter.

NEW OR TEMPORARY STARS.

The phenomena known as "Novae" or "New" Stars can scarcely be classed as variable stars, for the rise to maximum, so far as is known, occurs only once in their history. Generally the Nova appears in the place of a star of faint magnitude which may have blazed out into conflagration, but on the other hand the juxta-position may be merely fortuitous and the phenomenon may be the sudden visibility of a mass of dark nebulous gas which by some means has become igneous. The great brilliancy which occurs very suddenly, is short-lived, for there follows a rapid fall, and in a few months the object emits, perhaps, 1 per cent. of its light, whilst in a decade it has fallen to its original condition and luminosity. A few observations made during the increase of brightness have shown a spectrum of the ordinary type crossed by dark lines which are much displaced from their normal position. Just as the maximum light is reached the spectrum is full of bright bands flanked by dark lines on the side of the shorter wave length towards the violet. The lines of hydrogen are most conspicuous, but helium is present, and other bands can be identified with enhanced lines or lines which are produced in the laboratory when metallic vapours are very strongly excited to luminosity by a powerful electric spark. Later on as the light

begins to fall the characteristic nebular lines in the green and violet make their appearance and become the most conspicuous feature of the spectrum while the other lines fade away. At a still later stage the spectrum resembles that of the nucleus of a planetary nebula or of one of the Wolf-Rayet stars which are found here and there in the Milky Way. Below will be found a list of the Novae (13 in number) that have been visible to the naked eye since 1848. Several of these are still visible as faint stars of tenth to fifteenth magnitude and are being systematically observed. Their light generally shows some trace of variability. The Nova that appeared in Pictor last year differed from the majority of the others in the list, in that it was placed at a distance of several degrees outside the Milky Way. Its maximum brightness was not reached until 15 days after discovery, during which interval (May 25 to June 6), it brightened from magnitude 2.4 to 1.2. It then declined rapidly, and on June 25 its magnitude was about 3.3, which was followed by a temporary brightening. Its spectrum appeared in the main according to the above description, but differed in several respects from that of the average Nova.

THE Sun is one of the millions of stars that make up the Universe, and, so far as human knowledge goes, in magnitude and constitution, is not unlike the stars of the night sky. It is surrounded by a family of smaller bodies of which our Earth is one, and the Solar system, which is only a minute detail in the structure of the Universe, is the observing station from which we look out in all directions across the great distances which separate us from the other members of the stellar system.

The Solar or Planetary system consists of the Sun, with eight major and more than a thousand minor planets, or as teroids, circulating round it at varying distances in oval-shaped orbits. Six of the major planets have smaller bodies circulating around them, so that each forms a separate system, but all the bodies receive their light and heat from the Sun.

The periodic comets which return to perihelion at regular intervals, since they move in elongated elliptical orbits of which the Sun is at one focus are also members of the Solar system, but perhaps shine partly by their own light.

The plane of the Ecliptic in which the Earth moves round the Sun (see p. 75) is used as a fundamental plane of reference. The other planets move, at varying distances from the Sun, in planes inclined but little to the plane of the Ecliptic, and describe orbits in periodic times which are connected with the distances by a certain relation known as Kepler's 3rd law. The squares of the periodic times vary as the cubes of the semi-major axes. Following are given brief notes on each of the bodies which make up the Solar system, with details of their sizes, distances from their primary, and periodic times in tabular form. The time of rotation about the axis, or the length of the day of the planet, is added where this is known.

THE SUN.

The surface of the Sun, seen in a telescope, presents a mottled appearance formed by a darkish background on which small brilliant patches are scattered, the shape of these being such that they have been called alternatively rice-grains or willow leaves. On this surface or amid the material forming it, black spots appear sporadically, and around them are brilliant streaks called faculae, which are conspicuous when the spots are near the edge of the Sun. The bright streaks are also seen unassociated with spots and when these are scattered over the disc are generally called flocculi. There are also seen pervading the solar surface brilliant clouds of calcium vapour that are revealed by the spectrohelograph, an instrument by means of which the whole of the Sun's disc may be photographed by the light of any element, and of that element only. The nature of the spots is not known with certainty. Formerly they were thought to be saucer-shaped depressions at a lower level than the surrounding surface, which is called the photosphere; modern views describe them as columnar vortices which have a deep-seated origin far below the photosphere, and assume that a sun-spot is a vast tornado in which electrified particles are rapidly whirled. This view is confirmed by the invariable presence of a magnetic field in the neighbourhood. There is apparently a connection between the solar activity, as shown by the spots, and terrestrial magnetism for the coincidence in time, between certain exhibitions of its

variations and the appearance of sun-spots is too marked to be fortuitous. It is suggested that the connection is made by stream-like emanations of corpuscles from the Sun which envelop the earth. The spots vary in size and number, which increase and decrease somewhat uniformly and arrive at a maximum about every eleven years. They increase at a rather more rapid rate than they decrease. From measures of their position on the disc and by help of the elements given on page 2 of each month the latitude and longitude (heliographic) of the spots can be computed. It is seldom that spots appear in latitudes greater than 30° from the solar equator, but about the time of spot minimum or rather earlier small spots appear in these extreme latitudes, and during the succeeding eleven years or more the spot regions converge towards the solar equator, and at time of maximum the spots are largely in solar latitude 12° to 14° N. and S. The Sun rotates on its axis in about 25 days 9 hours, which is shown by the apparent movement of the spots since they cross the visible disc. But the rate of angular rotation is not the same in all latitudes. According to Carrington's investigations made in the middle of last century the rotation periods found from spots in different latitudes are:—

1848.1	1917.7	1856.0	1923.6
1860.1		1867.2	

When the intense light of the Sun is shut off by the interposition of the dark body of the Moon in a total solar eclipse, certain red prominences are seen projecting from the Sun's edge, which consist of masses of glowing hydrogen gas arising from the chromosphere. Sometimes these are of remarkable shape and extend to enormous heights, occasionally being detached from the body of the Sun. In the lower strata of the Sun's envelope are found the vapours of many metals, known by their characteristic lines shown in the spectroscope. Another appendage to the Sun outside the chromosphere, called the Corona, can only be seen during total eclipses. The lower portion of the corona consists of a pale green light containing hydrogen, the upper is a beautiful mass of silvery white light, in form of feather-like plumes, with dark spaces between, which have been traced from the Sun's edge to a distance as great as twice the Sun's diameter. The corona appears to vary in shape and extension according as the eclipse occurs at the period of maximum or minimum of Sun-spots. Solar eclipses are only seen total at places where the shadow of the Moon falls, and an eclipse is partial at localities off this path of totality, because the change in the observer's position places him out of the direct line joining the Moon to the Sun. Total eclipses

of the Sun visible from any given place are rare. The last total solar eclipse, visible in England, was on May 23, 1724. There will be an eclipse of the Sun on June 29 of next year, which will be seen total for a few seconds from the north of England (see page 58).

MERCURY.

Mercury is the nearest planet to the Sun, and the smallest in the system. Because it moves in an orbit between the Sun and the Earth this planet can never be seen far from the former body, and is sometimes to the West, sometimes to the East of the Sun. In the former case Mercury appears as a morning star and in the latter as an evening star. The extremes of these apparent excursions are technically known as Elongations, and the times and distances, measured by the angle included between the lines which join the Earth to the Sun and the planet respectively, are given in the third page of each month. The great ellipticity of the orbit of Mercury causes the amount of these Elongations to vary considerably, and they may be as small as 16° or as large as 28° . The period of revolution round the Sun—in other words, Mercury's year—comprises 88 solar days, and he turns on his axis either in the same time, and therefore always presents the same face to the Sun, like the Moon with respect to the Earth, or in about 25 hours. Mercury shows phases to the Earth—like the Moon in her first quarter if the elongation be in the East, and like her last quarter if in the West. (See p. 72.)

This planet will be visible to the naked eye in the evenings in the middle of March and possibly at the end of June and in the mornings of the last week in August.

VENUS.

Venus, which is nearly twice as far from the Sun as Mercury, is almost exactly the same size as the Earth. Her apparent movement with respect to the Sun is similar to that of Mercury, except that, being farther from the Sun, and nearer to the Earth than her smaller neighbour, the angles of Elongation exceed those of Mercury, and extend to 47° . The disc of Venus is not telescopically interesting, for owing to her dense cloud-laden atmosphere very few markings are visible, and this renders a determination of her axial rotation uncertain. By some astronomers her day is believed to be very nearly equal to that of the Earth, whilst others have concluded that it is equal to the year of Venus, or, in other words, that the planet always presents the same face to the Sun. Venus has epochs of great brilliancy when she is seen in the telescope as a crescent like the Moon about 5 days from or before New. She will be presented to good effect in 1926 at the opening of the year, when she will be seen as an evening star.

MARS.

Mars, the first planet whose orbit is exterior to that of the Earth, is a little larger than Mercury and considerably smaller than Venus and the Earth. Details of his distance and period will be found in the table. Mars is in opposition at intervals of about two years, because it moves at a rate not greatly different from that of the Earth, and will be favourably placed for observation in the autumnal months of 1926, being in opposition to the Sun on November 4. Mars, like Mercury and Venus, exhibits phases, but in a much less

degree than those planets. His disc departs from exact circular form, or is gibbous only to the extent of one-eighth of its diameter. The other superior planets are too far away to show any very appreciable phase, though traces of it are sometimes to be detected in the disc of Jupiter.

Unlike Mercury and Venus, Mars exhibits many well-defined markings, which enable his rotation period to be well ascertained; there are, besides, white spots at the poles of rotation. These are supposed to consist of snow, and when it is summer to the Martians in the northern hemisphere, the white spot about that pole dwindles considerably in extent, if it does not disappear entirely, which it does rarely. The remainder of the disc is divided into greyish and ruddy areas, which have been called seas and lands. The dark grey patches are now not considered to be oceans, but are usually regarded as marshes or areas covered with some sort of vegetation. These areas are seen to change their colour and intensity with the Martian seasons very much as our vegetation would appear to do if viewed from a celestial neighbour. Certain fine, dark, straight markings seen across the ruddy areas have been named "canals," perhaps a little unfortunately, as it has been taken to imply that they are of manual construction, but for this there is no sufficient evidence or proof.

MINOR PLANETS.

Between the orbits of Mars and Jupiter a large number of small planets have been discovered, and every year considerable additions are made to the list. At present the total number known is more than a thousand, and there may still be thousands awaiting detection. The four largest, found in the early years of the 19th century, are—Ceres, 485 miles; Pallas, 304 miles; Juno, 118 miles; and Vesta, 243 miles in diameter. Vesta is the brightest though not the largest. In recent years the discoveries have been of much smaller objects, and it is probable that some of them are not more than from 10 to 20 miles in diameter, and are perhaps nothing more than great masses of rock flying round the Sun.

The periodic times of their revolutions vary considerably, and an average may be taken as 1,600 days, or $4\frac{1}{2}$ years. Some of the orbits are very oval, and the inclination of their planes to the Ecliptic has considerably different values. The inclination of Pallas is 35° , whilst that of Juno is only 13° . Many are smaller, the mean of all being about 8° . One of these small bodies, named Eros, at some oppositions approaches nearer to the Earth than Mars does at any time, and this affords a good opportunity for determination of the solar parallax. Oppositions happen at intervals of about $2\frac{1}{2}$ years, the circumstances being very different at the different occasions. Eros will be in Opposition in the middle of 1926, when it will be not far from aphelion and therefore distant, but there will be a very close approach in 1931, when the minimum distance will be about 16 million miles.

JUPITER.

The next planet in order from the Sun, Jupiter, is the largest in the system, and has a diameter eleven times that of the Earth. Its density, however, is only $\frac{1}{4}$ th that of the latter. On viewing Jupiter through a telescope it will be seen that the disc is not circular, but its form, an oblate spheroid, is believed to be due to the rapid axial rotation, which causes a flattening at

the poles and bulging outwards at the equator. The same effect is produced on all the planets in more or less degree. Jupiter has four principal satellites about the same size as our moon, which were the first celestial objects discovered with the telescope, Galileo having observed them in the year 1610. The planes of their orbits are but slightly inclined to that of Jupiter about the Sun, and in consequence these bodies which shine by the light of the Sun, are eclipsed every Jovian lunation, except Satellite IV., which escapes under some circumstances.

The five fainter satellites are far beyond the powers of small telescopes. One of them was discovered with the 36 inch refractor at the Lick Observatory in 1892, the remaining four, which are extremely faint, were detected by means of photography and may be regarded as among the most difficult to see of celestial objects.

The surface of Jupiter presents features of interest because of their varying changes, though at the same time they possess considerable permanence. Of these the best known is the Great Red Spot and its surroundings. There are records of an observation of a spot by Hook in 1664, which may have been an early appearance of this, but the first modern observation was by the Rev. W. R. Dawes when he figured it in the form of an ellipse resting on the south equatorial belt of Jupiter on Nov. 27, 1857. It was subsequently seen by several others, and in 1878 it came under general observation. A curious bay or hollow in the above-named belt has been visible since 1831, when it was seen by Schwabe, and if we conclude that the one now perceptible is identical with it then the mean rotation of the object and of the red spot near it has been $9^h. 55^m. 37^s$. during the last 95 years.

Early in 1901 a series of dark spots were detected in the same latitude as the red spot, but moving with greater velocity. These markings are still visible, and they have had the effect of causing considerable irregularities in the motion of the red spot. As they overtake the latter formation they push it forward, and its rate of rotation is accelerated. In 1923 and 1924 this peculiarity was exhibited in striking fashion, and the rotation period of the red spot was quickened to the extent of 3 seconds. The effect of the recurring conjunctions of the red spot and south tropical disturbance has been to nearly equalize the rates of motion as will be seen by the following comparison :—

Object.	1901.	1924.
	Period of Rotation. H. M. S.	Period of Rotation. H. M. S.
Red spot and Hollow ...	= 9 55 40.6	9 55 36.6
South Tropical Disturbance	= 9 55 18.5	9 55 32.0
Difference in rate.....	= 22.1 secs.	4.6 secs.

From recent observations it appears that the South Tropical Disturbance is now moving at a slower rate than the Red Spot.

At the opening of the year 1926 the longitude of the great red spot will be approximately 13 degrees, and will follow the zero meridian system II.) in 96 minutes of time. There are frequent irregularities, however, in the rate of motion of the spot, and these render it impossible to predict its exact position. As a guide to the probable place of the object, the following times are given when it may be expected to be either near or on the central meridian of the planet. It is to be hoped that observers will

obtain a number of good transit times of the spot during the summer months :—

1926.	Red spot follows Zero meridian in degrees.	Red spot follows Zero meridian in time.	Transit time of spot H. M.
			10 G.M.T.
May 1.....	28	46 min.	14 10
June 1.....	22	36 "	14 40 "
Sept. 1.....	4	7 "	9 58 "

The middle of the red spot will nearly correspond with the zero meridian in Sept.-Oct. 1926, should its recent rate of movement be prolonged, and it will be interesting to determine the exact time of conjunction. The last two conjunctions occurred in the spring of 1919 (March) and in the summer of 1913. The more rapid motion of the spot (mean period $9^h. 55^m. 36^s$.) has enabled it to complete 7 revolutions of Jupiter relatively to the zero meridian ($9^h. 55^m. 40^s$.) in about $16\frac{1}{2}$ years.

The following are a few computed times for the passage of the zero meridian system II. :—

1926.	H. M.	1926.	H. M.
May 3.....	15 3	Aug. 27.....	10 46
June 1.....	14 4	Sept. 25.....	9 40
July 30.....	13 1	Oct. 26.....	10 16
July 29.....	11 55	Nov. 22.....	7 39

Note.—Two systems are in use for defining the positions of markings on Jupiter. In System I., which pertains to the rapidly moving Equatorial Zone of the planet, the period of rotation is taken as $9^h. 50^m. 30^s$. System II. applies to the Temperate Zones, and in this the time of rotation is $9^h. 55^m. 40^s$.

SATURN.

The sixth major planet in order from the Sun is unique in appearance because of its encircling ring-system, which renders it magnificent as a spectacle and an interesting object for telescopic observation. The system consists of two bright rings and an inner dusky ring through which the body of the planet can be seen. A marking on the outer ring known as Encke's division is sometimes seen, but it is doubtful whether this is a real separation. The rings appear to be flat annular discs of extreme thinness, inclined at an angle of 28° to the plane of the Equiptic, and it is shown that neither of them can be a coherent mass or in one piece, either solid or liquid, as in that case it would be difficult to account for their stability. They probably consist of an immense number of minute bodies revolving like satellites round the body of the planet. Belts like those on Jupiter, but of not so pronounced a character, are seen on Saturn. His figure shows a bulging at his equator, the ratio of the polar to the equatorial diameter being as $13\frac{1}{2}$ to 15. This planet will be favourably placed for observation in the early months of summer, being in opposition to the Sun at the middle of May, and will be visible in the clear evening skies of the ensuing months.

Saturn has ten satellites, situated outside the rings; some of the former are visible in telescopes of low power. Titan, the largest, is about one and a half times the size of our moon, whilst Iapetus is about the same size as our satellite.

Titan was discovered by Huyghens in 1655, Tethys, Dione, Rhea and Iapetus (see table p. 72) by J. D. Cassini towards the end of the 17th century. Sir Wm. Herschel discovered Mimas and Enceladus in 1789, and Hyperion was observed for the first time, almost simultaneously by Bond and Lassell in September, 1848. The

most distant, Phœbe, which was first seen in 1898 (photographically by W. H. Pickering), moves in its orbit in retrograde direction like the two exterior satellites of Jupiter, VIII. and IX. Themis, which is called the tenth satellite, though it appears not to be the farthest from Saturn, has been observed once only since its discovery in 1900, and its reality is doubtful.

URANUS.

This planet, discovered by William Herschel at Bath in 1781, is only just visible to the naked eye. In 1926 it will be in opposition to the Sun on September 21, and may be favourably viewed in the evenings of autumn. In a telescope Uranus may be distinguished from the stars around by his disc, which is obvious though less than 4" in diameter, and by the quality of his light, which is less piercing than that of the stars. The two outer and brighter of his four satellites were discovered by Wm. Herschel in 1787; the two inner by Lassell in 1851. All four move in a plane which is almost at right angles to the ecliptic and their motion is considered to be retrograde.

NEPTUNE.

This planet, placed on the confines of the Solar system, is a small telescopic object of about the 8th magnitude. The motion of its single satellite, which was discovered by Lassell in 1846, is retrograde. He will be in a good position for telescopic scrutiny in February and March amongst the stars on the western region of Leo.

THE MOON.

Neither Mercury nor Venus, so far as is known, has a satellite; the one satellite of the Earth is the Moon, which is quite familiar to us. The mean distance of the Moon from the Earth is about 239,000 miles—near enough for us to get a more complete knowledge of its surface conditions than we can of any other member of the Solar system. Only one side of the Moon is seen from the earth, but every region of the Moon is presented to the Sun in turn and as there is no sign of water or vapour on the disc, and consequently no atmosphere, the surface must be exposed to the most violent changes of temperature: in the lunar day of half a month it must be heated to a very high temperature, and in the other half subjected to cold equal to that of interstellar space. Her diameter is rather more than 2,160 miles, and her rate of motion through the firmament $13^{\circ} 10' 35''$ per day, which implies that she travels over a space slightly exceeding her own diameter in one hour. The average time she takes to move around

the sky is 27d. 7h. 43m. 11⁵⁵/₁₀₀, and the average time from a New Moon to the next is 29d. 12h. 44m. 38¹/₁₀₀. When seen through a telescope the surface of the Moon presents many objects of great beauty and interest. A small instrument will show the chief "seas," plains, mountain ranges, ring-plains, and crater-pits. The question as to the origin of these formations, whether they may have been caused by volcanic action, or, on the other hand, by the impact of meteors forms an interesting subject for discussion.

When the Earth passes between the Sun and Moon, the Earth's shadow sweeps across the Moon and causes a lunar eclipse, which may be either total or partial as in the case of solar eclipses, but there is the difference that the phase of a lunar eclipse is seen the same from all places where the Moon is above the horizon at the time. The obscuration of the Moon's disc is hardly ever complete, but because the Sun's light is scattered by the clouds in the Earth's atmosphere, the Moon appears usually as a copper-coloured disc, the precise shade being different at different eclipses. It will be understood that solar eclipses can take place only at New Moon, and lunar eclipses only at Full Moon.

The Full Moon, which occurs near the Autumnal Equinox, rises at nearly the same time, about sunset, on several consecutive evenings. Because in earlier times it was thought that this was specially ordained to facilitate the ingathering of the crops the phenomenon was called the Harvest Moon. The Full Moon which follows is called the Hunter's Moon.

A FEW OF THE CHIEF LUNAR FORMATIONS.

Wedge-shaped Valley of the Alps.—Near the central line of disc, towards the north, a cleft 83 miles long and $3\frac{1}{2}$ –5 $\frac{1}{2}$ miles broad.

Apennines.—An extensive mountain range somewhat similar to terrestrial features. Visible to naked eye when projecting into the dark part of the disc. Length, 460 miles; highest summit (Huyghens) reaches 18,000 feet.

Aristarchus.—A lunar crater in N.E. quadrant. The brightest object on the Moon. This crater is visible as a luminous spot when all the surrounding region is involved in shadow.

Mare Crisium.—A dark grey oval plain visible to naked eye near W.N.W. limb of Moon. Extends 280 miles N. to S. and 354 miles E. to W. Well seen five days after new or a few days after full.

Mare Serenitatis.—Lies S. of the Moon's centre,

and extends over 428 miles. A nearly circular dark plain. Contains a crater, Linne, formerly suspected of change. This mare is visible to naked eye.

Javrus.—One of the finest craters on the Moon, and about 142 miles in diameter. Situated on S. limb.

Tycho.—Towards S. limb. Has been called "the metropolitan crater of the Moon." A fine crater 54 miles in diameter and 16,600 feet deep. Central hill nearly a mile high. Tycho is the centre of a remarkable system of bright rays radiating from it, and they are very conspicuous at the time of full moon. In its region (S. limb) the Moon's surface is so studded with craters that it resembles an immense honeycomb.

COMETS.

In addition to the planets, there are other interesting objects belonging to the Solar system, called comets. Some of these revolve in elliptical orbits, and return at intervals which, in the case of those that have confirmed the periods computed for them returning, range from $3\frac{1}{2}$ to nearly 80 years, whilst a few other computed orbits show periods as large as a million years. Other comets move in parabolic courses and apparently do not repeat their visits to the Sun.

Comets revolving around the Sun in comparatively limited times are not very numerous, but our knowledge of them is constantly becoming more comprehensive and accurate. These small returning comets revolve in periods from $3\frac{1}{2}$ to 9 years, and deserve special notice, as their orbits are well known and predictions of their reappearances can be accurately made in many cases. Their paths extend outwards to the position where Jupiter performs his revolution, and from his circumstance they are termed Jovian comets.

The comets in the following list have already been seen at least once since discovery, and are expected to return in 1926 or 1927. The month of perihelion passage given in the second column is to be considered as approximate:—

Name.	Last Appearance.	Period in Years.
Kopff	1926 Jan.	1919..... 6'58
Finlay	" Apr.	1906..... 6'54
Tempel-Swift	" Mar.	1908..... 5'84
Teichmayer-Tuttle	" May....	1912..... 13'6
Holmes	" Oct.	1906..... 6'86
Jacobini	" Oct.	1913..... 6'5
Neujmin	1927 Jan.	—..... 5'4
Pons-Winnecke	" June....	1921..... 6'01

Four of the expected periodic comets were observed in the year 1925 (up to Oct. 1) and three others that are believed to be non-periodic.

There are other families of comets, none so numerous as the Jovian, named respectively from the planets Saturn, Uranus and Neptune, for a reason similar to that given above. Halley's comet belongs to the Neptunian family, while the comet of the November meteors (Leonids) belongs to the Uranian family.

METEORS.

Another class of objects which belong to the solar system are the meteoric streams, giving rise to occasional showers of meteors, falling stars, or fire-balls, which are all the same class of object, the distinction being only one of size. They are visible in varying number on every night of the year, and are sometimes so abundant as to form striking phenomena. The year 1926 was notable because of a remarkably abundant and previously unknown stream on

40	Dec. 25-31	103° 34'	θ Geminids.

June 28, which had a distinct connexion with Pons-Winnecke's periodical comet, the orbits being nearly the same. This comet returned to perihelion on June 12, 1921, but the expectation of a fine meteoric shower was not realized. There seems, however, a good prospect that one may occur at the comet's next return in June 1927. Meteorites are composed of terrestrial elements, iron, chromium, magnesium, and nickel being in large proportion.

THE ZODIACAL LIGHT.

This is an appearance which is little understood, and therefore deserves the attention of observers. It shows, when the moon is absent, as a band of faint light which stretches up slantingly from the Sun before sunrise in the autumn months and after sunset in Spring. It may be the manifestation of a widely scattered appendage of the Sun or a vast concourse of slightly reflective meteoric systems. It has been asserted that it is a mere atmospheric effect, but this is not consistent with some of the chief features of its appearance. That it has a celestial origin seems certain, but its true nature is not easily explained on the evidence before us. We may, however, easily conclude that we should observe a decided shimmering E. and W. of the Sun resulting from this reflected light upon the host of minor planets, comets and cometary debris revolving around him, chiefly in orbits of little inclination.

THE AURORA BOREALIS.

This phenomenon may be considered more terrestrial than celestial. It sometimes happens that an unusual luminosity is seen in the northern sky in the form of streamers, arches, and condensations. A feature of special note is the prominent bright line in the green in its spectrum which is identified with a faint yellow-green line to be observed in the background of the sky on nights when no auroral display is visible. Its chief manifestations recur at fairly regular intervals of about eleven years, and seem to be associated with magnetic disturbances and Sun-spots, which have similar periods. The aurora is sometimes

regarded as showing the outer limit of our atmosphere, and its height has been determined. The general result is that the elevation of an aurora is between 50 and 200 miles. The great majority are about 60 miles high, and there are few above 100 miles. There is some suggestion that, with magnetic storms, the period of their appearance follows that of the Sun's synodic rotation (27 $\frac{1}{4}$ days). On March 22, 1920, there was a very extended group of spots at the middle of the Sun's disc, a magnetic storm, and splendid display of aurora during the night. A similar coincidence occurred in 1921 (May 14).

When the above numbers are less than 0° 500 the planet is *horned*, when greater than 0° 500 it is *gibbous* until unity is reached, when it is full.

Duration of Light and Darkness.—The second column of the first page of Calendar for every month contains a small diagram showing the amount of Darkness, or the period of moonlight and sunlight during the twelve hours from 12h. to 6h. These small diagrams have four divisions, each representing three hours, and a division is left unblacked if the moon or the sun is above the horizon for at least half of the period it represents. The diagrams for the greater part of the year

are  one of each pair being used according as it is light or dark during the periods named. In the summer, when the sun is above the horizon for more than half the first and last intervals, these reduce to .

Wireless Time-Signals.—In accordance with resolutions passed at the meeting of the International Astronomical Union at Cambridge in 1925, the wireless time-signals that are issued under the auspices of that organisation are under revision as to their time and method of sending at the time of preparation of this Almanack. No list is, therefore, included this year.

Meteorological Summary (British Isles), 1924-1925.

BRITISH ISLANDS: The maximum temperature of the air recorded in the shade at 4 feet above the ground is 100° Fahr. This was observed at Wilton House, Salisbury, on July 15, 1881, and at Greenwich Observatory on Aug. 9, 1911.

The lowest temperature of the air recorded in the shade at 4 feet above the ground is -23° Fahr., or 55° below freezing point, at Blackadder, Berwickshire, on Dec. 4, 1879.

The greatest rainfall in a day was at Bruton, Somerset, when 9.56 inches fell in the 24 hours ended 9 a.m., June 29, 1917. This rainfall is equal to 965 tons of water per acre.

The total rainfall for a year at Stations in the British Islands during the 55 years 1870 to 1924 ranged from 246.92 inches at Llyn Llydaw

(Copper Mill), Carnarvon, and 247.30 inches at the Sty, Cumberland in 1923, to 9.29 inches at Margate in 1921.

The maximum wind-velocity on record in the British Islands was recorded at Quilty, west coast of Ireland, on Jan. 27, 1920, when a gust exceeded the rate of 110 miles per hour.

GENERAL: The maximum temperature on record of the air in shade is 134° Fahr., observed at Greenland Ranch, California, on July 10, 1913.

The wettest station in the world is generally allowed to be Cherra Poonjee in Assam, where the total fall for the year has exceeded 551½ inches. From June 12 to 16, 1876, 114.14 inches was collected, or an average daily fall of 22.83 inches. On one of these days, June 14, 40.80 inches fell in 24 hours.

For any starting Day of the Week for any given time within Two Hundred Years from the present time of the New Style, 1752, to 1952 inclusive.

THE shape of our Earth is that of an oblate spheroid, or a solid of revolution whose meridian sections are ellipses not differing much from circles, whilst the sections at right angles to these are circles. The length of the Polar axis, according to a recently accepted determination (Hayford) is 7,900.0 miles and the diameter of the Equatorial circle 7,926.7 miles. The suggestion has been made that the Equator is not an exact circle, but the supposed deviation from circularity was small, and the fact has not been proved. The mean density of the Earth is 5.5 times that of water. The Earth moves round the Sun in a plane which passes through the Sun's centre, or, to write with more precision, the centre of gravity of the Earth and Moon moves in this plane, and both revolve round the centre of gravity but not precisely in the plane. The plane is called the plane of the Ecliptic. The Earth's Equator is inclined to this plane at an angle of $23\frac{1}{2}^\circ$, and because of this inclination the Sun is high in the sky in the Summer months and low in the Winter. It is this tilt which causes the seasons, for not only does the high altitude in Summer cause the days to be longer, but the Sun's rays fall more directly on the Earth's surface and make it hotter. The periods of Summer and Winter are opposed in the two hemispheres, the time of Summer in the Northern coinciding with Winter in the Southern, and *vice versa*. Since the axis of the Earth is inclined always in the same direction, the line of intersection of the Equator with the Ecliptic moves parallel to itself as the Earth travels round the Sun (approx. see p. 48). The instants when this line passes through the Sun are called the Equinoxes. The Sun and Earth are surrounded on all sides by the stars, and because the Earth moves round the Sun, the latter changes its position with respect to the stars during the year, and different sets of stars are seen in the sky at midnight in Summer and Winter. The average velocity of the Earth in its orbit is $18\frac{1}{2}$ miles a second, and it moves more slowly in July than in January. It makes a complete rotation on its axis in about 23 hours 56 minutes of mean time, which is the sidereal day. Because of the movement of the Earth in its orbit the length of the solar day is more than this by about four minutes (see p. 77). It has been shown almost conclusively in recent years that the axis of rotation is not a fixed line in the Earth, but that its extremity, or the North Pole of the Earth, moves in a curve, roughly spiral, about the pole of figure as centre at a distance of a few feet from it.

THE TIDES.

The Tides of the Ocean are rightly attributed to the attractive influence of the Moon on the Oceans, modified by a similar influence of the Sun, which is less in amount because of the much greater distance of the attracting body. If the Earth were a globe uniformly covered with water it would be possible to account for the observed phenomena and predict them by simple mathematical consideration of these attractive influences, but these are very greatly modified by the land formations of our globe, and the prediction of the tides for any port depends mainly on the results of observation. A series of observed times and heights of the tide having been compiled and analysed, the analysis will show that the complete tidal movement can be represented by the combination of a

series of periodic terms, and when these terms are each carried forward to some future date their recombination gives the predicted tide. The mean level of the sea remains practically constant, but small changes have been detected which may be assigned to various causes. Taking the mean sea-level as datum, high water is at its highest (springs) at or near New and Full Moon, whilst low water falls an equal amount below at those times. At or near the time of the first and last quarters of the Moon (neaps) the high water rises only about half as much above the mean level as it does at springs, and the low water falls about half as little below it. These phenomena do not usually coincide exactly with the times of these phases of the Moon, but occur later, the interval being known as the *age* of the tide—thus, at London Bridge, the highest or spring tide occurs $2\frac{1}{2}$ days after New or Full Moon, and the neap tide is similarly delayed. The difference of height of spring and neap tides is the most apparent of the periodic differences which make up the whole tidal variation. Besides this there are differences due to the varying distance of the Moon from the Earth, and when the Moon is at or near perigee at New or Full the tide is specially high. There is a slight difference in the heights of the spring tide at New and Full Moon, and also in the height of the neap tide at the respective quarters, but these and other small periodicities are not appreciably noticeable at some ports.

TERRESTRIAL MAGNETISM.

A phenomenon of the Earth, the origin of which is obscure, but on which some light has been thrown by recent investigations, is known as Earth magnetism. Its best known manifestation is its effect on the needle of a mariner's compass, which, except for the variations to be immediately described, points continually northward. The north point indicated by a compass needle is not, except in particular cases, the north point shown by astronomical observations; in other words, the needle does not point to the North Pole of the axis of rotation of the Earth, but makes an angle with the terrestrial meridian. This angle is called the Magnetic Variation, or, more generally, Magnetic Declination, and differs in different parts of the world and even over limited tracts of country. Along a line from the north of Norfolk through Greenwich to Chichester the declination is the same as at Greenwich. Along a line parallel to this through Dover the West declination is now about a degree less; from Newcastle to Plymouth it is about $1\frac{1}{2}^\circ$ greater; whilst at Dublin the declination is 3° or 4° greater than at Greenwich. Observations of magnetic declination are made and charted to show the amount of this magnetic element over our globe, and from such charts it appears that there are two points or regions which may be considered as directive centres, and are known as the Magnetic Poles. At these places a freely suspended magnetised needle would stand vertically. They do not coincide with the terrestrial Poles, nor are they exactly antipodal. Their positions apparently undergo secular change, and for the epoch 1912 the position of the North Magnetic Pole was about lat. 71° , long. 96° W., that of the South, lat. 73° , long. 156° E. The magnetic declination at any place changes gradually year by year, and its amount observed in or near London at certain epochs is given in the table on p. 76. That the compass needle does not in general point true north and south,

but that it is inclined a certain amount east or west, and that the amount varies with the locality was recognised among western nations by the end of the 15th century, Columbus being credited with the discovery. That there is a secular change in the magnetic declination, or that the amount at any place changes slowly year by year, was discovered by Gellibrand in 1634.

Magnetic Declination at London.

Year.		
1580	11	15 East.
1665	1	30 West.
1765	20	0 West.
1800	24	0 West.

In 1819 the westerly declination at Greenwich was about $24^{\circ} 25'$, which was probably its maximum. The needle has been since moving slowly eastward. The following table of mean magnetic elements is derived from the observations made at Greenwich in the respective years, and applies to Greenwich only. The figures for 1925 are provisional only, and for 1926 are inferred.

Year.	Mean Magnetic Declination at Greenwich West.	Horizontal Magnetic Force in C. G. S. Units at Greenwich.	Mean Inclination or Dip of Needle at Greenwich.
1900	16 29 0	1846	67 8 5
1910	15 41 2	1855	66 52 6
1920	14 8 6	18454	66 53 6
1922	13 46 7	18447	66 52 3
1923	13 35 1	18431	66 51 9
1924	13 22 8	1843	66 51 6
1925	13 9 5	1843	66 51 5
1926	12 56	1842	66 51

The dip is the angle that a delicately poised needle constrained to move in a vertical plane under the action of magnetism only will make with the horizontal plane.

The declination varies during the 24 hours, for the needle makes a small excursion in the morning from East to West, and returns, the range at Greenwich being about $12'$ in summer and $7'$ in winter. The needle occupies its mean position in the morning about $10\frac{1}{2}$, and again about $18\frac{1}{2}$, throughout the year. It reaches its most westerly position about $14\frac{1}{2}$, and its most easterly position at an hour of the night which varies with the season of the year. The inclination or dip also varies in a similar manner to the declination. Since these variations of the magnetic elements are mainly confined to the hours of daylight, are much greater in summer than in winter, and are evidently affected by changes in the solar activity—for the variation is larger at times of Sun-spot maximum than at minimum—it may be concluded that they are dependent on solar radiation and perhaps on the ionisation of the upper atmosphere by the Sun, which causes it to be highly conducting.

MAGNETIC STORMS.

Besides these diurnal movements and their periodic variations, the magnets recording the three elements sometimes make sudden and violent oscillations which may continue for several hours. Such an occurrence is known as a Magnetic Storm, and is accompanied by spontaneous electric earth-currents, which may, if violent, interfere with telegraph working. When these storms occur there is frequently a large spot on the Sun, which leads to the suggestion of a solar emanation, perhaps a direct stream, which affects the Earth.

GRAVITY.

It is deduced as a consequence of Newton's laws that two bodies exert on one another an attraction directly proportional to their masses and in inverse ratio to the square of the distance between them, and since this is so the terrestrial mass exerts an attraction upon all the bodies at its surface. The combination of this attraction with the (so-called) centrifugal force due to the rotation of the earth produces a resultant force which is known as gravity. The direction of this force is the vertical.

It is found by experiment that the force of gravity (generally indicated by the letter g) is different in different latitudes. At the Pole the force exceeds that at the Equator by rather more than a two-hundredth part, or, in other words, a person who weighs 200 lbs. at the Equator by a spring balance would weigh by the same balance 201 lbs. at the Pole.

The experiments consist in finding the time of oscillation of the same pendulum in different latitudes, the time being smaller as g is larger. A pendulum which makes a swing in exactly one second is longer at places where g is large. Because this variation of gravity is due to the shape of the Earth as well as to the so-called centrifugal force, it is possible to deduce the ellipticity of meridians from these determined values of g .

The following table gives the relative values of the force of gravity and the length of the seconds pendulum at various places— g is the acceleration due to gravity in centimetre-seconds, l is given in centimetres.

	g .	l .
Equator	978.05	99.097
Latitude 45°	980.63	99.359
Greenwich	981.21	99.418
Edinburgh	981.60	99.457
Pole	983.23	99.622

EARTHQUAKES.

Earthquakes, or earth tremors, are believed to be due to some form of fracture caused by the breakage of the Earth's substance under a growing strain, when the strain has passed the breaking point. This gives rise to waves which are propagated through the solid substance to distant parts of the Earth, and vertically upwards to the surface, sometimes with disastrous effects. The point where the fracture occurs and the earthquake originates is called the seismic centre, or origin, or focus. That part of the Earth which is vertically above this centre is called the epicentre. The waves transmitted through the Earth may come to the surface hundreds, or even thousands, of miles from the epicentre, and the times of arrival are recorded. The first indications on the seismograph are made by longitudinal waves (P), which are followed after an interval by direct transverse waves (S) in approximately the same path, but which travel at a different rate. From the length of the interval of time between the arrival of the (P) and the (S) waves, the distance of the epicentre from the recording station may be inferred, and from three or more such distances it is possible to make an estimate of the position of the epicentre on the earth's surface. There is no very certain method for determining the depth of the focus, but judging from particular cases for which estimates have been made, this may range from 50 to 450 km.

Greenwich Mean Time.

APART from abstract and philosophical considerations, Time, in actual practice, is measured by the rotation of the Earth, and a solar day is the duration of a complete rotation of our sphere round its axis with respect to the Sun, which is rather longer than a rotation with respect to the stars. The speed of the Earth's rotation is itself uniform, but the length of the solar day is affected, first by the movement of the Earth in its orbit round the Sun, which is not constant because of the ellipticity of the orbit, and also by the circumstance that the axis about which the Earth rotates is not perpendicular to the plane of its orbit. Clocks are adjusted to an average or mean solar day which is of uniform length and is divided into 24 equal hours. This is the basis of Mean Solar Time. The length of the Mean Solar day is constant, but that of the apparent, or the interval from one transit of the Sun across the meridian to the next, varies for the reasons above given, and it happens that the longest apparent solar day is about December 22, which is 30 seconds longer than the mean. The shortest solar day as thus defined is about September 16, and falls short of the mean by 21 or 22 seconds.

A unit and method of measurement having been established, it is necessary to choose a zero. The zero adopted is the instant when a fictitious body known as the Mean Sun, which is sometimes before, sometimes behind the real Sun in its apparent annual journey round the Earth, is on some chosen meridian. The time is called the Local Mean Time of any place through which the meridian passes. Usually some standard meridian, such as that of Greenwich, is chosen, and the time of that meridian is used throughout a whole country, and hence the expression Greenwich Mean Solar Time, or, more usually, Greenwich Mean Time, arises (see Zone Standard Time p. 76).

Apparent Solar Time.

The time shown by a sundial is called Apparent Solar Time, and is affected by the two causes mentioned, which make the length of a solar day not uniform. It differs from Mean Solar Time by the Equation of Time which is given in the second column of page 2 for each month, with a precept for its use.

The Astronomical Day.

For purposes of Astronomy the day formerly began at noon, and the hours following noon were numbered successively from 0 to 23. A change was made in 1925, and the Astronomical Day now begins at midnight, the hours being numbered from 0 to 23 as has been the practice in this Almanack since 1921. The letters G.M.T. now specify Time of this system, but the letters U.T. (Universal Time) are sometimes added to distinguish from the earlier system. (See p. 4.)

Sidereal Time.

A sidereal day is the duration of a complete rotation of the Earth round its axis with reference to the stars and begins at any place when the First Point of Aries is on that meridian (see p. 57). In observatory practice time is measured, and the standard clock is regulated, by this rotation of the Earth with respect to the stars, and Mean Solar Time is derived from Sidereal Time by computation. The error and rate of the sidereal clock are found by observing the instant it shows when certain stars, known as Clock Stars, cross the meridian, and comparison of this with

the known time of transit (star's R.A.) will give the error of the sidereal clock. Comparison of the mean solar clock with the sidereal clock will show the error of the former. The same result might be arrived at directly by observing the instant by the Mean Time clock when the stars cross the meridian.

The rule for finding the Mean Time of transit of any object from its Right Ascension, or, what is the same thing, of converting Sidereal into Mean Time may be stated thus:—*From the given Right Ascension or Sidereal Time subtract the Sidereal Time at the preceding Noon, and further diminish the result at the rate of 10 secs. per hour, or by the Table on p. 57. If the R.A. should be smaller than the S.T. at noon, 24h. must be added. The final result will be the mean time reckoned from noon, to which 12h. must be added to convert into G.M.T. as now used.*

Ex.—At what time will Sirius cross the meridian on March 15?

R.A. of Sirius + 24h.	H. M. S.
Sid. Time at Mean Noon (subt.)	30 41 53
	23 29 20
	7 12 33
Retardation from p. 57	1 11

	7 11 22
G.M.T. (U.T.) of Southing	19 11 22

It will be noted that it might have been necessary to use the Sidereal Time at Noon for March 14.

Mean Time may be converted into Sidereal Time by reversing this process, or otherwise by taking out the G.M.T. of the zero of the Sidereal clock which precedes that to be converted, making use of col. 9 on page 2 of the month; e.g. :—

G.M.T. (U.T.) March 15	H. M. S.
From Col. 9, p. 11	19 11 22
	12 30 35

Interval of Mean Time	6 40 47
Acceleration from p. 57 (add) ...	0 1 6

Corresponding Sidereal Time ...	6 41 53
---------------------------------	---------

Summer Time.

Following are the periods in which Summer Time has been used since its adoption. (See note, p. 17.)

1916.	May 21d. 2h. to Oct. 1d. 2h.
1917.	April 8d. 2h. to Sept. 17d. 2h.
1918.	Mar. 24d. 2h. to Sept. 30d. 2h.
1919.	Mar. 30d. 2h. to Sept. 29d. 2h.
1920.	Mar. 28d. 2h. to Oct. 25d. 2h.
1921.	April 3d. 2h. to Oct. 3d. 2h.
1922.	Mar. 26d. 2h. to Oct. 8d. 2h.
1923.	April 22d. 2h. to Sept. 16d. 2h.
1924.	April 13d. 2h. to Sept. 21d. 2h.
1925.	April 19d. 2h. to Oct. 4d. 2h.

The hour being Greenwich Mean in each case.

The Act now in force applies to Great Britain, Northern Ireland, the Channel Islands, and the Isle of Man. (See p. 78, note.)

The scheme has been adopted in other countries. In France the dates of the beginning of the period in the successive years 1916 to 1925 have been June 15, March 25, March 10, March 2, Feb. 15, March 15, March 26, May 27, March 30 and April 5 (inclusive); the dates of ending, October 1, 7, 6, 5, 25, 26, 8, 7, 5 and 4, these not being included in the period. In 1923 a law was passed on May 24, fixing the period for France and Algeria as from 23h. on the last Saturday in March to 24h. on the first Saturday in October, subject to future alteration.

In the year 1880 it was enacted by statute that the word "time," when it occurred in any legal document relating to Great Britain, was to be interpreted, unless otherwise specifically stated, as the Mean Time of the Greenwich meridian.* Other nations similarly used the time of their own capital, but since the year 1883 the system of Standard Time by Zones has been gradually accepted, and now nearly all the countries of the world use as Standard the Time of some meridian which differs from that of Greenwich by a multiple of 15°, and therefore differs from Greenwich Mean Solar Time by an integral number of hours, either fast or slow. In a few cases differences including a half hour have been adopted.

The Standard Time adopted in various countries is given below. In the United States and Canada five different standard times are used, these large territories being divided into zones approximately 7½° on either side of five central meridians, the towns and cities near the dividing lines adopting which of the times is the more suitable to railway or local requirements. Brazil is divided into three zones in which the times 3, 4, and 5 hours slow on Greenwich are standard respectively.

Fast or Slow on Greenwich Time.

- | | | |

States and Florida, Costa Rica,
Salvador, Honduras. |
| 7 | " S.... | Mountain Zones of Canada and the
United States. |
| 8 | " S.... | British Columbia, California,
Nevada, Oregon, Washington. |
| 9 | " S.... | Yukon, Sitka. |
| 10 | " S.... | Low Archipelago, Marquesas, Aus-
tral and Society Is., Alaska. |
| 10½ | " S.... | Hawaiian or Sandwich Is. |
| 11 | " S.... | Tutuila (Samoa). |
| 11½ | " S.... | Apia (Samoa). |

In the Tonga or Friendly Islands the time 12h. 20m. fast on Greenwich is used: though the longitude of these islands is about 17h. 40m. West of Greenwich, the Date line (see below) passes to the East of them. The time of Aden 2h. 59m. 54s. fast on Greenwich is standard in Aden and British Somaliland.

The time 2 hours fast on Greenwich is called East-European, that 1 hour fast is called Mid-European. The time, 4 hours slow on Greenwich, has been called Maritime, Inter-Colonial, or Atlantic Time. The times used in the other zones of the North American continent are called respectively Eastern, Central, Mountain, and Pacific Time.

THE DATE OR CALENDAR LINE.

The line where the change of date occurs as adopted by the British Admiralty is a modification of the 180th meridian, and is drawn so as to include islands of any one group on the same side of the line, or for political reasons. The line is indicated by joining up the following eight points:—

- | | |
|-----|--------------------------|
| (1) | Lat. 60° S., long. 180°. |
| (2) | 51½° S., long. 180°. |
| (3) | 45½° S., long. 172½° W. |
| (4) | 15½° S., long. 172½° W. |
| (5) | 5° S., long. 180°. |
| (6) | 48° N., long. 180°. |
| (7) | 52½° N., long. 170° E. |
| (8) | 65° N., long. 169° W. |

Then through the centre of Bering Strait to a point lat. 70° N., long. 180°.

THE AGE OF THE EARTH.

VARIOUS estimates have been made of the Age of the Earth, but scientific investigation shows that dates for the "Creation of the World," such as the year 4004 B.C. as adopted by Archbishop Ussher from scriptural chronology, or 3760 B.C. as is said by the Jews, are quite untenable. From the assumption that the Sun's heat is sustained solely by contraction of its bulk Lord Kelvin deduced 20,000,000 years as the time during which it has existed, but this period is too short to be accepted by geologists as the age of the Earth. The discovery of radio-active substances brought a new factor into consideration, and it has been lately estimated that as *the abode of life* (Lord Rayleigh, *Brit. Assoc.*, 1921) a moderate multiple of 1,000,000,000 years is the possible and probable duration of the earth's crust.

GEOLOGICAL PERIODS.

- I. AZOIC ("Without Life"), containing no trace of life in any form. The duration of this period probably far exceeded that of all the remaining divisions together.
 - II. Eozoic ("Dawn of Life"), characterized by the first appearance of animal life.
 - III. PALÆOZOIC ("Old Life") or PRIMARY, containing traces of extinct animal life :—
 - i. *Cambrian*, exemplified in Wales (Cambria), Cumberland, etc.—the earliest group which possesses a connected suite of fossils.
 - ii. *Ordovician*, exemplified in North Wales and named after the ancient British tribe (Ordovices) inhabiting the region.
 - iii. *Silurian*, named after the ancient British inhabitants (Silures) of S.E. Wales.
 - iv. *Devonian* or *Old Red Sandstone*, from the prevalence of the system as a marine formation in Devonshire.
 - v. *Carboniferous*, including *Coal Measures*, *Millstone Grit* and *Mountain Limestone*.
 - vi. *Permian*, from the Russian province of *Perm*, where these strata are widespread.
 - IV. MESOZOIC ("Middle Life") or SECONDARY, with intermediate forms of animal life :—
 - i. *Triassic*, from the three (tri-) divisions of the type formation in Germany.
 - ii. *Jurassic*, typically displayed in the *Jura Mountains*.
 - iii. *Cretaceous*, from the *chalky* nature of its representatives where first studied.
 - V. CAINOZOIC ("New Life") or TERTIARY, containing forms of existing life :—
 - i. *Eocene*, the dawn or beginning of new forms of life, i.e., existing species.
 - ii. *Oligocene*, containing a few still existing species.
 - iii. *Miocene*, containing a minority of existing species—less than 50 per cent.
 - iv. *Pliocene*, the fossil remains show a majority of still existing species.
 - VI. QUATERNARY ("Fourth in Order") or POST-TERTIARY :—
 - i. *Pleistocene* or *Glacial*, the greatest number of the remains are those of still existing species. Period of last Great Ice Age.
 - ii. *Recent* or *Post-Glacial*.
- Definite dates cannot be assigned to most periods, but G. de Geer has shown that scarcely 9,000 years ago the site of Stockholm was beneath the ice-sheet (VI. i.). Traces of human life are first found in V. iv. (See also col. ii.)

THE ANTIQUITY OF MAN.

Pithecanthropus erectus (Erect Ape-man).—Remains of a skull and of a thigh bone were found in 1891 and 1892 by Professor Dubois, at Trinil, Java. These are held to be remains of a creature of Pliocene times (see Geological Period, col. i.), about midway between the Orangutan and Man in development.

Australopithecus Africanus (Erect Man-ape).—A skull was discovered in a limestone deposit at Taungs (Western Cape Colony), in 1925, by Professors Dart and Young of Witwatersrand University. In connexion with this discovery, Sir A. Keith, F.R.S., has declared that traces of human life may yet be discovered in Miocene times (see col. i., v., iii.).

Homo Heidelbergensis (The Heidelberg Man).—A lower jaw was discovered near Mauer, Heidelberg, in 1907. This is held to be that of a primitive man of the earliest Pliocene Period. The difficulty of assigning dates to the Heidelberg or Trinil remains is shown in the conflict of authority, as one estimate gives 140,000 years (Rutot) for the whole, and another gives 700,000 years (Sturge) for a portion only of the Pliocene Period.

The Piltdown Skull (Eo anthropos, or Primitive Man).—Discovered in 1912 at Piltdown, Sussex, and ascribed to primitive man of early Paleolithic times.

Neanderthal Man.—Remains of a skull and parts of a skeleton found in 1859 in the Neanderthal Ravine, near Düsseldorf, Rhenish Prussia, and others found at Spy, Belgium, in 1884, are held to represent the oldest known dolichocephalic (long-headed) race in Europe, living about 50,000 years before the Christian Era. In 1925 a similar skull was found near Tagbha, Palestine.

Homo Primigenius.—Discoveries of interred human remains at Combe Capelle, Dordogne, France (1909), at Brix and Brunn, Moravia, and at Galle Hill, Northfleet, Kent (1895) are held to be those of human beings of late Paleolithic times, from 35,000 to 15,000 B.C.

STAGES OF CIVILIZATION.

The terms employed by ethnologists refer to periods, not of time, but of culture, and are of local application only, there being no universal synchronous sequence in all parts of the world. Races of Europe, Asia and America had reached the Iron Age of development long before the 18th century, A.D., while races in Oceania were still in the Paleolithic (or at least Neolithic) stage at the time of Cook's voyages.

The Stone Age.—The ancestors of primitive man are held to have adopted the use of stones of a suitable size for defence, while primitive man made such instruments more effective by sharpening them to a rough point. The earliest period is known as *Eolithio* (or Dawn of the Stone Age), and this period may have extended to 600,000 years B.C. Weapons of a later period, known as *Paleolithic* (or Old Stone Age), show gradual developments, from the chipped, leaf-shape forms, known as *Chellean* (from Chelles, Seine et Marne, France), and employed, perhaps, from 400,000 to 100,000 B.C., to later and more effective flint points, arrow heads and spear-heads, flat on one side, known as *Mousterian* (from Le Moustier, where many such implements and other remains were

found). The Mousterian period is held to have lasted until about 10,000 B.C., when *Neolithic* (or New Stone Age) weapons, polished and less crudely fashioned, were brought into use for a further period of about 5,000 years. In the Stone Age the burial of the dead was influenced by the primitive nature of the implements available for digging, the graves being only large enough to contain a body huddled together in a cramped position.

Cultivation of the Soil.—Cultivation is believed to have followed the interment of the dead about 10,000 B.C., and rendered possible the political (*polis* = city) organisation of mankind. There appears to have been a definite centre of Western Civilization at *Nippur* (and elsewhere in Iraq) no later than 6,000 B.C., and in *Egypt*, under the first of the Pharaohs (Menes), about 5,000 B.C. It is not yet known if a similar degree of Eastern civilization had been reached in China, or elsewhere, during (or before) that of Iraq and Egypt.

The Bronze Age.—Intercommunication of races introduced a knowledge of the malleable properties of copper, while the spread of commerce distributed tin from Saxony and Cornwall among the races of Europe and Asia. Implements and utensils of cast bronze superseded those of stone, wood, horn or bone. The designs and decorations suggest that this stage of culture was introduced into Europe from Asia, and it must therefore be dated for the East far earlier than for the West, over a period ranging from 5,000 to 2,000 B.C. The Bronze Age appears to have been marked by the cremation of human remains, in place of mere burial in a constricted position.

The Iron Age.—Implements of cast bronze were in turn superseded by those of hammered iron at varying dates—in China, Chaldaea, Assyria and Egypt about 4000 B.C.; in South-Eastern Europe about 2000 B.C., spreading over the rest of Europe from 1000 B.C. to 100 A.D., by which time the use of hammered iron was known throughout Scandinavia and in Ireland. It is possible that the Eastern civilization discarded the use of bronze and adopted that of iron even before the West had reached the Bronze Age, and while the remoter parts were still in the Palaeolithic Age. With the Iron Age was re-introduced interment of human remains, in place of Bronze Age cremation, but the bodies were laid at full length in the ground and not huddled up as in the Stone Age.

EPOCHS AND CALENDARS.

Abyssinian.—The Ethiopians have a chronological system which starts from the first day of the reign of the Roman Emperor Diocletian and proceeds in cycles of 532 years, commencing at 1 again upon the completion of each cycle. Their first year began on 29th August, 284 A.D. (See also "Coptic," *post*.)

Armenian.—The Armenians marked their secession from the Greek Church by adopting it as their epoch. This corresponds to 9th July, 552 A.D.

Assyrian or Babylonian.—In the eighth century B.C. the Babylonians commenced a chronology with the era of the founder of their Empire. Their epoch corresponds to 26th February, 747 B.C.

Biblical.—The Christians of Western Europe made many calculations concerning the date of

the Creation of the World, based upon the genealogical tables in the Old Testament. In the seventeenth century (1650) James Ussher, Archbishop of Armagh, published his *Annales Veteris Testamenti*, and *Ussher's Notation* was afterwards printed in marginal notes to the Authorised Version of the English Bible. Ussher's Notation placed the Creation of the World in 4004 B.C.

Christian.—In the chronological system known as the Christian, now in use, the years are distinguished by cardinal numbers before or after the Incarnation, the period being denoted by the letters B.C. (Before Christ) or, more rarely, A.C. (*Ante Christum*), and A.D. (*Annus Domini*), the conventional abbreviation A.D. signifying *Anno Domini*, "in the year of the Lord." The correlative dates of the epoch are the 4th year of the 194th Olympiad, the 753rd year from the Foundation of Rome, 3761 A.M. (Jewish Chronology), and the 4714th year of the Julian Period. This was introduced into Italy in the sixth century, and though first used in France in the seventh it was not universally established there until about the eighth century. It has been said that the system was introduced into England by St. Augustine (A.D. 596), but was probably not generally used until some centuries later. It was ordered to be used by the Bishops at the Council of Chelsea, A.D. 816. The actual date of the birth of Christ is said to have been 4th April of the year 4 B.C.

Coptic.—In the Coptic Calendar, which is used by part of the population of Egypt and Ethiopia, the year is made up of 12 months of 30 days each, followed, in general, by 5 complementary days. Every fourth year is an Intercalary or Leap-year, and in these years there are 6 complementary days. The Intercalary year of the Coptic Calendar immediately precedes the Leap-year of the Julian Calendar. The Era is that of Diocletian or the Martyrs, the origin of which is fixed at A.D. 284, August 29 (Julian date). A Coptic Calendar for the year 1642 and part of 1643 is appended:—

Year 1642.	A.D. 1925.	Year 1642.	A.D. 1926.
Tūt	Sept. 11	Būnah	June 8
Bābah	Oct. 11	Abīb	July 8
Hātur	Nov. 10	Masrī	August 7
Kihak	Dec. 10	Complement-	
	A.D. 1926.	ary days ...	Sept. 6-10
Tubah	Jan. 9	Year 1642.	
Amshir	Feb. 8	Tūt	Sept. 11
Barmahāt	March 10	Bābah	Oct. 11
Barmūdāh	April 9	Hātur	Nov. 10
Bashuns	May 9	Kihak	Dec. 10

Hindu.—In addition to the Muhammadan reckoning there are four eras used in India. The principal astronomical system was the *Kaliyuga-ga Era*, which appears to have been adopted in the fourth century A.D. It began on 18 February, 3102 B.C. The chronological system of Northern India, known as the *Vikrama Samvat Era*, prevalent in Western India, began on 23 February, 57 B.C. The year 1926 A.D. is, therefore, the year 1983 of the Vikrama Era. In Southern India, the *Saka Era*, with its epoch of 3 March, A.D. 78, was probably founded by Kanishka (whose sway was widely extended), and is in general use. The year 1926 A.D. is 1848 of the Saka Era. In the Hills, the *Saptarshi Era* dates from the moment when the Saptarshi, or saints, were translated and became the stars of the Great Bear in 3076 B.C.

There are many obsolete eras in the history of the Indian Peninsula. The principal religious systems of chronology were those of the Buddhists and the Jains. The Buddhists reckoned from the death of Buddha in 543 B.C. (the actual date being 487 B.C.); and the epoch of the Jains was the death of Vardhamana, the founder of their faith, in 527 B.C.

Jewish.—The Jews hold that the world was created at the time of the Autumnal Equinox in the year 3760 B.C. or year 554 of the Julian Period, and the epoch or starting point of Jewish Chronology corresponds to October 7 B.C. 3761. Thus the year 1926 A.D. is *Annus Mundi* 5686-7 in the Jewish Calendar. A calendar for 5686-5687 is appended:—

(A.M. 5686 and part of A.M. 5687.)

A.M. 5686.		A.D. 1925.
Tishri	1 Rosh Hashanah (New Year)	Sept. 19
"	2 " and day ...	" 20
"	3 Fast of Gedaliah	" 21
"	10 Yom Kippur (Day of Atone- ment).	" 28

Tebet	1 New Moon	" 6*
"	10 Fast of Tebet	" 15

* The previous day is also observed as the New Moon.

Note.—All Jewish Sabbaths and Festivals begin the previous evening at Sunset.

Muhammadian.—The Muhammadan Epoch is based on the Hegira or Flight of Muhammad from Mecca to Medina. The first day of the Era is not the actual day of the Flight but is 16th July, 622 A.D. This Calendar is purely lunar. The year consists of 12 months of 30 or 29 days alternately, the last being sometimes 30, and is therefore either 354 or 355 days in length. It follows that the Muhammadan year begins earlier year by year, according to Gregorian dates, by 10, 11 or 12 days. The year 1926 is therefore 1344-5 of the Hegira, a calendar for which year is appended:—

Year of Hegira	A.D. 1925.
1344.	
Muharram	July 22
Saphar	August 21
Rabia I.	September 19
Rabia II.	October 17
Jomada I.	November 19
Jomada II.	December 17
	A.D. 1926.
Rajab	January 15
Shaaban	February 14
Ramadan	March 15
Shawall	April 14
Dulkaada	May 13
Dulheggia	June 12

1345.	
Muharram	July 12
Saphar	August 11
Rabia I.	September 9
Rabia II.	October 9
Jomada I.	November 7
Jomada II.	December 7

Olympiads.—Greek chronology was reckoned in cycles of four years corresponding with the periodic Olympic Games held on the plain of Olympia, in Elis, once in four years; the intervening years being the first, second, &c., of the Olympiad, which received the name of the victor at the Games. The first recorded Olympiad is that of Choroebus, 776 B.C.

Persian.—The chronology of Persia, which is still followed by the Parsees of India, dates from the accession of Yazdegerd III. to the throne on 10th June, 632 A.D. The year 1926 is, therefore, 1295 of the Parsees. The New Year begins on 21st March.

Roman.—Roman historians adopted as an epoch the Foundation of Rome, which is believed to have happened in the year 753 B.C., and the ordinal number of the year in Roman reckoning followed by the letters A.U.C. (*Anno Urbis Condite*). The Calendar as we know it is a Roman institution, established by Romulus, who is said to have used a year of ten months of varying length, which developed into the famous Julian Calendar, and by a slight alteration became the Gregorian now in general use. In the Roman (Julian) Calendar the days of the month were not counted onward from the beginning, as with us, but three fixed points were taken, and the intervening days were said to be so many days before the next coming point. These three points were (1) the Kalends, by which name the first of each month was known; (2) the Nones (nine days before the Ides, the first and last being counted) which fell on the seventh day of the month in March, May, July, and October, and on the fifth day in each of the other months; and (3) the Ides, which fell either on the 13th or 15th, and thus divided the month nearly equally. The Latin equivalent of Dec. 31, for example, was *Prædie Kalendas Januariæ*, and the day before that *ante diem tertium Kalendas*.

CHRONOLOGICAL TERMS.

The Day, Week and Month.—Measurements of time are based on the times taken by the earth to rotate on its axis; by the moon to revolve round the earth; and by the earth to revolve round the sun. From these which are not commensurable, certain average or mean intervals have been adopted for ordinary use. Of these the first is the *Day*, which begins at midnight and is divided into 24 hours of 60 minutes, each of 60 seconds. The hours are counted from midnight up to 12 at noon, and again from noon up to 12 at midnight, except when the *Twenty-four Hour* reckoning is employed. The 24-hour reckoning ignores A.M. and P.M., and the hours are numbered 0 to 23 from midnight to midnight.

For the *Astronomical Day* see p. 77.

The *Week* is a period of 7 days.

The *Month* in the ordinary calendar is approximately the twelfth part of a year, but the lengths of the different months vary.

The *Equinoctial or Tropical Year* is the time that the earth takes to revolve round the sun from equinox to equinox, which is 365.2422 mean days. The *Calendar Year* consists of 365 days, but a year the date of which is divisible by 4, without remainder, is called *Leap Year* and consists of 366 days. The last year of a century is not leap year unless its number is divisible by 400 (e.g. the years 1800 and 1900 had only 365 days).

Old and New Style.—In the Julian Calendar the centennial years were all leap years, and for this reason towards the close of the sixteenth century there was a difference of 10 days between the tropical and calendar years (see above). In 1582 Pope Gregory ordained that Oct. 5th should be called Oct. 15th, and that every fourth end-century year only should be a leap year (see above). This change was adopted by Italy, France, Spain, and Portugal in 1582; by Prussia, the German Roman Catholic States, Switzerland, Holland, and Flanders on Jan. 1, 1583; Poland 1586, Hungary 1587, the German and Netherland Protestant States and Denmark 1700, Sweden (gradually) by the omission of eleven leap days, 1700–1740, the British Dominions (which included the then North American Colonies) in 1752, by the omission of eleven days (Sept. 3 being reckoned as Sept. 14). This “Gregorian” Calendar was adopted by Japan in 1872, China in 1912, Bulgaria in 1915, Turkey and Soviet Russia in 1917, by Yugo-Slavia and Rumania in 1919, and by Greece in February, 1923. The Russian, Greek, Serbian and Rumanian Churches did not abandon the Julian Calendar until May, 1923, when the Gregorian, slightly modified, was adopted. The difference between the Old and New Styles was 11 days after 1700, 12 days after 1800, and has been 13 days since 1900.

New Year's Day.—In England in the seventh century, and as late as the thirteenth, the year was reckoned from Christmas Day, but in the twelfth century the Anglican Church began the year on the 25th March, which practice was also adopted generally in the fourteenth century. The Civil year in the British Dominions (exclusive of Scotland) began with “Lady Day” until 1751. But in and since 1752 the civil year has begun with Jan. 1. Certain dividends are payable at the Bank of England on the Old Style Quarter Days, and the “Financial Year” is still reckoned as beginning on “Old Lady Day,” April 5.

Scotland in 1600 changed New Year's Day from Mar. 25 to Jan. 1. On the Continent, Jan. 1 was adopted as the first day of the year by Venice in 1522, Germany in 1544, Spain, Portugal and the Roman Catholic Netherlands in 1556, Prussia, Denmark and Sweden in 1559, France 1564, Lorraine 1579, Protestant Netherlands 1583, Russia 1725, Tuscany 1751.

Golden Number.—In the year 432 B.C. Meton, an Athenian astronomer, found that 235 Lunations are very nearly, though not exactly, equal in duration to 19 Solar Years, and hence that after 19 years the Phases of the Moon will recur on the same days of the month. This discovery was held to be of so great importance that the dates of Full Moon in a cycle of nineteen years were inscribed in figures of gold on public monuments in Athens. The Cycle of nineteen years is called the *Metonic Lunar Cycle*, and the number showing the position of a year in the Cycle is called the *Golden Number* of that Year.

Easter-Day is the first Sunday after the full moon which happens upon, or next after the 21st day of March; and if the full moon happens upon a Sunday, Easter-day is the Sunday after. This definition is contained in an Act of Parliament (24 Geo. II., cap. 23, p. 751), and further explanation is given in the preamble to the Act which speaks of “Tables and rules for finding the times of the Full Moon on which this dependeth that have been prepared.” These are the tables whose essential points are given in the early pages of the Book of Common Prayer. The Moon referred to is not the real moon of the heavens, but a hypothetical Moon on whose “Full” the date of Easter depends, and the lunations of this “Calendar” Moon consist of twenty-nine and thirty days alternately with certain necessary modifications to make the date of Full agree as nearly as possible with that of the Moon of the heavens. The artificial Moon is accounted to be full on the fourteenth day, i.e., thirteen days after the New Moon, in order to be consistent with an early Jewish practice, but this point is immaterial. The Full Moon of the Calendar on which Easter depends is called the *Paschal Full Moon*.

A proposed reform of the calendar that would cause Easter-day to fall on a fixed date has received strong support. (See p. 12.)

Epact.—The age of the calendar Moon on Jan. 1 in each year, formerly used in determining the date of Easter.

Solar Cycle.—A period of twenty-eight years, in any corresponding year of which the days of the week recur on the same days of the month.

Julian Period.—“A period of 7980 Julian years, proposed by Joseph Scaliger in 1582 as a universal standard of comparison of chronology, consisting of the product of the number of years in the solar and lunar cycles and the cycle of the indiction $28 \times 19 \times 15$.”

The day of the Julian Period is used in astronomy, and begins at noon.

Roman Indiction.—A period of fifteen years, instituted by the Emperor Constantine in A.D. 313 for fiscal purposes.

The *Dominical Letter* is one of the letters A–G which are used to denote the Sundays (Lord's Day) in successive years. If the first day of the year is a Sunday the letter is A; if the second, B; the third, C; and so on. Leap year requires two letters, the first for Jan. 1–Feb. 29, the second from March 1–Dec. 31.

THE *Superficial Area* of the Earth is estimated to be 196,550,000 square miles, of which 55,500,000 square miles are Land and 141,050,000 square miles Water. The *Diameter* of the Earth at the Equator is 7,926½ English miles, and at the Poles 7,900 English miles. The *Equatorial Circumference* is 24,901·8 English miles, divided into 360 Degrees of Longitude, each of 69·17 English (or 60 Geographical) miles; these Degrees are measured from the Meridian of Greenwich, and numbered East and West of that point to meet in the Antipodes at the 180th Degree. Distance North and South of the Equator is marked by Parallels of Latitude, which proceed from zero (at the Equator) to 90° at the Poles.

AREA AND POPULATION.

Continent.	Area in Square Miles.	Estimated Population.
Europe	3,750,000	475,000,000
Asia	17,000,000	1,013,000,000
Africa	11,500,000	143,000,000
North America...	8,000,000	146,000,000
South America...	6,800,000	64,000,000
Oceania	3,450,000	8,500,000
Polar Regions ...	5,000,000	...
	55,500,000	1,849,500,000

The British Dominions extend over the largest area (14,220,000 sq. miles); Russia is the second largest country (8,000,000 sq. miles); France is third, with 4,336,000 sq. miles; China extends over 4,300,000 sq. miles; the United States, with its Insular Jurisdiction, &c., covers 3,750,000 sq. miles, and Brazil 3,220,000 sq. miles.

THE RACES OF MANKIND.†

The Races of Mankind are divisible according to Stock or, less scientifically, according to Colour. The Dominant Colour is Yellow—the numerical order being (1) Yellow, (2) White, (3) Black, (4) Brown, (5) Red. The main Divisions of the Races are as follows:—

Division.	Area.	Estimated Number.
Mongolian	Asia	680,000,000
Caucasian	Europe & Orient	725,000,000
Negro	Africa	210,000,000
Semitic	North Africa ...	100,000,000
Malayan	Oceania, &c. ...	104,500,000
Red Indian, &c.	America	30,000,000
		1,849,500,000

* The Earth is a *Sphere*, with a Northern and Southern *Hemisphere*; the Ocean surface is the *Hydrosphere*, and the gaseous envelope the *Atmosphere*, of which the lower layers are the *Troposphere* and the upper the *Stratosphere*. The science concerned with the study of the Earth's crust is *Geology*, with the measurement of its surface *Geodesy*; the study of its surface is *Geography*, and of its superficial features *Physiography*. The study of the hydrosphere is *Oceanography*, of the lakes *Limnology*, and of the mountains *Orography*, of the Races of Mankind *Ethnology*, of their location *Ethnography*, of extinct organic life *Paleontology*, and of existing life *Biology*.

An airship with a constant speed of 100 miles an hour would take nearly 105 years to reach the Sun. The velocity of a given point of the Earth's surface at the Equator exceeds 1,000 miles an hour (24,901·8 miles in 24 hours); the Earth's velocity in its orbit round the Sun is about 66,600 miles an hour (584,000,000 miles in 365 days, 6 hours, 9 minutes).

† It has been estimated that the Earth can maintain a population of 6,000,000,000, a total which will be reached about A.D. 2100, at the present rate of increase.

THE LARGEST CITIES.

(500,000 inhabitants.)

LONDON (Greater), England (1921) ...	7,476,168
New York (Greater), U.S.A. (1925) ...	6,103,384
BERLIN, Prussia (1925)	4,000,000
PARIS, France (1921)	3,000,000
Chicago, U.S.A. (1920)	2,701,705
TOKIO, Japan (1917)	2,270,000
MOSCOW, Russia (1913)	2,000,000
VIENNA, Austria (1914)	1,842,000
Philadelphia, U.S.A. (1920)	1,823,779
BUENOS AIRES, Argentina (1918)	1,722,000
Osaka, Japan (1917)	1,633,000
PEKING, China (1917)	1,300,000
Calcutta, India (1921)	1,263,292
Canton, China	1,250,000
BUDAPEST, Hungary (1910)	1,200,000
WARSAW, Poland (1913)	1,000,000
Bombay, India (1921)	1,172,953
RIO DE JANEIRO, Brazil (1910)	1,160,000
Glasgow, Scotland (1921)	1,034,069
Constantinople, Turkey (1912)	1,000,000
Detroit, U.S.A. (1920)	992,678
Hamburg, Germany (1910)	931,000
SYDNEY, New South Wales (1911)	926,400
Birmingham, England (1921)	919,438

Liverpool, England (1921)	803,118
CAIRO, Egypt (1917)	800,000
Cleveland, U.S.A. (1920)	796,836
St. Louis, U.S.A. (1920)	772,897
MADRID, Spain (1920)	750,000
Boston, U.S.A. (1920)	748,060
Baltimore, U.S.A. (1920)	733,826
Manchester, England (1921)	730,551
MELBOURNE, Victoria (1917) ..	708,000
ROME, Italy (1921)	700,000
Naples, Italy (1915)	698,000
PRAGUE, Czechoslovakia (1922) ..	680,000
COPENHAGEN, Denmark (1922) ..	670,000
Milan, Italy (1915)	663,000
Amsterdam, Netherlands (1918) ..	644,000
Shanghai (China)	639,000
Kobe, Japan (1922)	637,000
Montreal, Canada (1921)	618,506
Munich, Bavaria (1910)	596,000
Kioto, Japan (1922)	591,000
Leipsic, Saxony (1910)	590,090
Pittsburgh, U.S.A. (1920)	588,343
Barcelona, Spain (1910)	587,000
Los Angeles, U.S.A. (1920)	576,673
Marseilles, France (1911)	551,000
DRESDEN, Saxony (1910)	548,000
Lyons, France (1911)	524,000
Madras, India (1921)	522,951
Toronto, Canada (1921)	521,893
Cologne, Prussia (1910)	517,000
Breslau, Prussia (1910)	512,000
Buffalo, U.S.A. (1920)	506,775
San Francisco, U.S.A. (1920) ..	506,676
Rotterdam, Netherlands (1918) ..	501,281
LISBON, Portugal (1920)	500,000
BANGKOK, Siam (1909)	450,000

OCEAN AREAS AND DEPTHS.

The greatest ocean depth is the Trench of the Marianas, 32,089 feet in the Pacific Ocean. The second deepest is the Porto Rico Trench, 31,366 feet in the Atlantic Ocean. The third deepest is the Sunda Trench, 28,550 feet in the Indian Ocean. The fourth deepest is the North Polar Trench, 22,968 feet in the Arctic Ocean. The fifth deepest is the Kailash Trench, 13,422 feet in the Indian Ocean. The sixth deepest is the Kailash Trench, 13,422 feet in the Indian Ocean. The seventh deepest is the Kailash Trench, 13,422 feet in the Indian Ocean. The eighth deepest is the Kailash Trench, 13,422 feet in the Indian Ocean. The ninth deepest is the Kailash Trench, 13,422 feet in the Indian Ocean. The tenth deepest is the Kailash Trench, 13,422 feet in the Indian Ocean.

Ocean	Area, sq. miles	Depth, feet
Arctic	5,956,000	32,089
Atlantic	31,366,000	31,366
Indian	28,550,000	28,550
Pacific	22,968,000	22,968
South Atlantic	13,422,000	13,422
Caribbean	1,990,000	1,990
Pola Deep	1,245,000	1,245
Kailash Trench	852,000	852
Kailash Trench	480,000	480
Kailash Trench	472,000	472
Kailash Trench	405,000	405
Kailash Trench	365,000	365
Kailash Trench	221,000	221
Kailash Trench	178,000	178
Kailash Trench	158,000	158

THE HIGHEST MOUNTAINS.

The highest mountain peaks are the Himalayas, the Andes, and the Alps. The Himalayas are the highest mountains in the world, with peaks over 29,000 feet high. The Andes are the second highest mountains in the world, with peaks over 28,000 feet high. The Alps are the third highest mountains in the world, with peaks over 28,000 feet high.

Mountain	Height, feet
Himalayas	29,000
Andes	28,250
Alps	28,166
Himalayas	27,803
Andes	27,790
Alps	25,248
Himalayas	24,633
Andes	23,025
Alps	21,480
Himalayas	20,498
Andes	20,244
Alps	20,300
Himalayas	19,720
Andes	19,612
Alps	19,539
Himalayas	19,500

Sumatra (Dutch-Neth.)	Indian	12,000
Sumatra (Dutch-Neth.)	Indian	10,000

THE LONGEST RIVERS.†

River	Ocean	Length, in miles
Amazon	Atlantic	4,000
Nile	Mediterranean	3,600
Yangtze	North Pacific	3,400
Yellow	Arctic Sea	3,300
Mississippi	Gulf of Mexico	3,160
Missouri	Mississippi River	3,000
Yangtze	Arctic	3,000
Lena	Arctic Sea	3,000
Niger	Gulf of Guinea	3,000
Ob	Arctic Sea	2,700
Hoangho	North Pacific	2,600
Amur	Arctic	2,500
Parana	Atlantic	2,450
Volga	Caspian Sea	2,400
Macenzie	Beaufort Sea	2,300
La Plata	South Atlantic	2,300
Yukon	Beaufort Sea	2,000
Amazon	Mississippi	2,000
Macenzie	Amazon	2,000
St. Lawrence	Gulf of St. Lawrence	1,800
Rio de la Plata	Gulf of Mexico	1,800
Danube	Black Sea	1,725
Eufrates	Persian Gulf	1,700
Indus	Arabian Sea	1,700
Brahmaputra	Bay of Bengal	1,680
Zambesi	Indian Ocean	1,600
Ganges	Bay of Bengal	1,500

† The most famous river falls are Niagara, between the Province of Ontario and New York state; the Niagara River; the Victoria Falls on the Zambesi River; Iguaçu, between Argentina and Brazil; and the series of falls in the Yosemite Valley in California.

THE LARGEST SHIPS.

Ship.	Tons.	Dimensions (ft.)
(a) <i>Majestic</i> (r)	56,551	915 × 100 × 58

Steamers of less than 100 tons gross, and Sailing vessels of less than 100 tons net, are not included.
 Vessels trading on the Caspian Sea, and Wood vessels trading on the Great Lakes of North America, are not included.
 Japanese Sailing vessels are not recorded in Lloyd's Register Book.
 In the absence of satisfactory information most of the sailing vessels belonging to Greece, Turkey and Southern Russia are also omitted.

The League of Nations.

THE League of Nations came into being when the Treaty of Peace with Germany was ratified on January 10, 1920. Its Charter, containing 26 Articles, is known as the *Covenant*, which begins with the following words:—

"The High Contracting Parties, in order to promote international co-operation and to achieve international peace and security by the acceptance of obligations not to resort to war, by the prescription of open, just and honourable relations between nations, by the firm establishment of the understanding of international law as the actual rule of conduct among Governments, and by the maintenance of justice and a scrupulous respect for all treaty obligations in the dealings of organised peoples with one another, agree to this Covenant of the League of Nations."

The Covenant of the League contains fundamental clauses on the prevention and settlement of disputes. These clauses bind nations who are members of the League not to employ force for the settlement of a dispute until they have first submitted it to the League of Nations (or to arbitrators or to judges), waited at least 6 months for the award or decision, and then allowed at least three more months to elapse. "They are debarred," said the Right Hon. Herbert Fisher, "from the tiger's spring."

The *Membership* of the League comprises at present 55 nations, the British Empire and the Dominions (including the Irish Free State, together with India) being each an independent member, with separate voting power and representation. The only three great countries which hold aloof are America, Germany and Russia; and they, particularly America, are co-operating with the League in a number of beneficent activities.

ORGANISATION OF THE LEAGUE.

The *Assembly* meets annually at Geneva on the first Monday in September, and consists of 3 representatives from every Member State, each State having one vote.

The *Council* meets normally four times a year. Great Britain, France, Italy and Japan are permanent members, and at present 6 other States are annually elected as temporary members. In September, 1924, Belgium, Brazil, Czecho-Slovakia, Spain, Sweden and Uruguay, were elected.

The *Secretariat* is the permanent Civil Service of the League, at Geneva, and is composed of nationals of nearly all Member States.

Secretary-General, Hon. Sir Eric Drummond, K.C.M.G., C.B. (*British*).

Under Secretaries-General, J. Avenot (*French*), B. D. Attolico (*Italian*), Inazo Nitobé (*Japanese*).

Political Section, D. Joseph Mantoux (*French*), *Director*.

Information Section, Pierre Comert (*French*), *Director*; Arthur Sweetzer (*American*), *Assistant Director*.

Legal Section, J. A. Van Hamel (*Netherlands*), *Director*.

Financial Administration, Sir Herbert B. Ames (*Canadian*), *Director*.

The *Technical Organisations and Commissions*, which act as expert advisers to the Council and Assembly, are continually handling questions concerning International Communication and Transit, Economics and Finance, Health, Mandates, and the Reduction of Armaments.

The *Permanent Court of International Justice*, consisting of eleven Judges and four Deputy Judges, chosen for their high legal and moral authority, sits at the Hague and deals by means of opinions and judgments with all disputes regarding International Law, breaches of International obligations, and the interpretation of treaties. The usual annual session begins on June 15.

The *International Labour Office* is closely connected with the League, but has a parallel organisation of its own at Geneva, which was also set up by the Peace Treaty. The International Labour Organisation contains delegates from employers and workers as well as from Governments. The Governing body represents twelve States, of which eight (including Great Britain, Canada and India) are chosen as being of chief industrial importance in the world. The main object in view is to bring up the standard of labour in the less advanced States to the level of the standard in countries where greater progress has been made. It is being attained by means of Conventions and Recommendations. There have already been over 120 ratifications by Governments of these labour Conventions. The Director of the International Labour Office is Albert Thomas (*French*), the Deputy-Director H. B. Butler (*British*). There is a London office at 26 Buckingham Gate, S.W.1.

Cost.—At present the League costs about £900,000 annually; to which Great Britain contributes in round figures £87,000.

WHAT THE LEAGUE HAS DONE.

The work of the League is many-sided. It includes the prevention of a number of wars, the creation of the Permanent Court at the Hague as an alternative for war, positive reconstruction as in the case of the financial restoration of Austria and Hungary, improvements in international traffic and health, progress in real control of the traffic in drugs and in women and children. After four years' continuous study of the problem of the Reduction of Armaments the League has produced a comprehensive plan resting on the three principles of Arbitration, Security and Disarmament. This plan is now before the Governments for ratification.

LEAGUE OF NATIONS UNION.

LEAGUE OF NATIONS UNION, 15, Grosvenor Crescent, S.W. 1.—*Joint Presidents*, Viscount Grey of Fallodon, K.G., and Viscount Cecil of Chelwood, K.C.; *Chairman of Executive Committee*, Prof. Gilbert Murray, LL.D.; *General Sec.*, J. C. Maxwell Garnett, C.B.E., sc.D.

NOTES.—† Died in office. § Assassinated. (a) Elected as Vice-President.

GEORGE III. was the eldest son of Frederick, Prince of Wales (eldest son of George II.), and of Princess Augusta (youngest daughter of Frederick II., Duke of Saxe-Gotha Altenburg). His Majesty was born at Norfolk House, St. James's Square, June 4, 1738; succeeded to the Throne Oct. 25, 1760; married Princess Charlotte (daughter of Charles, Duke of Mecklenberg-Strelitz); and was crowned with her on Sept. 22, 1761. The government was carried on, from Feb. 5, 1811, until the death of King George III., by his eldest son George, under the title of *Prince Regent*. King George III. died at Windsor, Jan. 29, 1820, his issue being:—

1. GEORGE IV. George Augustus Frederick, *Prince of Wales*, born Aug. 12, 1762, married Princess Caroline of Brunswick, succeeded to the Throne, Jan. 29, 1820, and died without surviving issue June 26, 1830.

2. Frederick, *Duke of York and Albany*, born Aug. 16, 1763, married Princess Frederica of Prussia, was for many years Commander-in-Chief of the Army, and died without issue Jan. 5, 1827.

3. WILLIAM IV. William, *Duke of Clarence*, born Aug. 21, 1765; was Lord High Admiral of England; married July 11, 1818, Adelaide, daughter of George, Duke of Saxe-Meiningen, by whom he had two daughters, who predeceased him; succeeded to the Throne, June 26, 1830, and died June 20, 1837.

4. Charlotte, *Princess Royal*, born Sept. 29, 1766, married Frederick, King of Württemberg, and died without issue.

5. Edward, *Duke of Kent*, born Nov. 2, 1767, married Princess Victoria (daughter of Francis, Duke of Saxe-Coburg, and widow of Charles, Prince of Leiningen), died Jan. 23, 1820. Their Royal Highnesses had issue a daughter, Princess Victoria, born May 24, 1819, who succeeded to the Throne as QUEEN VICTORIA, June 20, 1837.

6. Augusta, born Nov. 8, 1768, died unmarried Sept. 22, 1840.

7. Elizabeth, born May 22, 1770, married Frederick, Landgrave of Hesse, and died without issue Jan. 10, 1840.

8. KING OF HANOVER. Ernest, *Duke of Cumberland*, born June 5, 1771, married Frederica (daughter of Frederick V., Grand Duke of Mecklenberg-Strelitz), succeeded as King of Hanover June 20, 1837 (on death of William IV., owing to the exclusion of Queen Victoria by the provisions of the Salic Law), died Nov. 28, 1851.

9. Augustus, *Duke of Sussex*, born Jan. 27, 1773, died without succession April 24, 1843.

10. Adolphus, *Duke of Cambridge*, born Feb. 24, 1774, married Princess Augusta (daughter of Frederick, Landgrave of Hesse), see below.

11. Mary, born April 25, 1776, married William Frederick, *Duke of Gloucester*, died without issue April 30, 1857.

12. Sophia, born Nov. 3, 1777, died unmarried May 27, 1848.

13. Octavius, born Feb. 23, 1779, died May 3, 1783.

14. Alfred, born Sept. 22, 1780, died Aug. 26, 1782.

15. Amelia, born Aug. 7, 1783, died unmarried Nov. 2, 1810.

DESCENDANTS OF H.R.H. ADOLPHUS, DUKE OF CAMBRIDGE, born Feb. 24, 1774, died July 8, 1850.

1. H.R.H. Prince George, *Duke of Cambridge*, born March 26, 1819, Field-Marshal, Commander-in-Chief of the British Army, 1856-1895, died without succession March 17, 1904.

2. H.R.H. Princess Augusta, born July 19, 1822, married the Grand Duke of Mecklenberg-Strelitz.

3. H.R.H. Princess Marie Adelaide, born Nov. 27, 1833, married H.H. Francis, Duke of Teck, died Oct. 27, 1897, her issue being:—

(1) H.S.H. Princess Victoria Mary Augusta Louisa Olga Pauline Claudine Agnes (QUEEN MARY), Col.-in-Ch. 13th/18th Hrs., born at Kensington Palace, May 26, 1867, married July 6, 1893, H.R.H. ANNUITIES TO THE ROYAL FAMILY.

The annuities payable to Their Majesties and to the members of the Royal Family are known as the *Civil List*, which is granted by Parliament upon the recommendation of a Select Committee. The Civil List of King Edward VII. amounted to £470,000, in addition to which annuities to other members of the Royal Family accounted for an additional annual sum of £106,000. The Select Committee appointed on June 14, 1910, reported on July 7, and made recommendations, which were adopted by the House of Commons. These recommendations, as modified by subsequent events, are as under:—

Their Majesties' Privy Purse	£110,000
Salaries of Household	125,800
Expenses of Household	193,000
Works	20,000
Royal Bounty	13,200
Unappropriated	8,000

£470,000

Queen Alexandra	£70,000
Duke of York	25,000
Princess Louise (Duchess of Argyll)	6,000
Duke of Connaught	25,000
Princess Beatrice	6,000
King Edward VII.'s Daughters	18,000
His Majesty's Younger Children	13,666

£163,666

IN a broad sense this heading is commonly taken as identical with that of the House of Lords, although there are close upon 130 holders of titles of long-standing nobility who are not members of the Upper House of Parliament, their peerages being those of Scotland or Ireland. But there are about an equal number of Peers of Scotland and Ireland who possess additional titles which constitute them members of the House of Lords, these titles being in a majority of instances, though very far from all, inferior to those by which they are generally known. The full details as to each are given under his leading title, and a reference is in every case supplied under any other that he may hold, so that the table of equivalent titles formerly given in this work is no longer needed: a double index will be found in "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE."

Contractions.—S. or I. appended to the date of creation denotes a *Scottish* or *Irish* title; the further addition of a * implies that the Peer in question holds also an Imperial title, which is specified (after the name) by its more definite description as *Earl*, *Britt.*, or *U.K.* When both titles are alike, as in the case of Argyll, this star is appended to the conjoined date below, and it then denotes that such date is that of the Imperial creation. A † appended to S. or I. implies that the Peer is an elected Representative to the House of Lords. For the mark see heading to Marquesses; b. signifies born; s., succeeded; m., married; w., widower or widow; M., minor.

COMPLETE LIST OF THE PEERS.

ROYAL DUKES (3).—*Style*, His Royal Highness the Duke of —. *Addressed as*, Sir, or more formally, May it please your Royal Highness.

- 1337 Cornwall, Edward, Prince of Wales, Duke of Cornwall (1337), Scottish Duke of Rothesay (1398) K.G., P.C., b. 1894, s. 1920.

Courtesy Titles borne by Eldest Sons of Dukes, &c. 119

*From this list it will be seen that "Lord Aberdour" is the heir to the Earldom of Morton, and that "Viscount Curzon, M.P.," is the eldest son of Earl Howe; * the titles borne by second heirs are also given, e.g. Earl of Burlington, eldest son of the Marquess of Hartington, heir to the Dukedom of Devonshire; Lord Roos of Belvoir, eldest son of the Marquess of Granby, heir to the Dukedom of Rutland.*

* Precedency in Great Britain.

The Sovereign.	Secretaries of State, if of the degree of a Baron.	Younger Sons of the younger Sons of Peers.
The Prince of Wales.	Barons, in same order as Dukes.	Baronets' younger Sons.
Younger Sons of the Sovereign.	Treasurer of H.M.'s Household.	Younger Sons of Knights in the same order as their Fathers.
Grandsons of the Sovereign.	Comptroller of H.M.'s Household.	Naval, Military, and other Esquires by Office.
Sovereign's Brothers.	Vice-Chamberlain of Household.	
Sovereign's Uncles.	Secretaries of State under the degree of Baron.	
Sovereign's Nephews.	High Commissioners (see p. 52).	Women take the same rank as their husbands or as their eldest brothers; but the daughter of a Peer marrying a Commoner retains her title as Lady or Honourable. Daughters of Peers rank next immediately after the wives of their elder brothers, and before their younger brothers' wives. Daughters of Peers marrying Peers of lower degree take the same order of precedence as that of their husbands; thus the daughter of a Duke marrying a Baron degrades to the rank of Baroness only, while her sisters married to commoners retain their rank and take precedence of the Baroness. Merely official rank on the husband's part does not give any similar precedence to the wife.
Ambassadors.	Viscounts' eldest Sons.	
Archbishop of Canterbury.	Earls' younger Sons.	
Lord High Chancellor.	Barons' eldest Sons.	
Archbishop of York.	Knights of the Garter if Commoners.	
Prime Minister.	Privy Counsellors if of no higher rank.	
Lord President of the Council.	Chancellor of the Exchequer.	
Speaker of the House of Commons.	Chancellor of the Duchy of Lancaster.	
Lord Privy Seal (if of Baronial rank).	Lord Chief Justice of England.	
Five following State Officers if Dukes:	Master of the Rolls.	
(1) Lord Great Chamberlain (on duty)	President of the Probate Court.	
(2) Earl Marshal.	The Lords Justices of Appeal.	
(3) Lord Steward.	Judges of the High Court.	
(4) Lord Chamberlain.	Viscounts' younger Sons.	
(5) The Master of the Horse.	Barons' younger Sons.	
Dukes, according to their Patents of Creation:	Sons of Life Peers.	
1. Of England; 2. Of Scotland; 3. Of Great Britain; 4. Of Ireland;	Baronets of either Kingdom, according to date of Patents.	
5. Those created since the Union.	Knights Grand Cross of the Bath.	
Eldest sons of Dukes of Blood Royal.	G.C.S.I.; G.C.M.G.; G.C.L.E.; G.C.V.O.; G.R.P.	
Five above State Officers if Marquesses.	Knights Commanders of the above Orders.	
Marquesses, in same order as Dukes.	Knights Bachelor.	
Dukes' eldest Sons.	Judges of County Courts and Judges of the Mayor's and City of London Court	
Five above State Officers if Earls.	Serjeants at law.	
Earls, in same order as Dukes.	Merchants in Lunacy.	
Younger sons of Dukes of Blood Royal.	S.C.B.; C.S.I.; C.M.G.; C.L.E.; C.V.O.; C.L.E.; D.S.O.; M.V.O. (4th); O.R.E.; I.S.O.	
Marquesses' eldest Sons.	Eldest Sons of younger Sons of Peers.	
Dukes' younger Sons.	Baronets' eldest Sons.	
Five above State Officers if Viscounts.	Eldest Sons of Knights in the same order as their Fathers.	
Viscounts, in same order as Dukes.	M.V.O. (5th); M.B.K.	
Earls' eldest Sons.		
Marquesses' younger Sons.		
Bishops of London, Durham and Winchester.		
All other English Bishops, according to their seniority of Consecration.		
Five above State Officers if Barons.		

* For fuller tables (and for *Scottish and Irish Precedency*) see Introduction to "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE," a companion volume, price 25s. net.

§ A complete list, in *Alphabetical Order*, of all holders of these decorations will be found in "WHITAKER'S PEERAGE."

Companions of Honour.—C.H. (See p. 133.)

Barnes, Rt. Hon. G. N.	Farington, The Lord.	Provis, Sir Samuel Butler, K.C.B.
Burnham, The Viscount.	(Gloucester, Bishop of, D.D.)	Quinan, Kenneth Bingham.
Caine, Sir Hall, K.B.E.	Gosling, Harry, M.P.	Royden, Sir Thomas, Bt.
Carruthers, Mrs. (Miss Violet Mark-Chetwynd, The Viscount. [am].)	Haldane, Miss Elizabeth.	Ripper, Prof. William, D.Sc.
Churchill, Rt. Hon. W. S., M.P.	Keogh, Lt.-Gen. Sir Alfred, G.C.B., G.C.V.O.	Seddon, James Andrew.
Davidson, John Colin Campbell, C.B., M.P.	Kerr, Philip Henry.	Smuts, Lt.-Gen. Rt. Hon. J. C.
Davies, William John.	Landowne, The Marchioness of, G.B.E., V.A., C.L.	Strutt, Hon. Edward.
Dillon, Viscount.	Layton, Walter Thomas, C.B.E.	Swottonham, Sir Frank A., G.C.M.G.
Eiderman, Sir John Reeves, Bart.	Newbolt, Sir Henry, D.D.	Tennant, Mrs. Margaret Kath.
Evans, Sir Evan Vincent.	Parker, James.	Wardle, George James.
		Wilkie, Alexander.
		Wilson, Joseph Havelock, C.B.F.

Orders of Chivalry.

Usher of the Black Rod, Samuel Murray Power, C.B.

THE ORDER OF MERIT (1902)—O.M. Ribbon, Blue and Crimson.

This Order confers no precedence. It is designed as a special distinction for eminent men and women—without conferring a knighthood upon them. The Order is limited in numbers to 24, with the addition of foreign honorary members. Membership is of two kinds, Military and Civil, the badge of the former having crossed swords, and the latter oak leaves. Membership is assigned by the Sovereign, which is not used to follow the first class of the Order of the Bath, and to precede the letters designating membership of the inferior classes of the Bath and all classes of the remaining Orders of Knighthood.

MILITARY MEMBERS.

Admiral of the Fleet Rt. Hon. Sir Edward Hobart Seymour, G.C.B., G.C.V.O.

Admiral of the Fleet Rt. Hon. Earl Jellicoe, G.C.B., G.C.V.O., D.S.O.

Field-Marshal Rt. Hon. Earl Haig, K.T., G.C.B., G.C.V.O., K.C.I.E.

Admiral of the Fleet Rt. Hon. Earl Beatty, G.C.B., G.C.V.O., D.S.O.

Thomas Hardy, Litt.D., LL.D.

Rt. Hon. Sir George Otto Trevelyan, Bart.

Sir Edward Elgar, Mus. Doc.

Sir Joseph John Thomson, F.R.S.

Rt. Hon. Viscount Haldane, K.T.

Rt. Hon. Earl of Balfour, K.G.

Rt. Hon. David Lloyd George.

Sir James Matthew Barrie, Bart., LL.D.

Sir Charles Scott Sherrington, G.B.E., M.D.

Sir James George Frazer, F.R.S.

Sir Ernest Rutherford, F.R.S.

CIVIL MEMBERS.

HONORARY MEMBERS.

Admiral Count Togo.

Field-Marshal (Marshal of France) Ferdinand Foch.

Marshal of France Joseph Jacques Césaire Joffre.

Secretary and Registrar, Hon. Sir Harry Julian Stonor, K.C.V.O.

THE MOST HONOURABLE ORDER OF THE BATH (1399).

Ribbon, Crimson. Trina juncta in uno. (Remodelled 1725 and 1815, and enlarged thirteen times since.)

G.C.B. Mil.

G.C.B. Civ.

K.C.B. Mil.

K.C.B. Civ.

C.B. Mil.

THE SOVEREIGN, Great Master and Principal Knight Grand Cross, Field-Marshal H. R. H. the Duke of Connaught and Strathearn, K.G., K.T., K.C.B., G.C.B., G.C.V.O., D.S.O., LL.D., F.R.S., F.R.C.S., F.R.C.S.D., F.R.C.S.E., F.R.C.S.N., F.R.C.S.O., F.R.C.S.P., F.R.C.S.R., F.R.C.S.T., Registrar and Secretary, BRIZ-GEN, Sir Douglas Dawson, G.C.B., K.C.M.G.; Genealogist, Sir H. Farman Burke, K.C.B., C.B.; Gentleman 1st class of the Scarlet Rod, Col. Sir Charles Wyndham Murray, K.C.B.; Deputy Secretary, Maj. H. H. F. Stockley, M.C., D.F.C.; Chancery, Central Chancery of the Orders of Knighthood—G.C.B., Knight Grand Cross; K.C.B., Knight Commander; C.B., Companion.

THE MOST EXALTED ORDER OF THE STAR OF INDIA (1861).

(Since enlarged eight times.) *Ribbon, Light Blue, with White Edges. Heaven's Light on Guide.*
Sovereign, THE KING-EMPEROR; Grand Master, and First and Principal Knight Grand Commander, The Viceroy and Governor-General of India; Secretary (in India), J. P. Thompson, C.S.I.; Registrar, The Secretary of the Central Chancery of the Orders of Knighthood—for the time being; G.C.S.I., Knight Grand Commander; K.C.S.I., Knight Commander; C.S.I., Companion.

THE MOST DISTINGUISHED ORDER OF ST. MICHAEL AND ST. GEORGE (1818).

Ribbon, Saxon Blue, with Crimson Centre. Auspicious motto: ari.
The Sovereign, Grand Master, H.R.H. the Prince of Wales, K.O., G.M.B.E., M.C.; Prelate, Rt. Rev. Henry Hutchinson Montgomery, D.C.; Chancellor, The Rt. Hon. Earl Buxton, P.C., G.C.M.G.; Secretary, Sir James E. Macterton-Smith, K.C.B.; King of Arms, Sir F. A. Swettenham, G.C.M.G., C.B.; Registrar, Sir H. C. M. Lambert, K.C.M.G., C.B.; Gentleman 1st class of the Blue Rod, Sir Reginald L. Antrobus, K.C.M.G., C.B.; Chancery, Colonial Office, S.W.—G.C.M.G., Knight Grand Cross; K.C.M.G., Knight Commander; C.M.G., Companion.

THE MOST EMINENT ORDER OF THE INDIAN EMPIRE (1878).

(Since enlarged eight times.) *Ribbon, Imperial Blue. Imperatrix auspicious.*
Sovereign, THE KING-EMPEROR; Grand Master, The Viceroy and Governor-General of India for the time being; Secretary (in India), J. P. Thompson, C.S.I.; Registrar, The Secretary of the Central Chancery of the Orders of Knighthood—for the time being; G.C.I.E., Knight Grand Commander; K.C.I.E., Knight Commander; C.I.E., Companion.

THE ROYAL VICTORIAN ORDER (1896).

Ribbon, Blue, with Red and White Edges.

The Sovereign; Chancellor, The Lord Chamberlain; Secretary, The Keeper of His Majesty's Privy Purse; Registrar, Sir Francis M. Bryant, C.V.O., C.B.E., I.O.—G.C.V.O., Knight Grand Cross; K.C.V.O., Knight Commander; C.V.O., Commander; M.V.O., Member, marked 4th or 5th Class.

THE MOST EXCELLENT ORDER OF THE BRITISH EMPIRE (1917).

Ribbon, Purple (Civil Division); Purple, with narrow vertical Red Centre Stripe (Military Division).

The Sovereign; Grand Master, H.R.H. the Prince of Wales; Prelate, Rt. Rev. the Bishop of London; King of Arms, Gen. Rt. Hon. Sir Arthur H. F. Paget, G.C.B., K.C.V.O.; Registrar, The Secretary of the Central Chancery of the Orders of Knighthood for the time being; Secretary, The Permanent Secretary to the Treasury; Gentleman 1st class of the Purple Rod, Sir Frederic G. Keay, C.B.E., K.C.M.G. For services rendered to the Empire, whether at home or abroad, open to both men and women. G.B.E., Knights Grand Cross or Dames Grand Cross; K.B.E., Knights Commanders; D.B.E., Dames Commanders; C.B.E., Commanders. O.B.E., Officers; M.B.E., Members. The Order was divided into Military and Civil divisions in Dec., 1918.

THE KNIGHTS BACHELOR.

The Knights Bachelor do not constitute a Royal Order, but comprise the surviving representation of the ancient State Orders of Knighthood. The Register of Knights Bachelor, instituted by James I. in the 17th century, lapsed, and in 1908 a voluntary association under the title of "The Society of Knights" (now "The Imperial Society of Knights Bachelor" by Royal command) was formed with the primary objects of continuing the various registers dating from 1255 and obtaining the uniform registration of every created Knight. An annual Knightage is published from information supplied by the authorities, and can be obtained on application. The Officers of the Society are: *Principal, Sir William Bull, Bt., M.P.; Vice-Principal, Commander Sir Trevor Dawson, Bart., M.C.; Hon. Registrar, Sir Park Giff, M.P.; Clerk, Hubert Wheelburn; Registry and Library, The College of Arms, Queen Victoria Street, E.C. 4.*

ORDER OF THE COMPANIONS OF HONOUR (1917)—C.H.

Ribbon, Carmine, with Gold Edges.

This Order consists of one Class only and carries with it no title or precedence, but ranks after the 1st Class of the Order of the British Empire (i.e., Kts. and Dames Grand Cross (Mil. and Civ. Div.). The number of awards is limited and is open to both sexes.

THE DISTINGUISHED SERVICE ORDER (1886)—D.S.O.

Ribbon, Red, with Blue Edges.

Bestowed in recognition of special services in action of commissioned officers in the Navy, Army and Royal Air Force. The members are Companions only and rank immediately before the 4th Class of the Royal Victorian Order. A Bar may be awarded for any additional act of service.

THE IMPERIAL SERVICE ORDER (1902, enlarged 1912)—I.S.O.

Ribbon, Crimson, with Blue Centre.

Restricted to members of the administrative or clerical (clerk) branches of the Civil Service and consists of the *Sovereign, the Prince of Wales, and Companions* (not exclusively male) to a number not exceeding 700, of whom 250 may belong to the Home Services, 200 to the Indian (200 European and 100 Indian) and 250 to the services of Dominions, Colonies and Protectorates.

THE ROYAL ORDER OF VICTORIA AND ALBERT (for Ladies)—V.A.

Ribbon, White Moiré.

Instituted in 1862, and enlarged in 1864, 1865, and 1880, but no fresh conferments are now made.

THE IMPERIAL ORDER OF THE CROWN OF INDIA (for Ladies)—C.I.

Instituted 1878.

Ribbon, Light Blue, with White Edges.

N.B.—For other Decorations and Medals see pp. 152-5.

134 Knights Grand Cross, Knights Grand Commanders, and Knights Commanders

OF THE BATH, STAR OF INDIA, ST MICHAEL AND ST. GEORGE, INDIAN EMPIRE,
ROYAL VICTORIAN ORDER AND KNIGHTS AND DAMES OF THE BRITISH EMPIRE

For Knights Bachelor, see pp. 146-151.

Adams, Sir John, l.d.
Adams, Sir John Cooile.
Adamson, Sir John E., m.g.
Aikins, Hon. Sir James A.M.
Aird, Sir John.
Airey, Sir Edwin.
Alcazar, Sir Hy. Albert, k.c.
Alexander, Sir Sidney R.
Alexan, Sir H. Montagu, c.v.o.
Allen, Sir Ernest K., c.b.e.
Allen, Sir Harry B., m.d.
Allen, Sir Hugh P., m.s.d.
Allen, Sir Thomas Wm.
Allison, Sir Robert Andrew.
Allom, Sir Charles Carrick.
Alston, Sir Charles Ross.
Ambalawanan Kanagasabai, Sir.
Ames, Sir Herbert Brown.
Anderson, Sir Alex. Jas., c.s.i., v.d.
Anderson, Sir Hugh Kerr, p.d.
Anderson, Sir Robert N.
Anderson, Sir Wm. M. A., m.v.
Andersson, Sir Charles Llewellyn, o.b.i.
Anderton, Sir Francis Robt.
Andrews, Prof. Sir Fredk. William, o.b.e., m.d., f.r.s.
Angier, Sir Theodore V. S.
Anuppu Parasuramadas Pappu Garu, *Rao Bahadur*, Sir.
Anthony, Sir John.
Appley, Sir Alfred.
Arbutnot, Sir Geo. Gough.
Armstrong, Sir Charles H.
Arnold, Sir Thos. Walker, c.i.e.
Ashbolt, Sir Alfred Henry.
Ashdown, Sir Curtis George.
Ashley, Sir William J.
Aspinall, Sir J. Audley F.
Asbury, Hon. Sir John Meir.
Atcherley, *Maj.-Gen.* Sir Ulewellyn William, c.m.g., c.v.
Atkin, Rt. Hon. Sir J. Richard.
Atkins, Sir Ivor A., m.s. doc.
Atkinson, Sir Wm. Nicholas, f.s.o., l.t.d.
Atlay, Sir Wilfrid.
Austin, Sir Herbert.
Avery, Hon. Sir Horace E.
Ayling, Hon. Sir Wm. Bock.
Ayyar, Sir T. Jheagaraya.
Ayyar Sasudava.
Bailey, Sir Rowland, c.b., f.s.o., m.v.o.
Baines, Sir Athelstane, c.s.i.
Baines, Sir Frank, c.v.o., c.b.e.
Baker, Sir John, m.d.
Baker, Sir Wm. Frederick.
Baldwin, Sir Harry, c.v.o.
Balfour, Sir Graham.
Ball, Sir Albert.
Ballantyne, Sir Henry.
Bam, Sir Pieter Canizius van Blommestein Stewart, o.b.i.
Banarji, Sir Pranada Charan.
Banatvala, Col. Sir Homas.
Beechcroft, c.s.i., l.m.s.
Bancroft, Sir Squire B.
Banerji, Sir Allston Rajkumar, c.s.i., c.i.e.
Bankes, Rt. Hon. Sir John Eldon.
Barber, Sir E. Fairless.
Barclay, Sir Thomas, l.m.s.
Barker, *Capt.* Sir D. Wilson.
Barker, Sir Herbert A.
Barker, Sir Rayner Child, c.i.e.
Barnes, Sir Frederic Gorell.
Barnett, *Maj.* Sir Richd. W., m.p.
Barnley, *Brig.-Gen.* Sir John, v.d.
Barr, Sir James, c.b.e., m.d.
Barran, Sir Rowland H.
Barratt, Sir Albert.
Barrow, Sir Alfred, o.b.e.
Barrow, Sir Samuel.
Barth, Sir Jacob William, c.i.e.
Barthorpe, Sir Fredk. Jas.
Barton, Lt.-Col. Sir Hy. B.
Barton, Sir John George, c.b.
Barton, Sir William.
Batechelor, Hon. Sir Stanley.
Bates, Rt. Hon. Sir R. Dawson, o.b.e.
Bateson, Hon. Sir Alexander Dingwall.
Batten, Sir John Kaye.
Baxter, Sir George W.
Bayer, Sir Horace.
Beachcroft, Sir Charles Porten.
Beachcroft, Sir Melville.
Beaman, Sir Frank C. O.
Beard, Sir Lewis.
Beattie, Sir William A.
Beattie, Sir John Carruthers.
Beauchamp, Sir Harold.
Beaufort, Sir Leicester P.
Beaumont, Hon. Sir William Henry.
Beck, Sir A. Cecil T.
Beck, Sir Raymond.
Becker, Sir Fredk. E. R.
Bedford, Lt.-Col. Sir Charles H., l.l.d., l.m.s.
Begbie, Sir James.
Beharrel, Lt.-Col. Sir John Geo., d.g.o.
Bell, Sir Ernest A. S., c.i.e.
Bell, Sir James, c.v.o.
Bell, Sir James.
Bellhouse, Sir Gerald, o.b.e.
Bencraft, Sir Henry W. R.
Bennett, Sir Courtenay R., c.i.e.
Bennett, Sir F. Sowerby.
Bennett, Sir Henry Honeywood Curtis, k.c., m.p.
Benson, Sir Frank R.
Benson, Sir J. Hawtrej, m.d.
Berry, Sir Geo. Andraas, m.p.
Berry, Sir James, f.r.c.s.
Bertram, *Maj.-Gen.* Sir Alexander.
Bertram, Hon. Sir Anton, k.c.
Bethell, Sir Thomas Robert.
Bhandari, *Rai Bahadur* Sir Gopal Das, c.i.e., m.b.e.
Bhatwadekar, Sir Bhalchandra Krishna.
Biffen, Sir Rowland H., f.r.s.
Bigger, Sir Edward Coey.
Biggs, *Maj.* Sir Arthur W.
Binning, Sir Arthur Wm.
Binod, Chandra Mitra, Sir.
Bird, Sir Harry.
Bird, Sir Henry Busby.
Bird, Sir William E. M.
Birke, Sir Thomas W.
Biron, Sir Hy. Chartres.
Black, Sir Arthur Wm.
Blackier, Sir Geo. F., c.b.e., m.d.
Blain, Sir Herbert Edwin, c.b.e.

THE GRAND PRIORY OF THE ORDER OF THE HOSPITAL OF ST. JOHN OF JERUSALEM IN ENGLAND.

(INCORPORATED BY ROYAL CHARTER.)

THE Order had its origin in Jerusalem and Acre, as an International lay confraternity for the relief of Crusaders, and was later sovereign in Rhodes and Malta, where its Knights kept galleys and galleons to attack the Barbary Corsairs and to prevent the spread of Turkish rule in the Mediterranean, from 1530 to 1798. The work of the British Order is the control of the St. John's Association Ambulance and Brigade, and of the Ophthalmic Hospital, Jerusalem. The Chapter general consists of Knights of Justice and selected Chaplains, Knights of Grace and Esquires; there are also Ladies of Justice and Ladies of Grace. These distinctions are notified in the *London Gazette*, but do not confer any rank or title. The ribbon of the decorations of the Order is black.

Sovereign Head and Patron THE KING-EMPEROR.
 Grand Prior H.R.H. The Duke of Connaught, K.G.
 Sub-Prior The Viscount Knutsford, G.C.M.G.

EXECUTIVE OFFICERS.

Chairman—The Archbishop of York.
 Chancellor—Lt.-Gen. Sir Aylmer Hunter-Weston, K.C.B., D.S.O., M.P.
 Secretary-General—Maj.-Gen. Sir Percival S. Wilkinson, K.C.M.G., C.B.
 Receiver-General—Col. Francis Pixley, V.D.
 Director of the Ambulance Department—Maj.-Gen. Sir Percival S. Wilkinson, K.C.M.G., C.B.
 Chairman of the British Ophthalmic Hospital, Jerusalem—Col. Sir Courtauld Thomson, K.B.E., C.B.
 Almoner—Capt. A. C. Seton-Christopher.
 Librarian—Col. Edwin J. King, C.M.G., F.S.A.
 Registrar—Charles G. Kekewich.
 Genealogist—Sir Henry F. Burke, K.C.V.O., C.B.

NEW ZEALAND CROSS.—N.Z.C.

Ribbon, Crimson: FOR CONSPICUOUS BRAVERY: INSTITUTED 10 March, 1869.

Biddle, Benjamin	10 March, 1869	Lingard, William	10 March, 1869	Prece, George	10 March, 1869
Hill, George	10 April, 1869	Mace, Francis Joseph	10 March, 1869	Roberts, J. Mackintosh	10 March, 1869

OTHER DECORATIONS AND MEDALS.

Regulations regarding the wearing of Orders, Decorations and Medals will be found in WHITAKER'S ALMANACK.

The Distinguished Service Cross.—1914.—D.S.C.—In substitution for the Conspicuous Service Cross, 1901: is designed for bestowal on all officers of the R.N. below the rank of Lieutenant-Commander, and on Warrant Officers.

The Military Cross.—1915.—M.C.—Awarded to Captains, Lieutenants, and 2nd class Warrant Officers in the Army and Indian and Colonial Forces.

The Distinguished Flying Cross.—1918.—D.F.C.—Designed for bestowal upon Officers and Warrant Officers in the Royal Air Force for acts of gallantry when flying in active operations against the enemy.

The Air Force Cross.—1918.—A.F.C.—Instituted as preceding, but for acts of courage or devotion to duty when flying, although not in active operations against the enemy.

The Military Medal.—1916.—M.M.—Awarded to non-commissioned officers and men for individual or associated acts of bravery in the field. In exceptional circumstances the Medal may be awarded to women of all nations.

The Distinguished Service Medal.—1914.—D.S.M.—Is designed for chief petty officers, petty officers, men, and boys of all branches of the R.N.; to non-commissioned officers and men of the R.M.A.; and to all other persons holding corresponding positions in His Majesty's Service abroad, for distinguished conduct in war.

The Distinguished Flying Medal.—1918.—D.F.M.—and the **Air Force Medal.**—A.F.M.—for warrant and non-commissioned officers and men for equivalent services as for D.F.C. and A.F.C.

The Conspicuous Gallantry Medal.—C.G.M.—Is bestowed upon warrant officers and men of the R.N.

The Distinguished Conduct Medal.—D.C.M.—Awarded to warrant officers, non-commissioned officers, and men of the Army.

The Volunteer Officers' Decoration.—V.D.—Was an honour for rewarding the meritorious services of officers

of the Force in question, who must have been in commission and have served twenty years.

The Territorial Decoration.—T.D.—Established in 1908: is restricted to commissioned officers of twenty years' good service in the Territorial Army. Similarly a **Territorial Long Service Medal** has been substituted for that formerly awarded to Volunteers.

The Royal Red Cross.—R.R.C.—For ladies, founded 1883, is a distinction conferred upon ladies of any rank or nation who may be brought to the Sovereign's notice for acts of mercy in attending to the sick or wounded in time of war.

The Order of Mercy.—Both sexes: was established in 1899 in connexion with the **League of Mercy**, an institution also founded in 1899 to promote the welfare of hospitals by obtaining small subscriptions for King Edward's Hospital Fund for London, &c.

The Indian Order of Merit.—Instituted in 1837, as a reward for personal bravery, to Indian officers and men.

The Kaisar-i-Hind Medal.—Was founded in 1900, and is a reward for any person, of either sex, who shall have rendered useful service in or for India.

The Albert Medal.—A.M.—Dates from 1865, with extensions in 1867 and 1877, and is a recognition of acts of gallantry performed by any person whatever—"For Gallantry in Saving Life at Sea" or "on Land."

The King's Police Medal.—Instituted in 1909 as a reward "only for acts of exceptional courage and skill or conspicuous devotion to duty" to officers and men of any recognised Police Force or organised Fire Brigade in the United Kingdom, India, and His Majesty's Dominions beyond the Seas. The number of medals awarded in any one year shall not exceed 250.

The Royal Naval Reserve and Royal Naval Volunteer Reserve Decoration.—R.N. and Medal.—Instituted in 1920 to reward good and long service by officers and men of these Services.

His Majesty's Ministers.

THE NEW PARLIAMENT.—The Sixth Parliament of King George was opened by Royal Commission on Dec. 2, 1924, and the House of Commons at once proceeded to re-elect Mr. J. H. Whitley as Speaker, his sponsors being Lord Henry Cavendish-Bentinck and Mr. Robert Smillie, each of whom paid tributes to Mr. Whitley's ability and tact. The member for Halifax accepted the honour in felicitous terms and was conducted to the chair, after which the Prime Minister, Mr. MacDonald, Mr. Lloyd George and Mr. T. P. O'Connor added their congratulations. On the following day the King's approval of the Commons' choice was announced by the Lord Chancellor, and in both Houses the swearing-in of members was proceeded with.

THE KING'S SPEECH.—The ceremonial inauguration of the Session by the King took place on Dec. 9. His Majesty was accompanied by the Queen, and the Prince of Wales was present in the House of Lords. The Speech from the Throne, one of the longest in recent years, intimated that the Government were unable to recommend to Parliament the treaties with the Government of the Union of Socialist Soviet Republics, but hoped that normal intercourse between the two countries should not be interrupted. Reference was made to the coming visits of the Prince of Wales to South Africa and to the Argentine Republic, and it was announced that proposals based upon the recommendations of the Imperial Economic Conference would be submitted for granting further preferences on goods imported from the Empire, and that the plans already made for enlarging the Singapore naval base would be proceeded with. A bill would be submitted for safeguarding employment in efficient industries, and provision would be asked for to extend all measures likely to alleviate unemployment. Among other action indicated in the Speech a prominent place was given to measures to improve the housing situation. In the House of Lords, the Earl of Plymouth moved and Earl Spencer seconded the Address in reply, and this was agreed to after Marquess Curzon had dealt with the situation at home and abroad. In the Commons the Address was moved by Mr. R. G. Ellis and seconded by Lord Balmf. Mr. MacDonald and Mr. Lloyd George followed, the latter referring particularly to the subject of inter-Allied debts. Mr. Baldwin in reply promised that this matter should be discussed, and as to protection maintained that he stood exactly where he had done since he placed his views before the country. On the following day Mr. Churchill outlined the Government's policy on the question of inter-Allied debts, declaring it essential that any payment made by Great Britain's debtors in Europe to their creditors in the United States should be accompanied simultaneously, *pari passu*, by proportionate payment to Great Britain. A Labour amendment condemning the Government's Egyptian and Russian policy was defeated by 363 to 132 on Dec. 15, and on the following day Mr. Wheatley's amendment on the housing problem was beaten by 356 to 136, after Mr. Neville Chamberlain had surveyed the position and vindicated the achievements of private enterprise. The main discussion took place on Dec. 17 on an address moved by Captain Wedgwood-Benn on behalf of the Liberal Party, regretting that the King's speech foreshadowed the introduction of tariffs

and preference. Mr. Baldwin announced that a Safeguarding of Industries Bill would be introduced, and that an Imperial Economic Committee would be set up to consider the possibility of improving methods of preparing for market and marketing within the United Kingdom the food products of the Overseas Dominions with a view to increasing their consumption in preference to foreign imports. All the resolutions of the Imperial Conference involving reduction of duties would be included in the Budget, and while there would be no taxes on food the money equivalent of the advantages which would have been conferred would be devoted to schemes for developing the trade of the Empire. The amendment was defeated by 339 to 151, the Address was agreed to, and Parliament adjourned over Christmas.

THE SAFEGUARDING OF INDUSTRIES.—The first debate of importance after Parliament resumed on Feb. 10 concerned the Government's proposals for the safeguarding of threatened industries. It was originally intimated that a bill was under consideration, but the Government subsequently indicated their intention of proceeding without legislation. The two wings of the Opposition combined to attack this action, and on Feb. 16 Mr. MacDonald moved a resolution declaring that the policy of the Government and the methods by which it was proposed to carry that policy into effect must lead to a system of general tariffs which would not enlarge the volume of trade and safeguard the interests of the workers as regards employment, wages and conditions. In the course of his speech the Leader of the Opposition remarked that so far as his Party was concerned Free Trade was not regarded by itself as something that solved the social problem. The Prime Minister in his reply declared that he was fulfilling a pledge made to the electors. The country had decided against Protection in 1923, he said; it had preferred to go on employing the principle of the Safeguarding of Industries Act. He explained the new procedure of the Government and said this had been decided on in order that the House of Commons might be restored to its constitutional position as the taxing authority. The motion was eventually defeated by 335 to 146.

THE BUDGET.—In a long effective speech, Mr. Winston Churchill on April 28 introduced his Budget proposals which contained many notable features, the chief being a return to the Gold Standard, the reduction of the Income Tax, and the setting up of a Pension scheme. He congratulated his predecessor, Mr. Snowden, upon the accuracy of his forecast, the realised surplus of £3,659,000 being comparatively near his estimate. Announcing the return to the Gold Standard, the Chancellor pointed out that the Act prohibiting the export of gold and bullion expired at the end of the year, and the Government had decided not only to allow it to lapse, but to give the Bank of England immediately a general licence for the export of gold and bullion. This did not mean that a gold coinage would be adopted, he added. Coming to the estimates for the current year, Mr. Churchill said he put the total expenditure at £799,400,000, £3,700,000 more than the actual expenditure of 1924-25, a disappointing result which the Chancellor mainly attributed to the

changes of Government. If the country had arrived at a period of settled government and continuity of policy, a reversion to normal procedure would be indispensable. A Cabinet Committee was to be set up to overhaul blocks of recurring expenditure, in addition to the Treasury's scrutiny, and he thought they ought to aim at a net reduction in expenditure of £10,000,000 each year progressively. As to the revenue, he did not feel justified in budgeting for any substantial expansion of trade. He anticipated a total of £826,000,000 on existing taxation, a surplus of £25,600,000, without counting on payment of inter-allied debts. Coming to his new taxation proposals, the Chancellor said he proposed certain additions to the Estate Duty rates, bringing in £4,500,000 in the current year and £10,000,000 in a full year. Next he revealed a series of "Sumptuary Duties." The first was a revenue duty upon silk, natural and artificial, the basic rate being 4s. a pound of raw silk. Then came a "nakedly protective" duty of £4 a cwt. on hops. Finally in this class he reimposed the McKenna duties on imported luxuries which the Labour Government had abandoned. The total yield of this series in 1925 would be £5,730,000, and in a full year £10,000,000. This "fortification of the revenue," as the Chancellor described it, brought the surplus to £36,830,000. After outlining the main feature of the Budget—the Pensions scheme—Mr. Churchill announced that the Government would give effect to their proposals at the Imperial Economic Conference of 1923 so far as they did not involve new or additional duties upon food, and he accordingly submitted proposals for the removal of the existing duties on Empire dried fruits, for an increase in the preference on Empire tobacco from one-sixth to one-quarter of the full duty, for an increase of the preference on heavy wines from one-third to two-thirds, an increased preference on the surtax on sparkling wines from 30 per cent. to 50 per cent., and the restoration of the preference on sugar to 4s. 3d. per cwt. The loss to the revenue would be £1,470,000 in the first year and £1,720,000 in a full year. He proposed to reduce the yield of the super-tax by £10,000,000—the same sum by which the death duties were to be increased—existing rates up to £3,000 a year being halved and the relief becoming smaller upon higher incomes. To smaller income-tax payers he applied the same principle of relief. The standard rate would be reduced by 6d. while the relief accorded to earned income as against invested income would be one-sixth instead of one-tenth, with a maximum allowance of £250 against £200. Balancing his Budget the Chancellor estimated a revenue, after these alterations, of £801,060,000, reserving for contingencies the prospective surplus of £1,660,000. In conclusion he expressed the hope that by liberating the production of new wealth from some of the shackles of taxation, the Budget might stimulate enterprise and accelerate industrial revival, and that by giving a far greater measure of security to the mass of the wage earners, their wives and their children, it might promote contentment and stability and make our island more truly a home for all its people. Mr. Churchill received many compliments upon his speech, and a number of the resolutions were agreed to. On the following day Mr. Snowden declared that the Budget, shorn of the pensions scheme, would have

appeared to everybody as it really was—the worst rich man's Budget that was ever proposed. It would put on industry, in the shape of employers' contributions, a sum which he estimated at not less than fourteen millions a year. Sir Alfred Mond deplored the return to the Gold Standard and condemned the new duties. The McKenna duties were re-imposed on May 7 by majorities ranging from 156 to 161, and the hop duty and income tax resolution were passed by margins of 162. On May 11 a Labour amendment postponing the duties on the importation of silk was defeated by 331 to 165, and the Finance Bill was brought in and read a first time. The second reading was agreed to on May 25 after Liberal protests against being closed. The Committee stage opened on June 9, when amendments to reduce the tea duty to one penny a pound, and to postpone the re-introduction of the McKenna duties until January, 1926, were negatived by 274 to 149 and 250 to 144 respectively. A Government resolution placing a 33½ per cent. duty on imported lace for five years was carried by a majority of 110 on June 11, while on the following day the House rejected by 277 to 93 an amendment to postpone the provision for preferential rates on all Empire-grown tobacco, currants, dried fruits and wine, several Labour members supporting the Government. The Committee stage was completed on June 17 after a sitting of 15½ hours. The bill was read a third time on June 25, following the defeat by 298 to 92 of a Labour amendment for rejection. The Royal Assent was given on June 30 after a speech on the preceding day by the Earl of Oxford and Asquith, who described the duty on silk as possessing "a thin Protectionist flavour," and said he viewed the general financial situation, both actual and prospective, with feelings that verged on apprehension, seeing no trustworthy signs of a general revival of trade.

THE GOLD STANDARD RESTORED.—The necessary legislation to facilitate the return to a gold standard was quickly passed. The Chancellor introduced the Bill on April 29, and the second reading was secured on May 4, when Mr. Walter Guinness explained its provisions. The free export of gold was forbidden until the end of the year under the Act of 1920, he said, and while the Bill did not re-establish that free export it made the necessary provision for protecting our gold reserves and exchange position in view of the new situation which was being developed. The Bill laid down conditions in relation to the issue of gold coins, and provided that until the issue of a Royal Proclamation neither banknotes nor Treasury notes should be payable on demand in gold coins. The right of any person to tender bullion for coinage was suspended. The Treasury was given power to borrow for exchange operations, and under this arrangement two credits had already been negotiated. One had been arranged with the Federal Reserve Bank in New York, which had undertaken to give the Bank of England a revolving credit of 200,000,000 dollars for two years, and the second was an arrangement with a syndicate headed by Messrs. J. P. Morgan for a revolving credit of 100,000,000 dollars for two years. A motion by Mr. Snowden that the House could not assent to the second reading of a Bill which might aggravate the existing grave condition of unemployment and trade depression was negatived.

without a division, and on the following day the Bill passed through the Committee and was read a third time. The Upper Chamber passed the measure with little discussion, and it received the Royal Assent on *May 13*.

THE PENSIONS SCHEME.—The Government's new scheme of pensions was outlined by the Chancellor of the Exchequer when he "opened" his Budget on *April 28*, though the Bill was not introduced until later. Mr. Churchill explained that the scheme was founded on the National Health Insurance system, under which 15,000,000 people were insured. They would pay 4*d.* extra in the case of men and 2*d.* extra in the case of women, the employers paying similar additional contributions. From the tenth year the cost to the State would be £15,000,000, from the fifteenth year £20,000,000, and from the twentieth year £24,000,000, but by the thirty-fifth year the burden would decline to £21,000,000. The charges for the first ten years would be spread evenly, in instalments of £5,750,000 a year, beginning in 1926. As to the benefits the widows of all men insured in the National Health Insurance scheme who were insured in the new scheme and who died after *Jan. 4, 1926*, would receive 10*s.* a week for life, and the eldest child would receive 5*s.* and the other children 3*s.* until they reached the age of 14. All existing widows of men insured under National Health Insurance who were now mothers would receive the same pensions. This provision affected 200,000 widowed mothers and 350,000 children from *Jan. 4*. Existing and future orphan children would receive allowances of 7*s.* 6*d.* a week for the eldest and 6*s.* for the second. From *Jan. 6, 1928*, all contributors, male and female, to health insurance for five years who had paid two years' contributions under the new scheme, and were over 65 years of age or subsequently reached 65 would receive 10*s.* a week without any means test. The same benefits at 65 would be given to the widows of contributors who had entered upon pensions. The Government had decided further to sweep away the restrictions and means tests upon persons now over 70 who were insured under the Health Insurance scheme, and they would receive the right to become old age pensioners. The measure itself—the Widows, Orphans and Old Age Contributory Pensions Bill—was formally introduced by the Minister of Health on the following day, when it was read a first time. Moving the second reading on *May 18*, Mr. Neville Chamberlain explained that technical difficulties had compelled the Government to abandon the attractive plan of an all-in insurance scheme, but they had grafted the proposals on to the Health Insurance Organisation because the latter covered the greatest number of people and possessed the most suitable machinery. Mr. Wheatley moved a resolution declining to give a second reading to a Bill which imposed an additional burden on industry and exacted contributions from wage earners, but after two days' debate the amendment was rejected by 401 to 125, and the Bill was read a second time. The feature of the discussion was a speech by Sir Robert Horne, who said he had great misgivings as to the effect of the Bill upon the fortunes of the industries of the country. To burden British industry at a time when Germany was in a position of the greatest freedom, and would sell more cheaply than she would be able

to sell in the future, seemed to him to be a very bad stroke of policy if we were looking to prosperity for British trade and employment for our workers. Sir Robert appealed to the Government to devise means before the Bill came into operation whereby these new burdens on industry might be modified and thus bring some courage to the hearts of people who were carrying on now under almost superhuman difficulties. The Committee stage started on *June 30* and was completed on *July 15*, after several all-night sittings. Mr. Wheatley intimated that the Labour Party would reverse the contributory principle at the first opportunity. The remaining stages were secured easily and the Royal Assent was given on *Aug. 7*, when Parliament adjourned until *Nov. 16*.

UNEMPLOYMENT INSURANCE.—Yet another bill to amend the Unemployment Insurance scheme was brought forward and read a first time on *June 30*. Moving the second reading on *July 7*, Sir Arthur Steel-Maitland said the bill was a stop-gap measure, as on *June 30, 1926*, there would have to be further legislation, as otherwise the whole system would come to an end. The present proposal was to reduce contributions, both of masters and men by 2*d.* a week to 9*d.* and 7*d.* respectively, with a corresponding reduction in the cases of women and children. That had been rendered possible because the Chancellor of the Exchequer was prepared to contribute during the period of deficiency a sum of £3,900,000 per annum, and there would be a saving of £6,500,000 from the Insurance Fund by a discretionary power to refuse extended benefit to young men living with their families and the wives of husbands in work. Mr. Shaw moved the rejection, but this was defeated by 278 to 141, and after a stormy passage through Standing Committee the Bill was placed on the Statute Book, the Minister of Labour agreeing to postpone until *Oct. 1* the commencement of the extended waiting period, which was increased from three to six days.

PERMANENT SUMMER TIME.—The House of Commons on *March 13* gave a second reading by 289 to 63 to Col. Lambert Ward's Bill providing for the permanent adoption of Summer Time. The Government promised facilities because of the large majority, and on condition that the actual period was determined by a full vote, but it was not until *July 17* that progress was made after the Bill had been passed by a Standing Committee. On the Report stage on that day the promoters accepted a compromise with regard to the period, Summer Time starting on the third Saturday in April (instead of the first) and ending on the first Saturday in October. An amendment to make the last Saturday in September the final day was defeated by 228 to 56, and the Bill was read a third time without a division. The Peers also passed the Bill after unsuccessful attempts had been made in Committee to shorten the period, and the Royal Assent was given on *Aug. 7*.

RENT CONTROL.—Another Rent Control Bill was passed early in the Session, Mr. Neville Chamberlain, in moving the second reading on *March 11*, explaining that it was devised in accordance with the pledge given by the Prime Minister to prolong the first part of the Act of 1923 for another 2½ years. He said he hoped

that at the end of that time the conditions of housing would have been so much mitigated that it would be possible to start on the second five-year period of partial control provided for in the earlier Act. The second reading was obtained on *Mar. 25* after the defeat by 281 to 131 of an official Labour amendment, and the Bill was sent to a Standing Committee and placed on the Statute Book in *May*.

THE SALE OF HONOURS.—The House of Lords on *June 29* gave a second reading to the Honours (Prevention of Abuses) Bill, making traffic in honours a criminal offence. A similar measure had been passed by the Peers in 1923, but it was not proceeded with. The Bill having again been passed by the Upper Chamber was read a second time by the Commons on *July 24*, when Sir Douglas Hogg explained that it was designed to carry out the recommendations of the Committee set up in 1922 to advise on the procedure to be adopted by the Prime Minister on making recommendations for honours. The proposal was that any person promising to secure an honour for any pecuniary payment or other consideration, and any person promising such payment, should be liable to imprisonment or a fine. The Bill passed through Committee and was read a third time on *Aug. 4*, and three days later received the Royal Assent.

THE COAL SUBSIDY.—On the eve of the adjourn-

ment, the House of Commons discussed the action of the Government in granting a subsidy to the coal industry as the only means possible to settle the dispute between owners and miners. The Prime Minister in moving a supplementary vote of £20,000,000 "in subvention of wages," explained on *Aug. 6* the position which led to the Cabinet's decision. He said there were only two alternatives—to have a stoppage or to find a way out—and he contended that he had chosen the only honourable means of avoiding a stoppage. He had secured at a price a respite which he believed would be of immense value. If they were again confronted with such a challenge, he added, no minority in a free country had ever yet coerced the whole community. "If the time should come when the community has to protect itself, the community will do so and the response of the community will astonish the forces of anarchy throughout the world," Mr. Baldwin declared in conclusion. Mr. MacDonald expressed the hope that peace would be brought to a trade that would never be at peace until there was a living wage as a minimum and until it was organised nationally, while Mr. Lloyd George described the truce as nationalisation in its worst form. Several of the Government's supporters expressed apprehension of the subsidy but did not go the length of voting against it, and after Mr. Churchill had supported his leader, the vote was agreed to by 351 to 16.

PARLIAMENTARY MAJORITIES.

Majorities of recent Governments:—

THE UNION JACK.

FLYING THE UNION JACK.—Although there is no definite list of days on which the Union Jack should be hoisted, the rules suggested by the London County Council appear to meet with general approval. In schools administered by the London County Council, where flagstuffs are provided, the Union Jack is flown from 8 a.m. until sunset on the following days:—

April 23.—St. George's Day.
May 6.—Anniversary of the King's Accession.
May 24.—Empire Day.
May 26.—The Queen's Birthday.
June 3.—The King's Birthday.
June 4.—Do., Official celebration.
June 23.—The Prince of Wales's Birthday.
October 21.—Anniversary of Trafalgar.
December 1.—Birthday of Queen Alexandra.
 And on the occasion of the opening and closing of Parliament by the King.

LABOUR AND PARLIAMENT.

Votes recorded 1922.—Over 82 per cent. of the Electors and Electresses recorded their votes in Constituencies where the election was contested. The Electorate in such Constituencies numbered (approximately) 17,200,000, and nearly 14,110,000 votes were recorded. The Electorate in England and Wales at the General Election of 1924 was estimated at 10,719,000 men and 8,092,000 women—total 18,811,000.

PAYMENT OF MEMBERS.

Payments to Members of the Legislatures of various countries:—

Australia, £1,000 per annum.*
 Canada, \$4,000 per session.*
 France, 27,000 francs per annum.*
 Germany, 12,000 marks per annum.*
 Great Britain, £400 per annum.*
 Irish Free State, £360 per annum.*
 Italy, 15,000 lire per annum (Lower House).
 New Zealand, Upper House £315, Lower House £450 per annum.*
 South Africa, £400 per annum.*
 Sweden, 3,500 kroner per annum.*
 United States, \$10,000 per annum.*

* With allowances for travelling in addition.

† Compulsory contributions to Widows and Orphans Fund.

§ Deductions for non-attendance.

DISTRIBUTION OF SEATS

(After the Dissolution, Oct. 26, 1922.)

After the Dissolution of the Parliament elected in December, 1918, the number of Members was reduced from 707 to 615, through the decrease of Irish representation from 105 to 13 Members:—

<i>England:</i>			
London.....	62	492	
Boroughs.....	193		
Counties.....	230		
Universities.....	7		
<i>Wales and Monmouth:</i>			
Boroughs.....	11	36

WHITAKER'S ALMANACK, 1926.

AIR MINISTRY (see p. 242).**COLLEGE OF ARMS or HERALDS' COLLEGE,**
Queen Victoria Street, E.C. 4.

(See also Scottish Section.)

The Heralds' College was incorporated and endowed by Richard III. in 1484, as a College of Arms, presided over by the Earl Marshal, the other members being the then Kings of Arms, and the six Heralds, to regulate the granting and the bearing of Coat Armour, in addition to the ordinary functions of the Heralds. Their first residence was in Pulteney's Inn until the present site was granted by Queen Mary in 1554, the house being rebuilt as it now stands after destruction in the Great Fire.

Earl Marshal, His Grace the Duke of Norfolk.
Deputy Earl Marshal, Rt. Hon. Viscount FitzAlan of Derwent, K.G., P.C., G.C.V.O., D.S.O.

KINGS OF ARMS.

Garter, Sir Henry Farnham Burke, K.C.V.O., C.B., F.S.A.

SIX HERALDS.

Somer, Everard Green, F.S.A.
Cheser, Arthur William Steuart Cochrane, M.V.O.
Richmond, Gerald Woods Wollaston, M.V.O.
Winsor, Algar Henry Stafford Howard, M.C.
Lancaster, Archibald George Blomefield Russell.
York, Hon. Philip Plantagenet Cary.

FOUR PURSUIVANTS.

Portcullis, George Rothe Bellew.
Route Dragon, John Dunamace Heaton-Armstrong.
Route Croix, Henry R. C. Martin.
Bluemantle, Aubrey John Toppin.

Earl Marshal's Sec., Gordon A. de Lisle Lee, C.B.
Registrar, Arthur W. S. Cochrane, M.V.O.

CHARITY COMMISSIONERS.

Ryder Street, St. James's, S.W. 1.

The Charity Commission was appointed by Act of Parliament in 1853 "for the better administration of Charitable Trusts in England and Wales." In 1874 the powers previously exercised by the Endowed Schools Commissioners were temporarily transferred to the Charity Commission, and in 1879 the transfer was made permanent. The powers of the Commissioners over all endowments held for purely Educational purposes have now been transferred to the Board of Education in pursuance of Orders in Council made under the Board of Education Act, 1899.

Chief Commissioner, G. W. Wallace £1,500
Second Commissioner, E. Macpherson £1,000 to £1,200
Secretary, H. D. S. Leake £1,000

Senior Clerks, *I. Wortman; H. Blanks £300 to £400
Chemists, Class II, G. F. Sheppard; T. W. Harrison, B.Sc., F.I.C.; J. R. Nicholls, B.Sc., F.I.C.; C. A. Adams, B.Sc., A.I.C.; *J. E. Byles, B.Sc., F.I.C.; *F. R. Ennos, B.A., B.Sc., A.I.C.; J. Kirk, *F. B. Burls, F.I.C.; A. T. Parsons, B.Sc., A.I.C.; A. H. Rheinlander, M.Sc., A.I.C.; E. A. Nurse, B.Sc., A.I.C.; *J. Stephenson, B.Sc., A.I.C.; B. A. Ellis, M.A., A.I.C.; *A. F. Weiss, B.Sc., A.I.C.; R. Sutcliffe, M.A., A.I.C.; J. King, F.I.C.; J. A. Heald, M.C., B.Sc., F.I.C.; J. W. Pooley, B.Sc., A.I.C.; S. A. Ashmore, B.Sc., A.I.C.; C. E. Barton, B.Sc.; P. M. Mooney, B.Sc., F.I.C.; G. H. Croft, M.Sc., A.I.C.; L. C. Nickolls, M.Sc., D.I.C., A.R.C.S., A.I.C.; R. H. Settle, B.A., A.I.C.; E. H. Williams, B.Sc., A.C.C.F.C., A.I.C.; P. McGregor, B.Sc., A.I.C. £125 to £400

£125 to £400

CIVIL SERVICE COMMISSION,

Burlington Gardens, W. 1.

The Civil Service Commission was established in 1855 to apply tests of fitness for junior situations in all branches of the Civil Service. In 1890 an Order in Council applied the system of competitive examination throughout the Service. The examinations are open to all persons of the requisite age, health, character, and nationality, subject to certain restrictions. Establishment Expenses, 1925-26, £62,649.

1st Commissioner, Sir Stanley M. Leathes, K.C.B. £1,500
Assistant Commissioners, D. B. Mair (Director of Examinations); L. C. H. Weekes (Secretary) each £1,000 to £1,200
Assist. Sec., G. G. Mennell £700 to £900
Senior Clerks, T. L. Hedley; R. H. Lowther, M.B.A. £550 to £700

COLONIAL AND DOMINIONS OFFICE,

Downing Street, S.W. 1.

The business of the Colonies was, until 1801, included in the functions of the Home Secretary, to be transferred in that year to the newly-created "Secretary for War." In 1854 the outbreak of the Russian War led to the appointment of a Secretary of State for the Colonies (to relieve the War Secretary of Colonial business). The Colonial Secretary possesses an advisory power of veto on legislation of the self-governing Dominions, and is responsible for the government of the remaining Dominions beyond the Seas in inverse proportion to the amount of self-government granted to them. The salaries, &c., of the Colonial Office are estimated at £173,031 for 1924-25.

Principal Secretary of State for Dominion Affairs and for the Colonies, Rt. Hon. L. C. M. S. Amery, M.P. £5,000

Private Sec., J. A. P. Edgcombe, C.B.E.
Do. (Appointments), Major R. D. Furse, D.S.O. £700 to £800
Do. (Parliamentary), Capt. Euan Wallace, M.P. unpr.
Do. (Ceremonial and Reception), Lt.-Col. H. V. B. de Satgé, C.M.O., D.S.O.
Assist. Priv. Sec., W. C. Hankinson, M.C.
Do. (Appointments), Capt. A. F. Newbolt (£400); G. N. Irlby (£400); S. Robinson.

UNDER-SECRETARIES.

Permanent (Dominions), Sir C. T. Davis, K.C.M.G. £3,000
Private Sec., P. Liesching.
Permanent (Colonies), Brig.-Gen. Sir S. H. Wilson, K.C.M.G., K.B.E., C.B. £3,000
Private Sec., A. B. Acheson.
Parliamentary (Dominions), The Earl of Clarendon, £1,500
Private Sec., G. H. Creasy.
Parliamentary (Colonies), Hon. W. G. A. Ormsby-Gore, M.P. £1,500
Private Sec., G. E. J. Gent.
Assistant Under-Secretaries, Sir G. E. A. Grindle, K.C.M.G., C.B.; Sir J. E. Shuckburgh, K.C.M.G., C.B.; C. Strachey, C.B. £1,200 to £1,500

* At Custom House Branch.

Oversea Settlement Department.

3 and 4, Clements' Inn, W. C. 2.—(10 to 5. Sat. 10 to 1.30.)

H.M. Government have found it necessary to undertake closer responsibility in connexion with the movements of British subjects wishing to settle overseas within the Empire, or to emigrate to foreign countries than they have exercised in the past. In order to assist them in carrying out their policy they appointed a Committee at first known as "The Government Emigration Committee," now renamed "The Oversea Settlement Committee." In 1923 British migrants under the Empire Settlement Act, 1922, numbered 37,277, of whom 25,117 went to Australia, 6,145 to New Zealand, and 6,015 to Canada.

President, The Secretary of State for the Colonies. *Chairman*, The Parliamentary Under-Secretary for Dominion Affairs.

Ex-officio Members, The Parliamentary Under-Secretary of State for the Colonies; The Parliamentary Secretary of the Ministry of Labour.

Vice-Chairman, T. C. Macnaghten, C.M.G., C.B.E.

Secretary, G. F. Plant.

Finance Officer, W. Bankes Amery, C.B.E.

Chief Clerk, Malcolm Jones, O.B.E.

Imperial Institute.

South Kensington, S.W. 7.

The Imperial Institute was erected as a memorial of the Jubilee of Queen Victoria (1837-1887), and by the Imperial Institute (Management) Act of 1916 is under the management of the Secretary of State for the Colonies, assisted by an Executive Council composed of twenty-five members. The principal work of the Imperial Institute is the promotion of inter-imperial trade in raw materials, by investigations with a view to utilisation by supplying information as to sources, quality and uses, and by exhibitions illustrative of the resources of the Empire. In 1925 the *Imperial Mineral Resources Bureau* was amalgamated with the Imperial Institute. *Executive Council*, P. W. L. Ashley, C.B.; Sir Arthur Shirley Benn, K.B.E., M.P.; Sir Edward Brookman, K.C.M.G.; Sir Robert Carlyle, K.C.S.I., C.I.E.; Sir Edward Davson; A. Fiddian; Sir Gilbert Grindle, K.C.M.G., C.B.; Sir A. D. Hall, K.C.B., F.R.S.; M. F. Headlam, C.B.; Rt. Hon. Lord Kysant, C.M.G.; D. O. Malcolm; R. W. Matthew, C.M.G.; Lord Stevenson, C.M.G.; Sir Richard Threlfall, K.B.E., F.R.S.; The High Commissioners for Canada, Australia, New Zealand, South Africa and Newfoundland.

The following are the principal Committees of the Institute:—

Committee for Canada.

The Hon. P. C. Larkin (*Chairman*); J. G. Colmer, C.M.G.; Sir Robert Kindersley, C.B.E.; J. H. Plummer; Sir Keith Price.

Committee for Australia.

The Rt. Hon. Sir Joseph Cook, G.C.M.G. (*Chairman*); Sir Gordon Campbell, K.B.E.; Capt. Sir R. Muirhead Collins, K.S., C.M.G.; E. V. Reid.

Committee for New Zealand.

Col. the Hon. Sir James Allen, K.C.B. (*Chairman*); G. F. Gee; R. D. D. McLean; Alexander Michie; Sir James Mills, K.C.M.G.

Committee for South Africa and Rhodesia.

Hon. Sir Edgar Walton, K.C.M.G. (*Chairman*); A. Canham; D. O. Malcolm; C. W. S. Maude; W. Mosenthal; W. Soper, M.A.

Committee for India.

Sir Harvey Adamson, K.C.S.I. (*Chairman*); Sir Charles Arnstson; Sir Thomas Bennett, C.I.E., M.P.; Sir Manjerjee Bhownagree, K.C.I.E.; Rt. Hon. Lord Cable; Sir Robert Carlyle, K.C.S.I., C.I.E.; Rt. Hon. Lord Carmichael, G.C.S.I., C.I.E., K.C.M.G.; Sir John G. Cunningham, K.C.I.E., C.S.I.; Sir Cecil Graham; Sir Lionel Jacob, K.C.S.I.; H. H. The Maharaja-Rana of Jhalawar, K.C.S.I.; J. Wardlaw Milne, M.P.; Sir Charles Stewart-Wilson, K.C.I.E.; Sir George Sutherland.

In addition there are Advisory Technical Committees on Mineral Resources, Timbers, Silk, and Rubber, and a Committee on Raw Materials, with representatives of the Chambers of Commerce.

Acting Director and Secretary to Executive Council, H. M. Lidderdale, B.A.

COMMISSIONERS OF CROWN LANDS,

1 Whitehall, S.W. 1.

Administrative expenses, 1924-25, £24,923.

THE CROWN LANDS.—The Land Revenues of the Crown in the United Kingdom have been collected on the public account since 1760, when George III. surrendered them in return for a fixed annual payment or Civil List. At the time of the surrender the gross revenues amounted to about £89,000, and the net return to about £12,000.

In the year ended March 31, 1925, the total Receipts by the Commissioners were £1,458,107, of which amount £129,938 was from the Mines. The Expenditure (including Property Tax allowed) was £455,081. The sum of £960,000 was paid to the Exchequer in 1924-25 as Surplus Revenue, being a net sum from which no deductions have to be made for administration.

Commissioner (ex-officio), The Minister of Agriculture and Fisheries unpaid
Permanent Commissioner and Secretary, A. S. Gaye £1,200

Private Sec., H. Garside.
Assistant Commissioner, D. R. Crawford Smith £850 to £1,000

BOARD OF EDUCATION, Whitehall, London, S.W. 1.

The Government Department of Education was, until the establishment of a separate office, a Committee of the Privy Council appointed in 1839 to supervise the distribution of certain grants which had been made by

Parliament since 1834. The Act of 1899 established the Board of Education, with a President and Parliamentary Secretary, and created a Consultative Committee. The cost of administration was estimated at £450,811 in 1924-25, with £356,347 for Inspection and Examination.

THE BOARD.

The Right Hon. Lord Eustace Percy, M.P., *President* (£2,000); The Lord President of the Council; the Principal Secretaries of State; the First Lord of the Treasury; and the Chancellor of the Exchequer.

EMIGRANTS INFORMATION OFFICE

(see Overseas Settlement Committee, p. 184).

EXCHEQUER AND AUDIT DEPARTMENT,

Victoria Embankment, E.C. 4.

This is the Department of the Comptroller and Auditor General, an office created by the Act 29 & 30 Vict. c. 39 (1866) to replace, with extended powers, the separate offices of Comptroller General of the Receipt and Issue of the Exchequer and of the Commissioners for Auditing the Public Accounts. This officer is appointed by Letters Patent under the Great Seal, and is irremovable except upon an address from the Two Houses of Parliament. In his capacity of Comptroller General of the Receipt and Issue of the Exchequer he authorises all issues from the Exchequer after satisfying himself that Parliament has given authority for them. He examines the Exchequer accounts and makes an annual report on them to Parliament. In his capacity of Auditor General of Public Accounts he is charged with the duty of examining on behalf of the House of Commons the accounts of expenditure out of monies provided by Parliament, the accounts of the receipt of revenue, and generally all other public accounts, including the accounts of Government stores and of trading services conducted by Government Departments. The results of his examination of those accounts are reported to the House of Commons.

The net expenses of the Department were estimated to amount to £150,935 in 1925-26.

<i>Comptroller and Auditor General</i> , Sir Malcolm G. Ramsay, K.O.B.	£3,000

There are also 145 Auditors	

* Part-time.

ROYAL FINE ART COMMISSION.

Privy Council Office, Whitehall, S.W. 1.

Appointed in 1924 "to enquire into such questions of public amenity or of artistic importance as may be referred to them from time to time by a Department of State, and to report thereon to such Department; and furthermore, to give advice on similar questions when so requested by public or quasi-public bodies, where it appears to the said Commission that their assistance would be advantageous."

Commissioners, Sir R. Blomfield, R.A., Litt.D., F.R.A.; Sir D. Y. Cameron, R.A., LL.D.; D. Sutherland MacColl; The Earl of Crawford and Balcarres, K.T., LL.D., F.R.A. (*Chairman*); Sir G. Frampton, R.A.; J. Alfred Gatch, M.A., F.S.A., P.P.R.I.B.A.; Sir E. Lytrens, R.A.; T. H. Mawson; Sir Aston Webb, K.C.V.O., C.B., R.A.; P. S. Worthington, Litt.D., F.R.I.B.A.

Secretary H. C. Bradshaw, A.R.I.B.A.

FOREIGN OFFICE, Downing Street, S.W. 1.

The Secretaryship of State for Foreign Affairs was created in 1789, superseding the ancient Secretary for the Northern Department of Europe (as the Office had been called since 1688). He is assisted by two Under-Secretaries (one Parliamentary, the other Permanent), one Deputy Under-Secretary, and two Assistant Under-Secretaries, Legal Advisers, a Finance Officer, eleven Counsellors, a Librarian, and a staff of Clerks. The chief functions, in addition to the formal duties, are receiving and answering communications from individuals or other Government Departments, from Diplomatic and Consular Agents of this country or others, and in determining the policy of the country towards Foreign Powers. The administrative expenses of the Foreign Office were estimated at £193,170 in 1925-26.

2nd Div. Clerk, H. Jones.

Passport Officer, Liverpool, J. S. Grant £400 to £500

FORESTRY COMMISSION.

22 Grosvenor Gardens, S.W. 1.

The Forestry Commissioners were appointed under the Forestry Act (1919), and were created a Body Corporate in April 1920. The Commissioners are charged with the general duty of promoting the interests of forestry, the development of afforestation and the production and supply of timber in Great Britain. The Act transferred to the Commissioners the powers and duties of the Board of Agriculture and Fisheries, and the Board of Agriculture for Scotland, in relation to forestry, and also the powers of those Departments under the Destructive Insects and Pests Acts, 1877 and 1907, so far as those powers relate to insects or pests destructive only to forest trees and timber. The Forestry Act 1923 provided for the transfer of the Crown Woods and Forests to the Commissioners; it also cancelled the condition of repayment to which grants in respect of afforestation were subject under the Act of 1919.

The net estimated expenditure on forestry operations, &c., for the year 1925-26 was £510,000.

Chairman, Maj.-Gen. Lord Lovat, K.T., K.C.M.G., K.C.V.O., C.B., D.S.O.

Commissioners, Right Hon. F. Dyke Acland; Rt. Hon. Lord Clinton; Sir Leolin Forester-Walker, K.B.E., M.P.; Sir Hugh Murray, C.B.E.; R. L. Robinson, O.B.E.; Walter R. Smith; Col. W. Steuart-Fotheringham.

Assistant Commissioners, H. A. Pritchard, O.B.E. (England and Wales, 1, Whitehall, S.W. 1); John Sutherland, C.B.E. (Scotland, 25, Drumsheugh Gardens, Edinburgh).

Secretary, A. G. Herbert, 22 Grosvenor Gardens, S.W.

FRIENDLY SOCIETIES REGISTRY.

17 North Audley Street, W. 1.

A Barrister was appointed in 1882 to certify the Rules of Savings Banks, and in 1889 to certify those of Friendly Societies. In 1846 he was constituted Registrar of Friendly Societies. By the Friendly Societies Act, 1875, the Central Office of the Registry of Friendly Societies was created, consisting of Chief Registrar and the Assistant Registrars for England. It exercises numerous and important functions under the Friendly Societies Acts, the Industrial and Provident Societies Acts, the Building Societies Acts, the Trade Union Acts, the Workmen's Compensation Acts, the Scientific Societies Act, the Trustee Savings Banks and Post Office Savings Banks Acts, the Loan Societies Act, the Shop Clubs Act, and a great number of local and personal Acts. Under the Industrial Assurance Act, 1923, the Chief Registrar is charged with various powers and duties in relation to Industrial Assurance Companies and Collecting Societies, and in that capacity is styled the Industrial Assurance Commissioner. Net expenses, 1924-25, £45,495.

Chief Registrar and Industrial Assurance Commissioner, G. Stuart Robertson, K.C. £2,000
Private Sec., G. H. Cooper.

Assistant Registrar and Deputy Industrial Assurance Commissioner, John Fox, O.B.E. £1,000 to £1,200

Assist. Registrars, G. D. Barlow; Digby L. F. Koe £850 to £1,000

Principal Legal Assistant, M. A. Mackinnon, M.C. £550 to £700

Heads of Branches.

Legal, H. P. Harker £550 to £700

Industrial Assurance, B. K. White £550 to £700

Returns and Reports, H. C. Souther £700

Estab. and Accounts, F. W. Roberts £500 to £600

Registers & Records, T. F. Dunning £500 to £600

THE GOVERNMENT ACTUARY.

Treasury Chambers, Whitehall, S.W. 1.

Assistant Actuaries, W. T. C. Blake; R. R. Brodie; P. G. Brown; S. P. Brown; W. G. Craig; H. Freeman; O. C. J. Klage; M. B. Knowles; G. H. Maddex; A. W. Marshall; F. A. A. Menzler; G. D. Stockman £500 to £650

Staff Clerk, W. Johnson £400 to £500

GOVERNMENT HOSPITALITY FUND.

6 Whitehall Gardens, S.W. 1.

The Government Hospitality Fund was instituted in 1908 for the purpose of organizing official hospitality on a regular basis, with a view to the promotion of international goodwill.

Minister, The Viscount Peel, C.B.E.

Secretary, E. E. Beare, C.B.E.

MINISTRY OF HEALTH,

Whitehall, S.W. 1.

This Department was established by the Ministry of Health Act, 1919, to exercise in England and Wales powers with respect to Health and Local Government, and to it were transferred by the Act, subject to certain provisos (a) all the powers and duties of the Local Government Board, the Insurance Commission and the Welsh Insurance Commission; (b) the powers of the Board of Education relating to the health of expectant and nursing mothers and children under five, and to the medical

inspection and treatment of children and young persons; (c) all the powers of the Privy Council and of the Lord President of the Council under the Midwives Acts, 1902 and 1908, and the powers hitherto exercised by the Secretary of State under Part I of the Children Act, 1908. There may also be transferred to the Minister certain specified powers and any other powers and duties in England and Wales of any Government Department which appear to relate to matters affecting or incidental to the health of the people.

Minister, Rt. Hon. Arthur Neville Chamberlain, M.P.

Private Secretary, Douglas Veale £5,000

Medical Adviser, J. Smith-Whitaker, M.R.C.S.
Secretary, W. F. Wackrill, O.B.E.

GENERAL REGISTER OFFICE

(ENGLAND AND WALES),

Somerset House, W.C. 2.

The Registration of Births, Marriages, and Deaths is believed to have been inaugurated by Thomas Cromwell in 1522, but the Statutes concerning registration are of a comparatively modern date, and were consolidated by 37 & 38 Vict. c. 88. The first Registrar-General was appointed in 1836, his work being enormously increased by the Act of 1874, which made registration compulsory in England and Wales. The Registrar-General is responsible for the taking of the Census and the preparation of the General Returns. The expenses of the Office for 1925-26 were estimated at £105,418. The estimate of receipts from fees for the same period is £22,200.

Quarterly Statistics.—In the Registrar-General's report for the June quarter of 1925, the birth rate is given as 19.4 per 1,000, which is equal to that recorded in the corresponding quarter of 1924, this being the lowest birth rate recorded in any second quarter except during the war years 1917-1919. The death rate was 11.7 per 1,000, this being 0.1 per 1,000 below that recorded during the second quarter of the previous year. The natural increase of population for the June quarter, 1925, by excess of births over deaths was 73,797, as against 80,222, 82,710 and 72,028 in the second quarters of 1922, 1923 and 1924. The number of persons married in the March quarter of 1925 was 92,370, a decrease of 63,766 compared with the number in the preceding quarter, and of 1,620 compared with that in the corresponding quarter of 1924. The number corresponds to an annual rate of 9.7 per 1,000 of the estimated population.

Registrar-General, S. P. Vivian, C.B.

(See Ministry of Health)

Private Sec., W. A. Smoker.

Assistant Registrars-General, F. Finch; W. L. Rind. £850 to £1,000

First Division Clerk (Old Establishments), A. J. Pearce, L.S.O. £150 to £500

HOME OFFICE, Whitehall, S.W. 1.

The Secretaryship of State for Home Affairs was created in 1782, the duties having previously been assigned to the "Southern" Secretaryship, which embraced the affairs of Great Britain, Ireland, and the Colonies, and also Southern Europe. By the appointment of the "Home" and "Foreign" Secretaries the duties were divided in accordance with the names of the Offices, the former retaining Irish and Colonial business,

and until 1794 War business also. In 1801 the Colonial business was also removed. The Home Secretary is the medium by which the Sovereign acquaints his people of his pleasure, and a channel of communication with the Sovereign, and his main functions are the maintenance of the King's peace, the enforcement of rules made for the internal well-being of the community, and the exercise of the prerogative of mercy.

Principal Secretary of State for Home Affairs, Rt. Hon.

Sir William Joynson-Hicks, Bt., M.P. £5,000

Private Sec., A. Maxwell, C.B.

Asst. Private Sec., A. S. Hinshelwood.

POLITICAL HONOURS COMMITTEE.

The Royal Commission on Honours, 1922, recommended that a Committee should be appointed to consider before they are submitted to the King, the names and particulars of persons recommended for appointment to any dignity or honour on account of political services, and after such inquiry as they think fit to report to the Prime Minister whether, so far as they believe, such persons in the whole circumstances are fit and proper persons to be recommended. Constitution of the Committee appointed to serve for the period of office of the present Government:

Chairman, Rt. Hon. Viscount Novar, A.C.M.G.
Other Members, Rt. Hon. Lord Merivale; Rt. Hon. J. F. P. Rawlinson, K.C., M.P.
Secretary, James Rae (Treasury, S.W. 1).

IMPERIAL ECONOMIC COMMITTEE.

Great George Street, S.W. 1.

Appointed in 1925 to consider the possibility of improving the methods of preparing for market and marketing within the United Kingdom the food products of the overseas parts of the Empire, with a view to increasing the consumption of such products in the United Kingdom in preference to imports from foreign countries, and to promote the interests both of producers and consumers.

Chairman, Sir Halford Muckinder.

IMPERIAL SHIPPING COMMITTEE.

Great George Street, S.W. 1.

Set up in 1920: (i.) To enquire into complaints from persons and bodies interested with regard to ocean freights, facilities and conditions in the inter-Imperial trade of questions of a similar nature referred to them by any of the nominating authorities, and to report their conclusions to the Government concerned. (ii.) To survey the facilities for maritime transport on such routes as appear to them to be necessary for trade within the Empire, and to make recommendations to the proper authority for the coordination and improvement of such facilities with regard to the type, size and speed of ships, depth of water in docks and channels, construction of harbour works and similar matters.

Chairman, Sir Halford Muckinder.
Secretary, R. D. Fennelly.

INDIA OFFICE, Whitehall, S.W. 1.

Prior to 1858 Indian affairs were conducted by the East India Company, under the supervision of a Government Board of Control, whose President was responsible for Indian affairs in Parliament. On the transfer of India to the Crown in 1858 a Secretary of State, assisted by a Council, was entrusted with the administrative duties formerly discharged by the Company and Board.

BOARD OF INLAND REVENUE, Somerset House, W.C. x.

The appointment of Commissioners of Stamps dates from 1604 and of Commissioners of Taxes from 1719. By 4 and 5 Will. IV. c. 60, a consolidated Board of Stamps and Taxes was established, and by 12 and 13 Vict. c. 1 this Board was amalgamated with the Commissioners of Excise to form the Board of Inland Revenue. By 8 Edw. VII. c. 16 the administration of Excise was transferred to the Board of Customs. The present sources of "Inland Revenue" consist of Death Duties, Stamps and Taxes. Salaries and Expenses of the Board for 1925-26 are estimated at £6,670,635.

Chairman, Sir Richard V. N. Hopkins, K.C.B.	£3,000

METROPOLITAN WATER BOARD.

173 Rosebery Avenue, E.C. 1.

The Board serves an area of 563 sq. miles. The charges are levied on rateable value at such rate, not exceeding 84 per cent., as the Board may fix. The approximate net water rental is £4,450,200. The Capital Debt on April 1, 1925, amounted to £52,140,046, the interest paid being £1,995,447. The estimated population supplied was 6,959,340. The number of services being 1,664,497. The annual supply was 93,660,700,000 gallons, a daily average

of 256.6 million gallons. One of the sources of supply is the New River Company's undertaking, inaugurated in the reign of James I. (1600) by Sir Hugh Myddelton, to bring water from Amwell and Chadwell, Herts, to London.

Chairman of the Board, C. G. Musgrave, J.P. (unpf)

Vice-Chairman, Sir W. Prescott, C.B.E., D.I. (unpf)

Clerk, G. F. Stringer £1,000

Chief Engineer, Henry E. Stilgoe, M.Inst.C.E. £2,500

Accountant & Registrar of Debentures, G. M. Jennings £1,250

Director of Water Examination, Sir Alexander Houston, K.B.E., C.V.O., D.Sc. £1,750

Solicitor, C. A. Hunt, B.A. £900

Supervisor, F. W. Drake £900

Surveyor, Harold Oxley, F.R.S. £700

THE ROYAL MINT, Tower Hill, E. 1.

The Royal Mint, as now constituted, may be said to date from 1817, and the buildings from 1810, the latter being completed in that year at the cost of over £250,000. In 1870 the Coinage Act abolished the ancient post of Master of the Mint as such, and combined it with that of the Chancellor of the Exchequer. The first known Master (or Warden) of the Mint dates from Henry I. and the last Warden was Lord Maryborough (1814-23), the last Master being Professor Thomas Graham, who died in 1869. The estimated administrative expenses amount to £2,790,000 for 1925-1926. Appropriations in aid, £2,296,000, leaving a net cost of £500,000.

Master and Worker, The Chancellor of the Exchequer.

Deputy Master and Comptroller, and Engraver on H.M. Seals, Col. Robt. Arthur Johnson, C.B.E. £1,500

Chief Clerk, D. J. Scourfield, I.S.O. £550 to £700

Staff Officer, W. Perry, M.B.E. £400 to £500

Superintendent, Operative Department, W. J. Hoeking, C.B.E. £900 to £1,000

Deputy do., H. W. L. Evans, C.B.E. £700 to £800

Chemist and Assayer, Sir T. K. Rose, D.Sc. £800 to £1,000

Assistant Assayers, S. W. Smith, D.Sc., £350 to £600;

J. Phelps, M.A. £350 to £550

Superintendent, W. M. Robins, B.A. £800 to £900

Perth, Western Australia.

Deputy Master, F. E. Allum (acting) £1,100

Superintendent, F. E. Allum £700 to £800

Ottawa, Canada.

Deputy Master, A. J. Baker (acting) £1,000 to £1,200

Engineer, H. E. Ewart, £600 to £700

Pretoria, South Africa.

Deputy Master, R. G. J. Pearson £1,200

Superintendent, J. T. Becklake £800 to £940

THE BRITISH MUSEUM.

Bloomsbury, W.C. 1.

The British Museum may be said to date from 1753, when Parliament granted the sum of £20,000 to purchase the collection of books &c. of Sir Hans Sloane, the building (Montagu House) being opened in 1759. The present buildings were erected between 1823 and 1914, and the original collection has increased to its present dimensions by gifts and purchases, and by the operation of the Copyright Acts. Rules, &c., affecting the public, dates and times of opening, &c., will be found among "Places of Interest." The administrative expenses of the British Museum were estimated at £301,793 (including Natural History Museum) in 1924-25, and were met by a vote under "Education, Science, and Art," Class IV. of the Civil Service Estimates.

THE LONDON MUSEUM.

Lancaster House, St. James's, S.W. 1.

The London Museum was instituted, on the lines of
 the Carnavalet at Paris, for the conservation of the
 antiquities, &c., of London. The Collection was
 originally housed in Kensington Palace, and was re-
 opened in 1914 at Lancaster House. The cost of admin-
 istration in 1919-20 was estimated at £4,400.

Keeper, Secretary and Accounting Officer, F. A. Har-
 man Oates, M.V.O., F.S.A. £600
Asst. Keeper and Librarian, Lt.-Col. Hon. Maurice
 Brett, M.V.O. £250
Inspector of Excavations, G. F. Lawrence. £300

THE NATURAL HISTORY MUSEUM.

Cromwell Road, S.W. 7.

The Natural History Collections in the British Museum
 were removed to South Kensington and rearranged
 there in 1881-85, the new museum being opened to the
 public in 1883. The hours of opening, &c., will be found
 under "Places of Interest." The administrative ex-
 penses were estimated at £98,624 in 1925-26.

Director, Sir Sidney F. Harmer, K.B.E., Sc.D., F.R.S. £1,200

Assistant Secretary, G. F. Herbert Smith, D.Sc. £650 to £800

Staff Officer, W. J. Anderson £400 to £500

Clerks, Higher Grade, T. Wooddisse; A. C. Wray
 £300 to £400

Assistant Keeper (Library), B. H. Soulsby, M.A. £475 to £800

Keeper of Zoology, C. T. Regan, M.A., F.R.S. £1,000

Deputy do., W. T. Calman, D.Sc., F.R.S. £900

Assistant Keepers, R. Kirkpatrick; W. P. Pyecraft;
 A. S. Hirst; J. G. Dollman, B.A.; P. R. Lowe, O.B.E.,
 B.A. £475 to £800

Assistants, N. B. Kinnear; G. C. Robson, M.A.; H. A.
 Baylis, D.Sc.; A. K. Totton, M.C.; M. A. C. Hinton;
 J. R. Norman; C. C. A. Munro, B.A.; H. W. Parker,
 B.A. £450 to £440

Clerk, Higher Grade, T. Wells £300 to £400

Keeper of Entomology, C. J. Gahan, D.Sc. £1,000

Deputy do., Maj. E. E. Austen, D.Sc. £900

Assistant Keepers, J. H. Durrant; G. J. Arrow; J.
 Waterston, D.Sc.; K. G. Blair, B.Sc. £475 to £800

Assistants, F. W. Edwards, B.A.; N. D. Riley; F.
 Laing, B.Sc.; W. H. T. Tams; W. E. Chinn, B.A. £450 to £440

Keeper of Geology, F. A. Bather, D.Sc., F.R.S. £1,000

Assistant Keeper, W. D. Lang, Sc.D. £475 to £800

Assistants, W. N. Edwards, B.A.; L. R. Cox, B.A.;
 E. I. White, B.Sc.; A. T. Hopwood, M.Sc.; W. E.
 Swinton, M.Sc.; T. H. Withers £450 to £440

Keeper of Mineralogy, G. T. Prior, D.Sc., F.R.S.; W.
 Campbell Smith, M.C., M.A. £475 to £800

Assistant, E. D. Mountain, B.A. £450 to £440

Clerk, Higher Grade, T. E. Vincent £300 to £400

Keeper of Botany, A. B. Rendle, D.Sc., F.R.S. £1,000

Assistant Keepers, A. Gepp, M.A.; J. Ramsbottom,
 O.B.E., M.A. £475 to £800

Assistants, A. J. Wilmott, B.A.; D. O'Good, B.A.;
 A. W. Exell, B.A. £450 to £440

Clerk, Higher Grade, J. Ladbrook £300 to £400

THE SCIENCE MUSEUM.

South Kensington, S.W. 7.

The Science Museum was instituted in 1853 under the
 Science and Art Department as a part of the South
 Kensington Museum, and to it was added in 1883 the
 Collections of the Patent Museum. In 1900 the ad-
 ministration of the Science Collections was separated
 from that of the Art Collections, which were transferred
 to the Victoria and Albert Museum. The Collections in
 the Science Museum illustrate the application of science
 to industry and the development of scientific and
 industrial instruments, apparatus and machinery. The
 administration expenses were estimated at £52,940 in
 1925-26.

Director and Secretary, Col. H. G. Lyons, D.Sc., F.R.S. £1,200

Higher Clerical Officer, G. C. Ledger £300 to £400

Industrial Machinery Division.

Keeper, (Vacant)	£750 to £900
Assistant Keeper, A. J. Spencer, M.I. Mech. E.	£400 to £600
Assistants, F. St. A. Hartley, A.C.G.I.; R. P. G. Denham, B.A.	£250 to £400

Engineering Division.

Keeper, H. W. Dickinson, M.I. Mech. E. (Secretary to Advisory Council)	£750 to £900
Assistant Keeper, E. A. Forward, A.R.C.S., M.I. Mech. E.	£400 to £600
Assistants, G. F. Westcott, B.A.; F. G. Skinner, B.Sc.	£250 to £400

Water and Air Transport Division.

Deputy Keeper, G. L. Overton, A.R.C.S.	£600 to £700
Assistants, M. J. B. Davy; G. S. Laird Clowes, M.A.	£250 to £400

Science Division.

Deputy Keeper, D. Buxandall, A.R.C.S.	£600 to £700
Assistants, Capt. H. Shaw, B.Sc.; E. Lancaster Jones, B.A.; A. Barclay, A.R.C.S.	£250 to £400

Science Library.

Keeper, (Vacant)	£750 to £900
Assistant Keeper, S. C. Bradford, B.Sc.	£400 to £600

THE VICTORIA AND ALBERT MUSEUM.

South Kensington, S. W. 7.

The history of the Museum may be said to begin in 1852, when the Museum of Ornamental Art was founded at Marlborough House. The collection consisted of certain objects which had been purchased at the 1851 Exhibition, "on account of the excellence of their art and workmanship," at a cost of £5,300, together with other specimens purchased for the use of the various Schools of Design since 1837, and dispersed among them. Additions have since been made by purchase, gift, and bequest. The older parts of the building were erected between 1860 and 1884; the new buildings were completed in 1909. The administrative expenses were estimated at £131,757 in 1925-26, and were met by a vote under Education, Science, and Art. The branch museum at Bethnal Green (administrative expenses 1925-26, £6,237) was opened in 1872. The buildings were removed from South Kensington, and re-erected on land purchased for the purpose locally.

Director and Secretary, E. R. D. MacLagan, C.B.E., B.A., F.S.A.	£1,200 to £1,500
----------------------------------------------------------------------	------------------

SECRETARIAT.

Museum Superintendent, A. V. Fullerton	£500 to £600
Staff Clerk, C. E. Fish	£400 to £500

DEPARTMENT OF ARCHITECTURE AND SCULPTURE.

Assistant, R. P. Bedford	£200 to £440
--------------------------------	--------------

DEPARTMENT OF CERAMICS.

Keeper, B. Rackham, M.A.	£1,000
Assistants, *H. E. Rend, B.Sc., M.C.; W. A. Thorpe, B.A.; W. B. Honey	£200 to £440

DEPARTMENT OF ENGRAVING, ILLUSTRATION, AND DESIGN, AND OF PAINTING.

Keeper, M. Hardie, B.A., R.L., R.E.	£1,000
Assistant Keeper, F. B. Long, M.A.	£475 to £800
Assistants, F. W. Stokes, B.A.; J. Laver, B.Litt.	£200 to £440

LIBRARY.

Keeper, G. H. Palmer, B.A., F.S.A.	£1,000
Deputy do., A. Van de Put	£900
Assistant Keeper, H. C. Andrews, M.A.	£475 to £800
Assistants, A. W. When, B.A.; P. B. James	£200 to £440

DEPARTMENT OF METALWORK.

Keeper, H. P. Mitchell	£1,000
Deputy Keeper, A. J. Koop, B.A.	£900
Assistant Keeper, Maj. C. T. P. Bailey	£475 to £800
Assistant, C. C. Oman, B.A.	£200 to £440

DEPARTMENT OF TEXTILES.

Deputy Keeper, A. J. B. Wace, M.A.	£900
Assistant Keeper, P. G. Trondell	£475 to £800
Assistants, A. L. B. Ashton, B.A.; C. E. C. Tattersall, B.A.	£200 to £440

* Also Secretary to the Advisory Council.

DEPARTMENT OF WOODWORK.

Deputy Keeper, O. Brackett	£900
Assistant Keeper, H. Clifford-Smith, M.A., F.S.A.	£475 to £800

Assistant, W. A. H. King, M.A.	£200 to £440
-------------------------------------	--------------

INDIAN SECTION.

Keeper, C. S. Clarke	£1,000
Assistant Keeper, A. J. D. Campbell	£475 to £800
Assistant, K. de B. Codrington, B.A.	£200 to £440
Technical Assistant, A. D. H. Smith, B.A.	£120 to £300

DEPARTMENT OF CIRCULATION.

Deputy Keeper, H. A. Kennedy	£900
Assistants, A. E. J. Torrens; C. M. Weekley, B.A.	£200 to £440

BETHNAL GREEN MUSEUM.

Assistant, A. K. Sabin	£200 to £440
------------------------------	--------------

NATIONAL LIBRARY OF WALES.

Aberystwyth.

Founded by Royal Charter, 1907, and maintained by annual grant from the Treasury. Contains over 450,000 printed books, and valuable MSS. and rare printed books in Welsh and other Celtic languages. One of the six libraries entitled to certain privileges under Copyright Act. Open daily 10 to 5.

Librarian, John Ballinger, C.B.E., M.A.

NATIONAL MUSEUM OF WALES, Cardiff.

Amgueddfa Genedlaethol Cymru.

Founded by Royal Charter, 1907, and maintained by Annual Grant from the Government and Museum rate from the Cardiff City Council. The collections consist of Welsh porcelain, English pottery, De Winton collection of Continental porcelain, Pyke-Thompson collection of water-colour drawings and important collections of paintings in oil and engravings, Welsh pre-historic, Roman, and other antiquities, casts of pre-Norwegian Monuments of Wales, and collections illustrating Welsh Botany, Geology and Zoology.

The Museum is open free daily 10 to 5, and on Sunday afternoons, 2.30 to 5.

President, the Rt. Hon. Lord Kenyon, K.C.V.O.
Vice-President, the Rt. Hon. Lord Aberdare.
Treasurer, Sir William Reardon Smith, Bt.
Director, Dr. R. E. Mortimer Wheeler, M.C., M.A., F.S.A.

Secretary, A. H. Lee, M.C.

Keepers (Archaeology), Dr. Cyril Fox, F.S.A.; (Art) Isaac J. Williams; (Botany) H. A. Hyde, B.A.; (Geology) Dr. F. J. North, F.R.S.; (Zoology) Dr. J. J. Simpson, M.A.

NATIONAL DEBT OFFICE,

19 Old Jewry, E.C. 4.

The National Debt Commissioners were appointed under 26 Geo. III., c. 32 (1786), by which a permanent Sinking Fund was to be established, and a sum of £250,000 issued quarterly to be applied towards the reduction of the National Debt, being commonly spoken of as "Mr. Pitt's Sinking Fund." In 1829 this was superseded by appropriating the surplus income of the year as the Sinking Fund, and this was commonly known as "The Old Sinking Fund." In 1875 "The New Sinking Fund" was set up by Sir Stafford Northcote, and in 1923 another "New" Sinking Fund was set up by Mr. Baldwin. These, with other funds detailed on p. 473 now mainly operate in reducing the Debt. The Commissioners are at the present time the Speaker, the Chancellor of the Exchequer, the Master of the Rolls, the Lord Chief Justice, the Paymaster-General, and the Governor and Deputy-Governor of the Bank of England. The administrative expenses of the Board were estimated at £16,995 in 1925-26.

Comptroller-General, Sir Thomas L. Heath, K.C.B., K.C.V.O., F.R.S.	£2,500
-------------------------------------------------------------------------	--------

Private Secretary, R. W. Ilhng	£200
--------------------------------------	------

Brokers, Messrs. Mullens, Marshall, Stuer, Layford & Co.	£1,500
---------------------------------------------------------------	--------

NATIONAL GALLERY.

Trafalgar Square, W.C. 2.

The National Gallery is the result of a Parliamentary grant of £60,000 in 1824 for the purchase and Exhibition of the Angerstein collection of pictures, the present building being opened in 1838 and enlarged in 1865, 1876, 1887 and 1912. The cost of administration in 1924-25 was estimated at £31,497.

Director, Sir Charles John Holmes ... £1,200 to £1,500
Keeper and Secretary, C. H. Collins Baker ... £900
Assistants, H. I. Kay; W. G. Constable £350 to £600

NATIONAL GALLERY OF BRITISH ART

(The Tate Gallery), Millbank, S.W. 1.

The National Gallery of British Art, better known as "The Tate Gallery," was opened in 1897 on the site of Millbank Gaol, the cost of erection (£80,000) being borne by Sir Henry Tate, who also contributed the nucleus of the present collection. The "Turner Wing," built at the expense of the late Sir Joseph Duveen, Senr., was opened to the public in 1910. In connexion with the Hugh Lane bequest Sir Joseph Duveen is bearing the cost of a gallery for Modern Foreign Art, which will shortly be completed, and is also building a gallery for Sargent's works.

Director, Charles Aitken ... £1,000
Asst. Keeper, James B. Manson ... £250 to £600
Assistant, H. S. Ede ... £250 to £600

NATIONAL INSURANCE AUDIT DEPT.

Head Office, 17 North Audley Street, W. 1.

By the National Health Insurance Act, 1924, it is provided that the accounts of Approved Societies and Branches, and Insurance Committees shall be submitted to audit by auditors appointed by the Treasury. This Department was created by the Treasury Minute of August 6, 1912.

Chief Auditor, D. H. Boggis-Rolfe ... £1,200
Deputy do. & Secretary, W. A. Middleton, O.B.E. £1,000
Chief Inspector of Audit, M. W. Dixon ... £900
Clerk in Charge of Accounts, P. McCormack

Registrar, C. H. W. O'Brien, M.B.E. ... £400 to £500
Inspectors of Audit, (5); *Auditors*, Cl. I. (13), Cl. II. (24); *Assistant Auditors*, (27).

NATIONAL PORTRAIT GALLERY.

St. Martin's Place, Charing Cross, W.C. 2.

The first grant to the institution was made in 1856; the collections being successively housed in Great George Street, Westminster, in South Kensington, and in Bethnal Green. The present building was opened in 1896, £80,000 being contributed to its cost by Mr. W. H. Alexander. The amount for salaries and expenses, including a grant of £894 for purchase of portraits, was estimated at £7,731 in 1925-26.

Director, Keeper, and Secretary, James D. Milner, F.R.S. ... £900
Assistant to Director, C. K. Adams ... £300 to £400

H.M. NAUTICAL ALMANAC OFFICE,

Royal Naval College, Greenwich, S.E. 10.

The "Nautical Almanac" was first published for 1767, by H.M. Admiralty, under whose control the office now remains. The expenses of preparation were estimated at £4,458 in 1924-25.

Superintendent, P. H. Cowell, D.Sc., F.R.S. ... £700
Assistants, L. J. Comrie, Ph.D.; W. F. Doak, M.A., F.R.A.S. ... £300 to £450

OBSERVATORIES.

Royal Observatory, Greenwich.

The Royal Observatory was founded by Charles II. in 1675, the building, designed by Moore and Wren, being opened in 1676. The administrative expenses of the Observatory are estimated at about £1,600 annually.

Astronomer Royal, Sir F. W. Dyson, LL.D., F.R.S. ... £1,200 to £1,200
Chief Assistants, J. Jackson, M.A., D.Sc., F.R.A.S.; W. M. H. Greaves, M.A., F.R.A.S. ... £500 to £700
Assistants, Andrew C. D. Crommelin, D.Sc., F.R.A.S.; C. Davidson, F.R.A.S.; W. Bowyer, F.R.A.S.; W. M. Witchell, B.Sc., F.R.A.S. (*Magnetic and Meteorological*) ... £200 to £600
Junior do. (Higher Grade), H. Furner, F.R.A.S.; P. J. Melotte, F.R.A.S.; W. Stevens, F.R.A.S. R. T. Cullen, F.R.A.S. ... £300 to £400
Clerical Assistant, D. J. R. Edney, F.R.A.S. ... £300 to £400

Royal Observatory, Cape of Good Hope.

Astronomer, Harold Spencer Jones, M.A., B.Sc., F.R.A.S. ... £967 to £1,067
Chief Assist., J. K. E. Hahn, Ph.D., F.R.A.S.

Assistants, W. H. Cox; J. Lunt, D.Sc.; J. Woodgate ... £667 to £867
 £325 to £725

DEPARTMENT OF OVERSEAS TRADE.

(Joint Department of the Foreign Office and the Board of Trade).

35 Old Queen Street, S.W. 1. (Victoria 9040.)

City Branch Office, 73 Basinghall Street, E.C. 2.
 (London Wall 4713.)

This Department was formed during the autumn of 1927 as a joint Department under the Foreign Office and Board of Trade, and is represented in Parliament by a Parliamentary Secretary who occupies the position both of Additional Parliamentary Under-Secretary of State for Foreign Affairs and of Additional Parliamentary Secretary for the Board of Trade. The Department is concerned mainly with the promotion and development of Overseas Trade, and comprises the former Department of Commercial Intelligence of the Board of Trade and a part of the Foreign Trade Department of the Foreign Office. It has, in addition, taken over certain functions formerly performed by the Foreign Office in connexion with Commercial Intelligence and with the Commercial Diplomatic and Consular Services. The cost of administration was estimated at £344,907 in 1925-26.

Parliamentary Sec., Arthur Michael Samuel, M.P. £2,000
Private Secretary, A. Mullins, C.M.E.
Do. (Parly), Capt. Hon. D. Howard, M.P., unpaid
Comptroller-General, Sir William H. Clark, K.C.S.I., C.M.G. ... £1,800

Private Secretary, C. M. Pickthall ... £250 to £500
Directors, R. W. Matthew, C.M.G. (*Empire, Trades & Economic Dim.*); Sir E. T. F. Crowe, C.M.G. (*Foreign Dim.*); Lt.-Col. H. W. G. Cole, C.S.I., O.B.E. (*Exhibitions & Fairs Dim.*) ... £1,000 to £1,200
Assistant Directors, J. A. P. Edgecombe, C.M.E.; G. I. H. Lloyd; L. A. Pais, O.B.E.; N. S. Reyntjens; P. C. Rice, M.B.E. (*Chief Establishment and Finance Officer*); R. E. R. C. Brinsley Richards, O.B.E.; H. W. Wislwood (*acting*); M. W. Donald (*acting*); C. Taylor ... £700 to £900
Senior Intelligence Officers, R. Henshall, I.S.O.; C. E. G. House, M.B.E.; A. C. Crutenden (*Head of City Branch Office*); A. G. Chuter, M.B.E.; L. N. Barker; E. H. Bliss; J. S. Andrews; A. R. Fraser (*seconded to the Board of Trade*); G. W. Betts; C. M. Jones;

Hon. C. C. Farrer, O.B.E.; W. C. Scott; L. A. de L. Meredith, O.B.E.; J. J. Holloway; A. B. Marchant (acting); W. H. Evans (acting); A. E. Pollard (acting); O. P. Dick, M.B.E. (acting); S. A. Deacon (acting).....£550 to £700

Intelligence Officers, D. F. Blyther; A. Beecroft, M.B.E.; E. P. J. Briggs; G. H. Meadmore; F. Biggs; W. J. Paddon; S. Robson; W. G. Bruzard; J. F. P. Fielding; R. C. E. Milne; J. W. Bridgen; C. H. Davies, M.C.; R. G. Mercer; G. C. Hutton; F. W. Rogers; A. I. Schud; H. E. Gibbs; H. A. Treganowan; A. C. Stewart; A. A. Longden, D.S.O.; C. H. Reeve; T. C. Walton (£400 to £600 personal to last-named officer) (the foregoing hold the personal title of *First Class Intelligence Officer*); W. T. Gibson; E. Warron; D. F. Crawford; J. A. Dornmann; E. Adams; A. J. Pack; J. W. Galsby; J. N. Goad; G. H. Kelly; W. Hall; E. S. A. Baynes; F. J. Darbyshire (seconded to the Ministry of Health); C. S. Toseland; A. W. H. Hall; A. L. Willis; C. S. Grange; W. M. Hill; D. H. Lval; J. C. Pittman; O. Clark; A. G. C. Deuber; C. F. Monier-Williams; E. L. F. Clough-Taylor; T. L. Rolton; J. A. Stirling; S. J. Graham; T. R. Ritchie; J. Mandefield; H. L. Setchell; J. McE. Martin; A. Mullins, C.B.E.; H. M. Blomfield; H. A. Jones, M.C. (seconded to the Committee of Imperial Defence); C. F. F. Fagan; A. C. Pomroy; C. M. Pickett; A. Schofield; R. C. Stewart; J. B. Greaves (acting).....£350 to £500

Intelligence Officer (Cadet Grade), F. J. Giek.....£150 to £300

Accountant, D. J. O'Callaghan (acting).....£550 to £700

Deputy Accountant, J. Biddle (acting).....£400 to £500

Assistant Accountants, F. A. Hubbard; F. Hollings (acting).....£300 to £400

Deputy Establishment Officer, J. L. Butler (acting).....£400 to £500

Staff Clerk, A. Froude (acting).....£300 to £400

Registrar, G. F. Rivers.....£400 to £500

Assistant Registrars, E. Bull; S. W. Rose.....£300 to £400

Architect, G. C. Churchward, M.B.E.£400

Smith; C. F. Torrey; Sir M. C. Turner; W. Walker; R. White; Rt. Hon. Thomas Wiles, P.C.; W. Varco Williams; Sir John Wimble, K.B.E.

Officers.

General Manager, D. J. Owen.

Secretary, F. Ayllife.

Solicitor, J. D. Ritchie, M.C.

POST OFFICE.

Chief Office, St. Martin's-le-Grand, E.C. 4.

A House of Commons report in 1844 states: "It is uncertain at what precise period the Crown undertook to be the regular carrier of letters for its subjects." The first "Master of the Posts" was appointed in 1516, but the duty was not then undertaken as a remunerative department of the Government. The Post Office is now one of the three great revenue-collecting departments, and while efficiently discharging its multifarious duties, shows a large annual profit. It also receives large sums for duties and taxes on behalf of the Inland Revenue Department, for certain licences for the Customs and Excise Department and the County Councils and for National Insurance on behalf of the National Health Insurance Commissioners and the Board of Trade. The Post Office also pays Old Age Pensions. The Penny Post was inaugurated in 1840, the Book Post in 1855, the Post Office Savings Bank in 1861, the Post Office Telegraphs in 1870, the Money Order Office in 1922, Postal Orders in 1881, the Parcel Post in 1883, and the Telephone Service in 1892. The expenses of the Post Office (Salaries, Wages, etc., only) were estimated at £35,725,665 in 1925-26.

Postmaster-General, Sir William Lowson Mitchell-Thomson, Bt., K.R.E., M.P. £2,500

Private Secretary, T. Dalish, M.C.

Parliamentary do., Sir John Ganzoni, M.P. unpaid.

PRIVY COUNCIL OFFICE, Whitehall, S.W. 1.

The Privy Council is of very ancient origin. A Council, the number of which was about twelve, was instituted by Alfred, 895, and it discharged the functions of State now confined to members of the Cabinet. In the Middle Ages the Chief Advisers of the King who were permanently about him formed the Privy Council. Having become unwieldy, it was reconstituted in 1679. At present it consists of certain eminent persons whose names are given on pp. 223-4. Members of the Cabinet must be Privy Counsellors, and they principally form the acting Privy Council. The Council is summoned as such to act "with others" upon the demise of the Crown, and many matters are referred by the Sovereign to Committees of the Council, some of which are standing Committees, and others constituted to deal with particular cases, e.g., the Judicial Committee, the Board of Trade, &c. The Lord President of the Council is the Fifth Great Officer of State, and as such is always a prominent member of the Cabinet.

Lord President of the Council, Rt. Hon. Earl of Balfour, *K.G.*, *c.m.* *£2,000*

Private Sec., Maj. Hon. E. C. Lascelles, *d.s.o.*, *m.c.*, Capt. A. C. Graham *unp.*

Chief Clerk, Securities dept., H. Gregson £400 to £600
Staff Officer, R. Watson £350 to £550

PUBLIC WORKS LOAN BOARD,

Old Jewry, E.C. 2.

The Public Works Loan Board was created in 1817 for the purpose of advancing money to Municipal Authorities for Public Works. During the financial year 1923-24 the Commissioners approved loans amounting to £10,177,123, viz. £8,822,113 out of the Local Loans Fund and £1,355,000 out of the Land Settlement (Public Works Loan) Account. Of the total granted out of the Local Loans Fund the sum of £4,103,700 was for purposes of the Housing Acts.

The average rate of interest was:—

£ s. d.	per cent. in	1924-25
4 15 8	"	1923-24
4 15 8	"	1922-23
5 7 2	"	1921-22
6 3 10	"	1920-21
6 9 9	"	1919-20
5 15 7	"	1918-19
4 9 7	"	1917-18

Loans granted during 1923-24 to Local Authorities for the purposes of State-assisted Housing Schemes amounted to £3,457,612 for providing dwellings for the Working Classes during the year.

No applications for loans for land settlement purposes were refused; the advances made out of the Land Settlement Account during the year totalled £1,209,128.

By the Agricultural Credits Act, 1923, the Commissioners are empowered to grant loans to persons who purchased their property between April 5, 1927, and June 27, 1927. The land must be mainly agricultural. The period within which loans may be granted is limited to 5 years from the date of the passing of the Act (July 31, 1923), and the aggregate amount of the loans will be such as is approved by the Treasury.

Chairman, The Lord Hunsdon *imp.*
Deputy-Chairman, Laurence Currie *imp.*
Secretary, H. G. H. Barnes £1,500
Asst. Secretary (Legal), D. F. Buckley £600 to £800
Asst. do. and Chief Clerk, H. A. Clark, i.s.o. £600 to £800

QUEEN ANNE'S BOUNTY,

3 Dean's Yard, S.W. 1.

Incorporated in 1704, when Queen Anne, with the consent of Parliament, transferred to the Governors the annual income of the "first fruits" and "tithes" derived from the sees, dignities, and benefices, with a view to the augmentation of insufficiently endowed livings. These charges were originally levied on all clerical incomes and paid to the Pope, but were made part of the Crown revenue by Henry VIII. More than half of the benefices in England and Wales are free from these charges, having either been exempted from them by statute or formed since the charges were imposed. "First fruits" represent one year's income of a benefice in the time of Henry VIII.; the "tithes" an annual sum of a tenth part of that income. The income from this source amounts to about £15,000 per year, which, with the surplus income from capital held by the Governors, is distributed in grants towards the relief of dilapidation assessments on benefices not exceeding £50 in net annual value; the total amount so available for the year ending Dec. 31, 1925, was £28,650. The Governors act as trustees for endowments and many descriptions of Church funds. They are also empowered to lend money upon mortgage of benefices for improvements to parsonage houses and farm buildings, and for dilapidations.

Secretary and Treasurer, F. G. Hughes.
Chief Clerk, W. G. Hannah.
1st Class Clerks (Senior Division), R. G. Rowland;
 F. Jump; D. Smeaton; W. Russell; W. J. P. Smith;
 W. Holford.
1st Class Clerks (Junior Division), A. G. Spencer;

Timber Mechanics Officer, C. J. Chaplin.

Co-ordinating Research Boards.

These Boards were established in 1920 (a) to provide for interchange of information between the various Government technical establishments concerning the special work which they undertake and the results achieved, so as to prevent duplication of work; though the Boards should have no executive function as regards the work of these establishments; (b) to arrange for the communication of such information to interested persons outside the Government service when this can be done without detriment to the public interest; and (c) in the case of researches not otherwise adequately provided for to make the necessary arrangements to meet the requirements of Government departments and others.

Chemistry Research Board.

Chairman, Sir Richard Threlfall, K.B.E., F.R.S.

Engineering Research Board.

Chairman, Sir Joseph E. Petavel, K.B.E., D.Sc., F.R.S.

Physics Research Board.

Chairman, Sir J. J. Thomson, O.M., F.R.S.

Radio Research Board.

Chairman, Admiral of the Fleet Sir Henry B. Jackson, G.C.B., K.C.V.O., F.R.S.

ROYAL COMMISSION FOR THE EXHIBITION OF 1951.

Offices, 1 Lowther Gardens, Exhibition Rd., S.W.7.

[Incorporated by Supplemental Charter as a permanent Commission after winding up the affairs of the Great Exhibition, in 1883. It has for its object the promotion of scientific and artistic education by means of funds derived from its Kensington Estate, purchased with the surplus left over from the Great Exhibition.]

President of the Royal Commission, H.R.H. the Prince of Wales, K.G.

Chairman, Board of Management, Viscount Escher, G.C.B., G.C.V.O.

Chairman, Science Scholarships Committee, Sir Richard Glazebrook, K.C.B., F.R.S.

Secretary to Commissioners, Evelyn Shaw, M.V.O.

THE NATIONAL SAVINGS COMMITTEE.

Princes House, Kingsway, W.C. 2.

SAVINGS CERTIFICATES.—The total number of Savings Certificates sold from their first issue in Feb. 1926 to Sept. 30, 1928, was 743,587,221, their cash value being £580,479,585. The amount withdrawn on that date was approximately 36 per cent. of that total. On April 1, 1922, the price of the Savings Certificate was raised from 15s. 6d. to 16s., the maturity value remaining 26s. On Oct. 1, 1923, the maturity value was reduced to 24s.

President, Sir Robert M. Kindersley, G.B.E.

Chairman, Rt. Hon. Lord Islington, G.C.M.G., D.S.O.

THAMES CONSERVANCY,

2 Norfolk Street, Strand, W.C. 2.

The Conservation of the River Thames was granted to the Lord Mayor of London in 1487, and delegated to 12 Conservators in 1857, the powers being reconstituted in 1864. The Port of London Act, 1908, took over as from March 31, 1909, all rights, powers, and duties of the Conservators in respect of the river below Teddington.
Chairman, Rt. Hon. Lord Desborough, a.c.v.o.
Vice-Chairman, Rt. Hon. Sir T. F. Halsey, Bt.
Secretary, F. W. Geary.

BOARD OF TRADE,

Great George Street, S.W. 1.

Headquarters, Great George Street, S.W. 1; Mercantile Marine Dept. (including Sea Transport and Shipping Liquidation Dept.), 3, Sanctuary Buildings, Great Smith Street, S.W. 1; General Registry of Shipping and Seamen, Tower Hill, E. 1; Standards Dept., 7, Old Palace Yard, S.W. 1.
(See also Dept. of Overseas Trade, and Patent Office.)

A Council for Trade and Plantations was instituted by King Charles II. in 1660. This paid Council was abolished in 1782, and in 1786 a Committee of the Council on Trade (which, unlike the other Council Committees, had a President of its own) was appointed. The President of the Board of Trade, as at present constituted, controls the Department principally responsible for matters relating to trade and industry. The Board deals with commercial policy generally, commercial treaties and negotiations and international questions affecting British trade. It administers statutes concerning merchant shipping and seamen, bankruptcy, joint stock companies, gas, key industries including dyes, weights and measures, patents, designs, trade marks and copyright, and mines and quarries. It administers the Coastguard and also exercises control over the principal lighthouse authorities of the country, and, in the interests of navigation, over the construction of works on tidal lands, protects Crown and public rights in foreshores, and collects and publishes statistics of the trade and industry, shipping and navigation of the country, its Dominions and Protectorates, and foreign countries as well as particulars of customs tariffs, regulations, &c. The Food Council is attached to this department. Further, the Department arranges the provision of all sea transport required for the conveyance of personnel and stores by the fighting services and other Government Departments, deals with questions relating to petroleum and publishes a weekly journal of commercial information. In addition it undertakes duties arising out of the War, e.g., the liquidation of commitments entered into during Government control of food, shipping, timber, &c., and also out of the various Treaties of Peace, e.g., the settlement of certain classes of debts between British and ex-enemy nationals, and of claims by British nationals for the restitution of and/or compensation for damage to British property rights and interest in ex-enemy countries and the preparation of certain classes of claims for reparation payments. Jointly with the Foreign Office it controls the Overseas Trade Department.

President, Rt. Hon. Sir Philip Cunliffe-Lister, K.B.E., M.C., M.P. £5,000

Secretary, S. J. Page, LL.B., M.C. £600 to £800
Asst. to Sec., L. C. Jackson. £400 to £500

TREASURY, Whitehall, S.W. 1.

The Lord High Treasurer of England is the Third Great Officer of State, the office having been "in commission" (with certain intervals) since 1012. The Commissioners for executing the office of Treasurer of the Exchequer of Great Britain and Lord High Treasurer of Ireland consist of the First Lord, who is usually Prime Minister, the Chancellor of the Exchequer, and some Junior Lords, with certain Secretaries and a staff of officials. The duties of the First Lord are mainly political, as also are those of the Parliamentary Secretary and the Junior Lords; the duties of the Chancellor of the Exchequer are mainly financial, in that he performs the ancient duties of the Under-Treasurer and, after agreement with the heads of the great spending departments, arranges for the great collecting departments to provide sufficient monies to meet the needs of the year. The papers are laid before Parliament in the form of a Budget, which the Chancellor opens and expounds to the House, these plans being accepted, modified, or rejected by the House.

PRIME MINISTER AND FIRST LORD OF THE TREASURY—

Rt. Hon. Stanley Baldwin, M.P. £5,000

*Private Secs. to Prime Minister, Lt.-Col. Sir Ronald**Waterhouse, K.C.B., C.M.G., C.V.O.; Sir Patrick**Gower, K.B.E., C.B., C.V.O.; Geoffrey Fry, C.B. (M.P.);**C. Patrick Duff, C.V.O.; Miss E. M. Trinity House, the first General Lighthouse and Pilotage Authority in the Kingdom, was a body of importance when Henry VIII. granted the Institution its first charter in 1544, *inter alia* "for the relief, increase and augmentation of the Shipping of this Realm of England." Since that period the duty of erecting and maintaining lighthouses and other marks and signs of the sea has by Royal Charter and Acts of Parliament been entrusted to the Corporation of Trinity House, and until 1874 Masters of the Navy were examined by the Elder Brethren of the Corporation. In the present day, the principal duty of the Corporation of Trinity House, as a Public Department, is the administration of the Lighthouse, &c., Service of England and Wales with certain statutory jurisdiction in regard to lighthouses and other seamarks in Scotland, Ireland, the Channel Islands and Gibraltar, whilst the Corporation are also the chief Pilotage Authority in the United Kingdom, and in their capacity as a private corporation or guild they administer certain Charitable Trusts especially directed to the relief of aged and distressed seamen and their widows. The Acting Elder Brethren of the Corporation also sit with the Judges of the Admiralty Division of the High Court of Justice, to act as Nautical Assessors in Marine Causes tried in that Court. The Lighthouse Service of the Trinity House is maintained out of the General Lighthouse Fund, this fund being provided by means of special dues called Light Dues, levied on shipping using the ports of the United Kingdom. The accounts in connection with the Lighthouse Service are rendered to the Board of Trade who have statutory control over the expenditure, and are submitted annually to Parliament. The accounts in connection with the Charitable Trusts are rendered to the Charity Commissioners.

IMPERIAL WAR MUSEUM.

Imperial Institute Road, South Kensington, S.W. 7.

The formation of a collection of Naval Military and Air Force exhibits and trophies and of books, pictures, photographs, cinematograph films, maps, posters and other material connected with the War, was approved by the War Cabinet on March 5, 1919. The Imperial War Museum Act received the Royal Assent on July 4, 1920, and a Board of Trustees was appointed. The Museum was opened by H.M. the King on June 9, 1920 at the Crystal Palace. The tenancy of the Crystal Palace was renewed on March 31, 1924. The Museum was removed to the Galleries known as the Western Galleries in the Imperial Institute Road. The aeronautical collection was transferred to the Science Museum on loan. The Museum was reopened to the public on Nov. 11, 1924. The cost of administration in 1924-25 was estimated at £14,780.

Curator and Secretary, Charles John Boulton, G.B.E., F.R.S.

WORKS AND PUBLIC BUILDINGS,

Storey's Gate, S.W. 1.

H.M. Office of Works for the Commissioners of Works and Public Buildings was constituted in 1832 to perform certain overseeing duties, &c., previously belonging to the Office of Woods and Forests. The salaries and expenses of the office were estimated at £547,680 in 1923-24.

 Treasurer, W. J. Downer, C.B., C.M.G., I.S.O.

ELEVEN YEARS' LITIGATION.

NUMBER of appeals and causes set down for hearing at the Law Courts at the beginning of Michaelmas Sittings from 1915 to 1925:

(1) Aggregate of Appeals and Causes.

Year.	Appeals.	Causes.	Total.
1915	236	1,447	1,683
1916	181	1,504	1,685
1917	203	1,566	1,769
1918	165	1,103	1,268
1919	150	3,457	3,607
1920	246	4,303	4,548
1921	311	3,501	3,712
1922	192	2,738	2,930
1923	305	2,246	2,451
1924	158	2,872	3,030
1925	129	2,320	2,449

(2) Chancery Division.

(Actions in each year.)

1915... 348	1918... 250	1921... 513	1924... 320
1916... 301	1919... 263	1922... 571	1925... 381
1917... 246	1920... 372	1923... 487	

The explanation of the higher figures in the later years is that since 1921 this division has dealt with Companies (winding-up matters), and with Bankruptcy matters also, the latter having formerly been heard in the King's Bench Division.

RECEIPTS.

RECEIPTS should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, &c., received.

RENT RESTRICTION ACT.

THE Increase of Rent and Mortgage Interest (Restrictions) Act, 1920, was dealt with on pp. 427-428 of the 1921 edition of "WHITAKER."

(3) King's Bench Division.

In dealing with the King's Bench, account has to be taken of the transfer just mentioned of bankruptcy matters to the Chancery side in 1922.

Year.	Div. Court.	Actions.	Bankruptcy.	Total.
1915	113	373	12	498
1916	142	449	8	599
1917	137	312	9	458
1918	183	536	2	721
1919	192	852	5	1,049
1920	152	965	8	1,125
1921	289	1,603	—	1,892
1922	154	1,082	—	1,236
1923	184	731	—	915
1924	194	1,191	—	1,385
1925	188	1,016	—	1,204

(4) Probate, Divorce and Admiralty.

The increases are attributable mainly to the gradually extended facilities given to Poor Persons to bring proceedings. Probate cases form but a small proportion of the aggregates.

Year.	Prob. & Div.	Admiralty.	Total.
1915	515	38	553
1916	495	68	563
1917	708	110	818
1918	935	157	1,092
1919	2,025	79	2,104
1920	2,628	113	2,741
1921	1,014	82	1,096
1922	888	43	931
1923	815	27	842
1924	918	32	950
1925	714	21	735

HEALTH INSURANCE COST.

THE total amount received for England and Wales in 1924 under the National Health Insurance Act, in respect of contributions payable by employers and employed persons jointly was approximately £24,400,000, of which it is estimated that approximately £12,700,000 was paid by the workers and £11,700,000 by the employers. The amount received from the State was £6,800,000.

COST OF ADMINISTRATION.

Estimates for 1925-26 in respect of Law and Justice amount to £11,726,312, giving a net reduction on the year 1924-25 of £96,384. Most of the items show decreases, but the aggregate reduction of £268,380 is more than counter-balanced by increases, totalling £366,764, under Police, Land Registry, and the Northern Ireland Land Purchase Commission. The requirements for the main heads of expenditure for 1924-25 and for 1925-26 are set out below. The increase in respect of Police represents additions to the grants to Local Authorities towards the cost of the forces and of the maintenance of Youthful Offenders in places of Detention.

ESTIMATED COST.	1924-25.	1925-26.
Law Charges	£237,237	£225,904
High Courts	455,438	475,135
Land Registry	93,918	95,390
Police, England and Wales	6,115,356	6,394,897
Prisons, England and Wales	1,071,492	1,022,302
Industrial Schools	367,103	303,063
Scottish Law Charges	122,570	88,232
Scottish Police	750,200	765,000
Scottish Prisons	182,377	162,714
Land Purchase Commission, Northern Ireland	1,856,840	1,927,739

LAW SITTINGS, 1926.

Hilary	January 11 to March 31.
Easter	April 13 to May 21.
Trinity	June 1 to July 31.
Michaelmas	October 12 to December 21.

THE INNS OF COURT.

<i>Marshall Soult</i> (6,600 tons), 2 15-inch guns; <i>Monitors</i>
<i>M 22</i> , <i>M 29</i> (355 tons), <i>M 32</i> , <i>M 33</i> (400 tons).

Torpedo-Boat Destroyers.

<i>Built 189.</i>
<i>Building 2</i>

Aircraft Carriers.

<i>Furious</i> , <i>Argus</i> , <i>Pegasus</i> , <i>Ark Royal</i> , <i>Hermes</i> , <i>Eagle</i> , <i>Courageous</i> , <i>Glorious</i> .

NAVAL CASUALTIES IN THE WAR.

Casualties to all ranks of Royal Navy and Royal Naval Reserve, including Mercantile Marine Reserve while serving in H.M. ships and merchant ships, but excluding casualties of the Royal Naval Division and British Mercantile Marine losses:—

	Officers.	Men.
Killed in action or died of wounds	2,074	20,735
Died	400	11,433
Wounded in action	549	3,961
Injured	256	392
Missing	—	2
Prisoners of War	211	824
Interned	51	170
Total	3,541	37,517

Typical Ships.

Type.	Tons.	Main Armament.
<i>Nelson</i> (building)	35,000	8 15-inch
<i>Queen Elizabeth</i> (1915-16)	27,500	8 15-inch
<i>Royal Sovereign</i> (1916-17)	26,750	8 15-inch
<i>King George V.</i> (1912-13)	23,000	10 13 5-inch
<i>Orion</i> (1912)	22,500	10 13 5-inch
<i>Iron Duke</i> (1914)	25,500	10 13 5-inch

Battle Cruisers.

<i>Hood</i> (1920)	41,200	8 15-inch
<i>Tiger</i> (1914)	28,500	8 13 5-inch
<i>Renown</i> (1916)	26,500	6 15-inch

Cruisers.

<i>Kent</i> (building)	18,600	4 15-inch
<i>Birmingham</i> (building) ..	9,750	7 7 5-inch
<i>Adelaide</i> (1922)	5,560	9 6-inch
<i>Arethusa</i> (1914)	3,520	2 6-inch
" <i>3 E</i> " (building)	7,550	7 6-inch
" <i>D</i> " (1918-22)	4,650	6 6-inch
<i>Carlisle</i> (1918-22) ..	4,190	5 6-inch
<i>Ceres</i> (1917-18)	4,190	5 6-inch
<i>Caledon</i> (1917)	4,120	5 6-inch
<i>Centaur</i> (1916)	3,750	5 6-inch
<i>Cambrian</i> (1915-16)	3,750	4 6-inch
<i>Caroline</i> (1915)	3,750	4 6-inch
<i>Chatham</i> (1912-14)	5,400	8 6-inch
<i>Pelorus</i> (1897-1900)	2,235	8 4-inch
<i>Weymouth</i> (1912-12)	5,250	8 6-inch

Fleetilla Leaders.

<i>Scott Class</i> .—Bruce, Campbell, Douglas, Mackay, Malcolm, Montrose, Stuart.
<i>Shakespeare Class</i> .—Broke, Keppel, Shakespeare, Spenser, Wallace.
<i>Kempfenfelt Class</i> .—Abdiel, Anzac, Grenville, Nimrod, Saumarez, Seymour.

Submarines.—Built 63. Building 4.

Sloops, various, 32.

Coastal Motor Boats, 29 (building, 2).

Gunboats 2. River Gunboats, 12 large (2 6-inch guns); 6 small.

WARSHIP LOSSES IN THE WAR.

Allies.....	803,000 displacement tons

n Combined minelayers and minesweepers.

AGE LIMIT FOR WARSHIPS.

The age limits for vessels is counted from the date of completion, and in the case of British vessels the formula that one year's war service is equivalent to two years' peace service has been applied in the case of Cruisers, Destroyers, and Submarines:—

Battleships.....	20 years
Battle cruisers.....	20 "
Aircraft carriers.....	20 "
Cruisers.....	15 "
Destroyers.....	12 "
Submarines.....	10 "
Coastal Motor Boats.....	10 "
Other vessels.....	20 "

TRADE AND NAVAL PROTECTION.

In the House of Commons the Parliamentary Secretary of the Admiralty (Mr. C. G. Ammon, M.P.) stated that the aggregate value of the trade of the British Empire east of Africa was £1,100,000,000 in 1922, and the cost of maintenance of British squadrons (including ships of the Dominions' Navies) in Eastern waters and in the Pacific was £3,542,000 in 1922.

COST OF WARSHIPS.

The cost of a battleship of the latest type, inclusive of torpedoes, ammunition, &c., is approximately £7,000,000. Of this about £3,200,000 is due to labour and £2,100,000 to material, the remainder being due to profit and to establishment charges, such as rent, rates, light, power, maintenance, &c. The cost of a battle cruiser similar to *H.M.S. Hood* would be about £6,000,000, of which approximately £2,700,000 is due to labour and £1,800,000 due to material. The corresponding figures for a modern light cruiser are £2,000,000, £900,000, and £600,000; for a modern destroyer, £325,000, £145,000, £98,000; and for a modern submarine, £400,000, £180,000, £120,000.

ORDER OF WAR MEDALS.

THE Army Council has given instructions that stars and medals approved for service during the Great War will be worn in the following order:—1914 Star or 1914-15 Star; British War Medal; Mercantile Marine War Medal; Victory Medal; Territorial Force War Medal; India General Service Medal (for operations against Afghanistan, 1919).

The Army.

THE WAR OFFICE.

Whitehall, S.W. 1.

The business of the War Office proper appears to have been originally entrusted, about 1620, to a Committee of the Privy Council; the Clerk in attendance on that Committee being the Secretary at War. The Secretary at War had immense power in military matters, as holding the purse; but neither the Commander-in-Chief nor the Board of Ordnance was subject to him. In 1794, a Secretary of State was first appointed. The Office of Secretary at War was not terminated at this date, but, from 1835, it was amalgamated with that of Secretary of State for War until, in 1863, it was formally abolished by Act of Parliament.

In 1801, the Secretary of State for War was also given the business of the Colonies, of which he was relieved in 1854 by the appointment of a Secretary of State for the Colonies.

In 1856, the Commissariat Office, which was only a semi-military branch of the Army with headquarters at the Treasury, was transferred to the War Department; the Board of Ordnance was abolished, after an existence

of more than three centuries; and the Board of General Officers and the Army Medical Department were also successively absorbed into the War Department. The year 1870 witnessed the final welding into one War Office of the civil administrative functions of the Secretary of State and the military administrative functions hitherto exercised at the Horse Guards. In that year, the War Office Act vested the direct and immediate control of every branch of Army administration in the Secretary of State. Before the appointment of a Secretary of State, the military control of the Army was, to a very great extent, in the hands of the Commander-in-Chief, who was subordinated to the Secretary of State from 1895 until the abolition of the Office in 1904. In 1904, an Army Council was created by Letters Patent, and to this Council were thereby transferred all the powers exercised under the Royal prerogative by the Secretary of State for War and the Commander-in-Chief. Statutory powers were transferred by the Army (Annual) Act of 1909 (9 Edw. VII. C. 3).

The Army Council, War Office, Whitehall, S.W. 1.

Secretary of State for War (President of the Army Council), The Right Hon. Sir Laming Worthington-Evans,

Bt., G.B.E., M.P.

THE REGULAR ARMY.

The Regular Army consists of the following units:—

Cavalry.

Household Cavalry.—The Life Guards and the Royal Horse Guards ("The Blues").

Cavalry of the Line.—1st, and 2nd, 3rd & 6th, 4th & 7th Dragoon Guards; 1st & 2nd, 5th & 6th Dragoons; 3rd, 4th, 7th, 8th, 10th, 11th, 13th & 18th, 14th & 20th and 15th & 19th Hussars; 9th, 12th, 16th & 5th and 17th & 21st Lancers.

Royal Regiment of Artillery.

Royal Horse Artillery.—Batteries, distinguished by letters.

Royal Field Artillery.—Batteries, distinguished by numbers.

Royal Garrison Artillery.—Companies, distinguished by numbers.

Royal Malta Artillery.—Permanent duty in Malta.

Corps of Royal Engineers.

The Corps consists of Electric, Field, Fortress, Postal, Printing, Railway, and Survey Companies, Bridging Train, &c.

Royal Corps of Signals.

The Corps consists of Cavalry and other Divisional Signals, Wireless Companies, Anti-Aircraft Section, &c.

Infantry Regiments.

The Foot Guards.—The Grenadier Guards (3 Battalions); the Coldstream Guards (3 Battalions); the Scots Guards (2 Battalions); the Irish Guards (1 Battalion); the Welsh Guards (1 Battalion).

Line Regiments.—49 English Regiments (2 Battalions each); 3 Welsh Regiments (2 Battalions each); 10 Scottish (5 Highland and 5 Lowland) Regiments (2 Battalions each); and 2 Irish Regiments (2 Battalions each); with the West India Regiment (2 Battalions) and the West African Regiment (1 Battalion).

The Royal Tank Corps.
Headquarters, Wool, Dorset.

The Royal Army Service Corps.
Buller Barracks, Aldershot.

The Royal Army Medical Corps.
Crookham Camp, Aldershot.

The Army Dental Corps.
Woking.

The Royal Army Ordnance Corps.
Elisea Barracks, nr. Cosham.

The Royal Army Veterinary Corps.
Caxton House, Tothill St., Westminster, S.W. 1.

The Royal Army Chaplains' Department.
War Office, S.W. 1.

Queen Alexandra's Imperial Military Nursing Service.
Under the Presidency of Queen Alexandra.

The Royal Army Pay Corps.
War Office, S.W. 1.

The Corps of Military Accountants.
80, Pall Mall, S.W. 1.

The Army Educational Corps.
School of Education, Shorncliffe.

The Corps of Military Police.
Mytchett Hutments, Ash Vale, Aldershot.

THE AUXILIARY FORCES.

THE MILITIA.

In 1907 the "Old Constitutional Force" known as the "Militia" was transformed into the "Special Reserve," but the following Militia units were retained:—The Bermuda Militia Artillery, the Channel Islands Militia, and the Malta Militia. In 1921 the terms "Special Reserve (and Extra Reserve) Battalions" were abolished, and "Militia" restored, but no appointments are at present made to the force, which comprises the following units:—

Artillery.—R. F. A. and R. G. A.

Royal Engineers.—All branches.

Infantry.—The 3rd Battalion of Infantry Regiments of the Line (and in some cases the battalion next in numerical order) is specially retained as Militia.

Militia in the War.—At the outbreak of the Great War all units were embodied, the majority being included in Defence Schemes. One or two units served abroad, but, generally speaking, the units were employed as training and reinforcing centres for the Armies in the field.

THE TERRITORIAL ARMY.

In 1907 the "Yeomanry" and the "Volunteers" were transferred into the Territorial Force, which included English, Welsh, and Scottish Cavalry; Royal Horse, Royal Field, and Royal Garrison Artillery; Royal Engineers; Infantry; Royal Army Service Corps and Royal Army Medical Corps. In 1921 the title was changed to "Territorial Army."

Territorials in the War.—The strength of the Territorial Force in July, 1914, was about 265,000. During the Great War 320 new units were formed, and there passed through the ranks of the force about 50,000 officers and 1,000,000 other ranks. The Territorial Force suffered total battle casualties of 27,000 officers, and nearly 600,000 other ranks, of which some 6,600 officers and 106,000 other ranks were killed. Among the war honours gained by officers and men of the Territorial Force were 70 Victoria Crosses.

THE KING'S PRIZE.

The King's Prize at Bisley, 1925, was won by A. Smith, late Sapper R.E., with a score of 226. In 1924 the winner was Pte. D. Burke, Canada, with a score of 230.

STRENGTH OF THE ARMY.

All Ranks.	1925 6.
Regimental Troops (exclusive of India)	143,016
do. do. (Indian Establishment)	62,179
Colonial and Native Indian	3,438
Army Reserve	99,000
Supplementary, do.	23,170
Militia	—
Channel Islands Militia	1,322
Malta and Bermuda, do.	1,577
Territorial Army	186,010
O.T.C. (Officers and Permanent Staff)	1,236
Total	520,948
The corresponding total for 1924-5 was 516,671.	

GREAT WAR CASUALTIES, 1914-1919.

British Empire.

	Deaths.	Wounded.
Gt. Britain and Ireland	743,702	1,693,262

GREAT WAR MEDALS.

Admiralty.

The following Medals have been issued by the ADMIRALTY up to Oct. 4, 1924:—

British War Medals	300,059
Conspicuous Gallantry Medals	208
Distinguished Service Medals	5,579
Meritorious Service Medals	1,055
1914 Stars	12,194
1914-15 Stars	270,627
Victory Medals	449,357

The Admiralty notify that those who have not yet received their medals should make application, enclosing certificates of service, &c., to the Accountant-General of the Navy (Medal Branch), Cornwall House, Stamford Street, London, S.E. 1.

War Office.

The following Medals have been issued by the WAR OFFICE up to Sept. 30, 1925:—

British War Medals.....	5,645,856
Distinguished Conduct Medals	33,131
Meritorious Service Medals	29,337
Military Medals	130,133
Victory Medals	5,104,651
1914 Stars	365,070
1914-15 Stars	2,073,175
Territorial War Medals	32,855

The War Office request that any man entitled to a medal which he has not yet received will apply for it *at once* to The Secretary, War Office, (A.G. 60), 27 Pilgrim Street, London, E.C. 4.

Air Ministry.

The following Medals have been issued by the AIR MINISTRY up to July 31, 1925:—

British War Medals (Silver).....	107,927
Victory Medals (Bronze).....	102,772
Distinguished Flying Medals	147
Air Force Medals.....	142
Meritorious Service Medals.....	892

The Air Ministry notify that anyone who served in the Royal Air Force and who has not yet received medals to which he is entitled, should apply, if an ex-officer, to the Secretary, Air Ministry, Kingsway, W.C. 2; and if an ex-airman, to the Officer-in-Charge, R.A.F. Records, Ruislip, Middlesex.

Board of Trade.

The following Medals have been issued by the BOARD OF TRADE up to Sept. 30, 1925:—

British War Medals (Silver).....	86,387
Mercantile Marine Medals (Bronze).....	114,271

The Board of Trade ask that any person belonging to the Mercantile Marine, including licenced pilots and fishermen, who is entitled to a medal which he has not yet received, shall apply at once to Mercantile Marine Dept. (War Medals Branch), Board of Trade, Cornwall House, Stamford Street, London, S.E. 1.

STRENGTH OF THE AIR FORCE.

The Air Estimates for 1925-6 show an increase of 1,000 in the maximum number of Royal Air Force personnel allowed for the year, with a total of 36,000, against 35,000 in 1924-5. These numbers, exclusive of officers and airmen serving in India, are shown below:—

	1925-6
Air Officers	35
Commissioned Officers.....	3,592
Cadets	130
Warrant Officers	238
Non-Commissioned Officers.....	4,853
Aircraftmen	24,500
Aircraft apprentices.....	2,552
Total	36,000

The numbers recorded above include 4,880 officers and airmen in Educational Services, 1,633 Medical Services, 148 Air Ministry, and 250 in Experimental and Research Department and attached to Auxiliary and Reserve Forces.

Air Force Reserve.

The establishment of the Air Force Reserve is 1,325 officers and 12,000 other ranks in 1925-6. This is an increase on the 1,032 officers and 7,000 other ranks of Permanent Staff, a total of 8,033.

THE AIR PROGRAMME, 1925-26.

GREAT BRITAIN 32 squadrons.
1 seaplane flight and 18 flights Fleet Air Arm.

OVERSEAS:—

India	6 squadrons
East	8 squadrons
East	3 squadrons
East	1 squadron
East	1 squadron
East	1 squadron
East	1 squadron

CIVIL AVIATION.

RETURNS supplied voluntarily by civil aerial transport firms in the United Kingdom for the year 1924 show that for Great Britain and on the Continental route 28,350 flights were made, the mileage totalling approximately 1,073,000, of which 936,000 was over regular air routes. The number of passengers carried was 57,221, and the weight of goods carried amounted to 542 3 tons. During this period 41 pilots were licensed for the first time and 213 licences were renewed, the number of licences current at the end of the year being 149; 83 aircraft were licensed for the first time and 130 licences were renewed, the number of licences for aircraft in force at the end of the year being 188.

The following figures show the proportion of accidents to aircraft flying for hire or reward which resulted in death or injury to occupants:

Accidents reported	2
Approximate machine miles per accident	536,500
Approximate machine flights per accident	14,175

In these 2 accidents 1 pilot and 7 passengers were killed, one pilot and one passenger injured. There were 2 casualties to third parties. In all British civil flying, whether for hire or reward or not, 1 pilot was killed and 2 injured; 7 passengers were killed, 2 injured.

The Church of England.

THE CHURCH ASSEMBLY.

2, Dean's Yard, Westminster, S.W. 1.

(Hours 10 to 5.)

THE CHURCH ASSEMBLY (or "National Assembly of the Church of England") was established in 1920, "to deliberate on all matters concerning the Church of England and to make provision in respect thereof." The Assembly consists of three Houses, composed of Bishops, Clergy, and Laity respectively. The first two Houses consist of the Convocations of Canterbury and York, of which the respective Upper Houses form the *House of Bishops*, and the respective Lower Houses the *House of Clergy*; the *House of Laity* comprises representatives of the Laity of the Provinces of Canterbury and York, elected every five years by the Lay members of the Diocesan Conferences, which consist of representatives elected by members of the Church of England on a roll prepared in each parish.

The Church Assembly is free to discuss any proposal concerning the Church of England, and to make provision in respect of such matters, but where this includes Parliamentary sanction for any alteration contemplated, this authority is to be sought in the manner prescribed by the *Church of England Assembly (Powers) Act, 1919*, often referred to as the "Enabling Act." It is specially provided that any innovation touching doctrinal formulæ, or the services or ceremonies of the Church, or the administration of the Sacraments or sacred rites thereof, must be debated and voted upon by each of the three Houses sitting separately, and must then be either accepted or rejected by the Assembly in the terms in which it is finally proposed by the House of Bishops. It is further laid down that the Assembly or any of the three Houses may debate and formulate its judgment by resolution upon any matter concerning the Church, or otherwise of religious or public interest, but the Assembly may not issue any statement purporting to define the doctrine of the Church on any question of theology. None of the powers belonging to the Convocations of Canterbury and York is to be diminished or derogated by the Assembly, which is also prohibited from exercising any power or performing any function distinctively belonging to the Bishops by right of their episcopal office.

Parochial affairs are managed by Parochial Church Meetings of parishioners who are members of the Church of England and by Church Councils elected by such meetings.

Central Board of Finance.—Receipts in 1924 amounted to £116,519, of which sum Diocesan contributions amounted to £95,460. Below are the principal items of expenditure:—

Training: Ex-Service and civilian	£43,114
Religious education	18,711
Special purposes, including Japanese Church Relief Fund	880
Missionary Council	2,920
Pensions Committee	1,041
Investment of Gifts to Capital	6,623
Reduction of Deficiency from previous years	20,418
General Administration: Convocations, Church Assembly, Central Board, Organisation, &c., committees	12,243

Total expenditure	£115,940
Total receipts	116,519

General Statistics.—The number of baptisms in 1923 was 506,475, the Easter communicants in the various English Dioceses numbered 2,413,874. The total gross income of 12,936 incumbents was £6,228,776, including £194,279 contributed as Easter offerings. The stipends of the assistant clergy were £1,047,070. The amount of voluntary parochial contributions in the 38 dioceses of England was £6,885,605, and the total from all sources £9,589,943.

Sessions in 1926.—Feb. 8 to 12; July 5 to 9; Nov. 15 to 19.

ST. PATRICK'S NATIONAL CATHEDRAL, DUBLIN.

Dean and Ordinary, Very Rev. Hugh Jackson Lawlor, D.D., Litt.D.

GENERAL SYNOD,

Consisting of House of Bishops (13) and House of Representatives (viz., 208 clerical and 416 lay).

Honorary Secretaries, Ven. C. K. Irwin, B.D.; Very Rev. H. B. Kennedy, B.D.; J. A. Maconchy and Major E. H. C. Wellesley.

Secretary to the REPRESENTATIVE CHURCH BODY (INCORPORATED 1870), A. F. Mande, 52 St. Stephen's Green E., Dublin; Asst. Sec. Canon R. A. Kernan, B.D.

By the Act of Union, 1800, the Church of Ireland was united with the Church of England, and the Sovereign, as one of its members, supreme governor on earth. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church, but also took away her endowments, nothing being left but the right to the life services of the Annuitant Bishops and Clergy (which were commuted for a capital sum), the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and curtilage), and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the GENERAL SYNOD, which meets annually.

Subject to the GENERAL SYNOD are 23 Diocesan Synods, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the Diocesan Synod. The Primate is chosen by the House of Bishops from amongst their own number.

The incumbent of the Parish is appointed by a Board of Nomination, consisting of 7 persons, viz. 1—The Bishop, 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan Synod, and 3 parochial nominators (lay) appointed by the registered vestrymen of the parish.

The financial trustees of the Church are the REPRESENTATIVE BODY, composed of the Archbishops and Bishops, 13 clergymen and 26 laymen, chosen by the Diocesan Synods, with 13 co-opted members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property it held was the capital sum £7,581,075, representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The commutation capital on Dec. 31, 1924, was only £61,733, charged with annuities to 19 annuitants. The funds, however, in the custody of the Representative Body amounted in all to £10,136,156, made up of Commutation £61,733, Private Endowments £342,470, Parochial Sustentation £6,840,040, Episcopal Sustentation £571,989, General Synod Funds £637,317, and Miscellaneous purposes £1,683,407.

Since 1869 members of the Church have paid in to the Representative Body a total sum of £9,553,840. The interest of the Diocesan and Parochial Sustentation and other Funds is approximately £343,262. The total amount of assessment for stipend paid by parishes, 1924, was £109,503, and the total amount paid for stipends under Diocesan Schemes was £341,224.

The number of members of the Church of Ireland, by the Census of 1911, was 575,489, or 13.1 per cent. of the entire population.

The Episcopal Church in Scotland.

Registrar of the Episcopal Synod, George J. Wood, W.S., 14 Young Street, Edinburgh.
Churches, Mission Stations, &c., 418. Parsonages, 215. Clergy, 352. Communicants, 59,719.

THE CHURCH OF SCOTLAND by law established is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries, and also from the Universities and lay representatives from the Royal Burghs. It is presided over by a Moderator (chosen annually by the Assembly), to whom the King has granted precedence in Scotland, during his term of office, next after the Lord Chancellor of Great Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £2,000 towards his expenses. The country, for Church purposes, is divided into 16 Synods and 84 Presbyteries, and there are about 1,838 ministers and licentiates engaged in ministerial and other work. The Church population exceeds the aggregate of all the other Presbyterian bodies, and is estimated at about half the whole population of Scotland; the number of communicants on the roll (Dec. 31, 1924) was 200,123. The sum of £272,002 was raised in 1924 for church and missionary purposes. Within the last 80 years 507 chapels, at a cost for stipends and supplementary endowments of over £2,450,000 have been endowed and erected into parishes *quoad sacra*. The parish churches number 1,470. There are in addition 245 churches and mission stations, in all of which worship is regularly conducted.

Until 1560 the Church of Scotland was Roman Catholic, but in that year the Scots Parliament abolished the jurisdiction of the Pope, proscribed the Mass, and ratified a Confession of Faith drawn up by John Knox and other divines. In it all essential articles of the ancient creeds of the Church were adhered to. Ceremonies were declared to be temporary in their nature, and should be altered when they began to foster superstition. Presbyterianism was settled in 1590.

OTHER PRESBYTERIAN CHURCHES.

(1) *The United Free Church of Scotland* was formed by the Union on October 31st, 1900, of the *Free Church of Scotland* and the *United Presbyterian Church*. The United Church, by rearrangement of the Synods and Presbyteries, has 12 Synods and 63 Presbyteries, and 2 Continental Presbyteries. The Supreme Court is the General Assembly, which meets in May every year at the same time as that of the Established Church and of the remnant Free Church of Scotland. In the year ending Dec. 31, 1924, there were 1,461 congregations and 41 preaching stations. The total membership was 534,950, and there were 2,050 Sunday Schools, with 102,023 scholars and 24,888 teachers. In 15 Foreign Mission Fields there are 438 European Mission Agents and 5,603 native pastors, evangelists, and teachers, including in both cases those of the Women's Foreign Mission. The amount raised on the field in 1924 was £104,899. The income of the Church at the close of last financial year 1924 amounted to £1,520,968.—*Moderator* (1925-6), Rev. James Harvey, D.D.—*Office*, 121 George Street, Edinburgh; and 232 St. Vincent Street, Glasgow.

(2) *The Presbyterian Church in Ireland*.—According to the Census of 1911, the members of the various Presbyterian churches in Ireland were 439,876. The largest of these, under the superintendence of the General Assembly, consists of 35 presbyteries, 609 ministers, 559 congregations,

The restoration of the places of the Bishops, civil and ecclesiastical, was, however, sanctioned by the General Assembly of 1610, and three Scottish Bishops were in that year consecrated in London. Further innovations by King James VI. alarmed the people, and the attempt of Charles I. to impose on the Church a Book of Canons and a Liturgy was met by the *National Covenant*, and the restoration of Presbyterian forms, which culminated in the *Westminster Confession of Faith* in 1646. At the Restoration the Church again became Episcopal, but in 1690 the Scottish Parliament re-established Presbyterianism. By the Treaty of Union between England and Scotland (ratified by the English Parliament 6 Anne c. ii.) the Church of Scotland was secured in its Presbyterian form, and the very first official act of a sovereign of the British Empire on his accession is to take an oath to maintain inviolably this settlement. In 1921 Parliament passed the *Church of Scotland Act, 1921*, to declare the lawfulness of certain articles declaratory of the constitution of the Church of Scotland. The articles have been framed with a view to facilitating union among Presbyterian Churches in Scotland. A committee, appointed by the Secretary for Scotland (under the Presidency of Viscount Haldane) enquired into the question of endowments, following upon which the Church of Scotland Property and Endowment Bill was introduced into and was passed into law (25 and 26 Geo. V. c. 133) in 1925.

LORD HIGH COMMISSIONER (1925), The Earl of Elgin and Kincardine, C.M.G., Holyrood Palace, Edinburgh.

MODERATOR (1925), Rev. John White, D.D.
Principal Clerk, Rev. David Paul, D.D., Edinburgh.
Deputy Clerk, Rev. J. A. McClymont, O.B.E., D.D.
Procurator, William Chree, K.C.
Agent, A. L. Menzies, W.S., 54 Castle St., Edinburgh.
Parliamentary Secretary, A. H. Spens, London.

with 109,578 communicants, 93,495 families, 7,647 Sabbath-school teachers, and 102,752 scholars. During the 12 months ended Dec. 31, 1924, this branch contributed by congregational effort £363,221 for religious, charitable, and missionary purposes. The total income for the period for all purposes was £371,502. It possesses two Colleges, with power to confer Theological Degrees, comprising a staff of 12 professors and 2 lecturers, and has 36 ministerial with 3 medical missionaries in foreign parts.—*Moderator*, Rt. Rev. Thomas Haslett, D.D. *General Secretary*, Rev. W. J. Lowe, D.D., Church House, Belfast.

(3) *The Presbyterian Church of England* has 14 presbyteries, 351 congregations, 4 preaching stations, and 85,054 members. It has a Theological College (Westminster College, Cambridge), and supports 87 missionaries abroad, including 42 women. In 1923 the amount raised for all purposes was £371,738.—*Moderator* (1925-6), Rev. Dr. R. C. Gillie, *Gen. Sec.*, Rev. W. Lewis Robertson, M.A., *Fin. Sec.*, Percy Graham, *Church Office*, 15 Russell Square, W.C.1, *Publications Office*, 21 Warwick Lane, Paternoster Row, E.C.4.

(4) The less numerous divisions are: *The Free Church of Scotland*, consisting of those members who did not unite with the U.P. Church; the Reformed Presbyterian Synod, the Eastern Reformed Synod, the United Original Seceders, the Secession Presbytery in Ireland, and the Synod of the Church of Scotland in England.

The Methodist Churches.

UNDER the general designation of METHODISTS are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revds. John and Charles Wesley. The most numerous and influential of them are—

WESLEYAN METHODISTS.

1. *Wesleyan Methodists*, the original body founded in 1739 by these two brothers. The first Conference, consisting of six clergymen and four laymen, was held in 1744. Since then the growth of Methodism has been great, its present adherents being given as 32,000,000. The latest statistics are: Ministers, 57,647; local preachers, 95,695; members and probationers, 10,690,701; Sunday schools, 94,572; officers and teachers, 982,684; scholars, 10,386,134; churches and other preaching places, 101,164. The conference is now composed in its Representative Session of 300 ministers and 300 laymen, with a ministerial president and secretary at its head, elected year by year. The Wesleyans are governed primarily by the Conference, secondarily by the Synods, which are semi-annual meetings of the ministers and selected laymen in each district, over which a chairman is appointed by the Conference, and thirdly by quarterly meetings of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism.—*Pres.*, Rev. J. H. Ritson, D.D.; *Sec.*, Rev. Thomas Kirkup.

THE PRIMITIVE METHODISTS.

2. *The Primitive Methodists*, who sprang up in Staffordshire, in 1810, under the leadership of Hugh Bourne and William Clowes. Owing to the excesses attending certain outdoor services called "camp meetings," the Wesleyan Conference prohibited the continuance of the practice. Bourne and Clowes refused to comply with this decision, and were in consequence expelled. They and their sympathisers banded together in a new body, with enlarged powers for the laity. Next to the Wesleyans they are the most numerous and the most democratic of all the denominations which have arisen out of the Methodist movement.—*President*, Rev. James Lockhart.

THE UNITED METHODIST CHURCH.

3. *The United Methodist Church* was formed by the Union in 1907 of three denominations of Methodists which hitherto had been separate from and independent of each other. These were:—

The Methodist New Connexion, which owed its origin in 1797 to the Rev. Alexander Kilham, one of the early itinerating Wesleyan preachers. He demanded that the members of the societies,

and not the Conference, should be constituted the source of all power in Methodism; and that the Conference should consist of lay as well as ministerial members, all of whom should be elected by the members of the various societies as their delegates. He was expelled by the Conference, and at once founded a new community.

The Bible Christians, founded in 1815 by William O'Bryan, a Wesleyan lay preacher in Cornwall. They existed mainly in the West of England.

The United Methodist Free Churches, which was itself an amalgamation of three different secessions—the Protestant Methodists, formed in 1828; the Wesleyan Methodist Association, which sprang out of a controversy in 1834, concerning the need for a trained ministry; and the Wesleyan Reform Association, founded in 1849, during a great agitation. A strong opposition to the leading Wesleyan officials was organised, which found expression in Conference debates, but more strongly in anonymous and bitter pamphlets, which were widely circulated. On auspicion of being the authors and circulators of these pamphlets three ministers were expelled. They found so many sympathisers that over 100,000 members seceded to found a new denomination.

An Act of Parliament was secured in 1907 to authorise the union of these three denominations into one, to be called the United Methodist Church, and to provide for the government of the Church by a Conference consisting of an equal number of ministers and laymen, elected by districts. The act of union took place in London on September 17, 1907, when the first united Conference was held. About 700 delegates were present. A deed was adopted and signed, declaring the terms of union, defining the constitution and doctrinal tenets, and containing provisions for government and discipline.—*President*, Rev. W. Alexander Grist; *Secretary*, Mr. W. A. Lewins.

INDEPENDENT METHODISTS.

4. *Independent Methodists*.—This body is Congregational in its organisation, with an unpaid Ministry. Its first Conference was held in 1805.

WESLEYAN REFORM UNION.

5. This Union is Methodist in doctrine, Congregational in government, with, if any church desires it, a paid ministry. It is the remnant of the original reformers who seceded from Wesleyan Methodism in 1849. The adherents are mainly in the Midland counties.—*President*, Rev. Edmund Bromage.

The number of Members is for the United Kingdom; of Chapel and Scholars, Great Britain only.

	Ministers	Lay Preachers	Members	On Probation.	Chapels	Sunday Scholars.
Wesleyan Methodists	2,720	19,250	519,180	25,096	8,580	840,205

Wesleyan Reform Union	24	456	8,399	314	186	22,219

The Calvinistic Methodist (Presbyterian) Church of Wales.

THE CALVINISTIC METHODIST OR PRESBYTERIAN CHURCH OF WALES is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. Its form of government being Presbyterian, it is in federation with the Presbyterian Church of England, the United Free Church of Scotland, and the Presbyterian Church of Ireland. It is also a constituent of the Pan-Presbyterian Council or Alliance. It has foreign missions in Assam, India, and in Brittany.

In 1924 the body numbered—churches, 1,491; chapels and other buildings for Sunday-school branches, 1,785; ministers and preachers, 1,151; elders, 7,203; communicants, 188,412; population, 1,556; Sunday-school teachers and officers, 24,499; teachers and scholars, 186,498; adherents (including communicants), 316,545.

Contributions in aid of the Ministry in 1924. £203,318. For various religious purposes (including the ministry), £467,691.

One of the features of the Welsh churches is the Sunday-school, which is attended by adults as well as children; the vernacular is the language used generally in these schools.

The English branch of the Church has 388 chapels and preaching stations, with 35,001 communicants and 88,246 adherents (including communicants). All the rest are Welsh.

The churches in Assam number 1,060; communicants, 60,088; adherents (including communicants), 74,912. The adherents in Brittany are few.

Moderator (South Wales) Synod, Rev. T. E. Roberts, M.A., Aberystwyth; (*North Wales*), Rev. R. Athwy Jones, M.A., Liverpool.

Moderator of General Assembly, Rev. John Owen, West Kirby.

Statistical Secretaries, Rev. Richard Thomas, B.A., Bontnewydd, and Rev. M. J. Mills, Nantymoel.

The Independents and the Baptists.

THE INDEPENDENTS, OR CONGREGATIONALISTS, are the most ancient community of Dissenters. In 1831 the majority of their churches were formed into the Congregational Union of England and Wales, incorporated in 1902, and in 1920 nine districts were formed, each under a Moderator. There are 51 county and other Associations in England and Wales, with 4,701 churches and preaching stations containing 1,727,442 sittings; the number of ministers in the British Isles is 3,062. *Chairman of the Congregational Union of England and Wales*, 1926-27, Rev. W. Newland, M.A., 1925-26, Rev. J. D. Jones, D.D.; *Secretary*, Rev. Sidney M. Berry, D.D. *Chief Clerk*, C. Stanciliff. *Office and Publication Department*, 22, Memorial Hall, Farringdon Street, E.C.4.

The *Connexion of Huntingdon's Connexion*, with 38 chapels and mission stations, is governed by nine trustees assisted by an annual conference of ministers and delegates. *Secretary*, E. Dolby

Shelton. Offices, 41, Holborn Hall, Gray's Inn Road, W.C. 1.

THE BAPTISTS are, in all respects but one, similar to the Congregationalist; they have the same form of Church government, and differ but in one point of practice—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1813. In the British Isles there were, in 1924, 4,169 chapels and 2,066 pastors. The members numbered 413,841, Sunday-school teachers 59,997, and Sunday scholars 530,782. In the United States the "members" alone number 7,879,133. *President of the Baptist Union*, 1924-25, Thomas S. Penny. *Secretary*, Rev. M. E. Aubrey. *Office*, Baptist Church House, Southampton Row, London, W.C. 1.

Minor Religious Denominations.

MINOR RELIGIOUS DENOMINATIONS.—The chief are the Unitarians, with about 350 ministers, 345 chapels and other places of worship. *Gen. Sec.*, Rev. S. H. Mellone, D.Sc., Essex Hall, Essex Street, W.C.2. The Brethren (divided into two bodies, "Open" and "Exclusive") number about 80,000, of whom five-eighths belong to the "Open" body. The Society of Friends (Quakers), consists of 19,039 members and has 380 places of worship in Great Britain, with 27 places of worship in Ireland and 2,237 members. *Central Offices (Great Britain)*, Friends' House, Euston Rd., N.W. 1, (Ireland), 6 Eustace Street, Dublin. The Churches of Christ have 14,277 members and 186 churches in the British Isles, with 159 Sunday Schools, 1,719 teachers, and 16,811 scholars. The Moravian Church (*Offices*, 22 Fetter Lane, E.C.), has in the U.K. 43 congregations and preaching stations, with 3,491 communicants. The Catholic Apostolic Church has above 80 churches, including a fine Gothic building in Gordon Square, W.C.; the New Church (Swedenborgian), 75 societies, with about 6,700 registered members; the Latter-Day Saints (Mormons) have 82 churches. The Reformed Episcopal Church originated in the U.S.A. (1873) and uses a revised Prayer Book; it is now working on Evangelical lines in U.S.A., Canada, Great Britain and India. *Presiding Bishop in*

England, Rt. Rev. F. Vaughan, D.D., Ch. Ch. Rectory, Harlesden, N.W. 10; *Assist. Bishop*, Rt. Rev. J. Louis Fenn, LL.D., St. Jude's Church, Balham, S.W. 17; *Gen. Sec.*, Rev. J. C. Magee, Ch. Ch. Parsonage, Liscard, Wallasey. The Old Roman Catholic Church: *Archbishop in Great Britain*, Most Rev. Bernard Mary Williams, The Edge, Stroud, Glos. The Greeks (*Bishop of Western Europe and the United Kingdom*, Metropolitan of Thyatira Germanos; *Great Archimandrite*, Very Rev. C. Pagonis, St. Sophia's Vicarage, Moscow Road, W. 2) have churches in London, Manchester, Liverpool, and Cardiff. The Armenians have a church in London (St. Sarkis, Inverna Gardens) and in Manchester; the French, Dutch, Swedes, and Swiss in London, Norwich, and Canterbury; and there is a mosque for Moslems in Melrose Road, Southfields.

The Jews.—Among the inhabitants of the United Kingdom are about 300,000 Jews, mainly in London and other large towns, who possess 300 synagogues, with about 200 ministers and readers. *Chief Rabbi*, Very Rev. Dr. J. H. Hertz. *Chief Rabbi's Office*, 4, St. James's Place, Aldgate, E.C.3. The Jews support their own poor. Their number throughout the world is computed at 15,000,000.

IN *England and Wales* there are 4 Archbishop and 13 Episcopal Sees; in *Scotland* 2 Archbishop and 4 Episcopal Sees; in *Ireland* 4 Archbishop and 24 Episcopal Sees. In the *British Empire* there are 38 Archbishop and 128 Episcopal Sees, with 55 Vicariates and 13 Prefectures.

The *Catholic Directory* of 1926 estimates the Catholic population of *England and Wales* (1924) at 1,997,280, *Scotland* 601,304, *Ireland* (Census figures 1911) 3,242,670. The figures for *India* (1921) are 2,046,931, *Ceylon* (1921) 363,986, *Canada* (1921) 3,383,663, *Australian Commonwealth* (1921) 1,172,661, *New Zealand* (1921) 165,577, and *Union of South Africa* 164,632, the total for the *British Empire* being 5,176,529; and the Catholic population of the world is estimated at 324,328,408.

Matthews. *By Lincoln's Inn*, Hon. Mr. Justice Tomlin. *By Inner Temple*, W. R. Boushield. *By Middle Temple*, Sir Robert A. McCall. *By Gray's Inn*, Lord Justice Atkin. *By Law Society*, Dr. C. Mackintosh, Sir Arthur C. Peake. *By Corporation of London*, J. R. Pake-man. *By London County Council*, Sir Wm. J. Collins, Sir John Gilbert. *By City and Guilds of London Institute*, Dr. G. N. Pitt. *By the Faculties—(Theology)*, Rev. Prof. H. T. Andrews; (*Arts*), Prof. H. G. Atkins, Prof. E. A. Gardner, Prof. M. J. M. Hill, Miss M. J. Tuke; (*Laws*), Prof. H. C. Gutteridge; (*Music*), Sir Hugh P. Allen; (*Medicine*), Lord Dawson of Penn, H. L. Eason, Sir H. J. Waring; (*Science*), Prof. H. B. Baker, Prof. L. N. G. Filon, J. L. S. Hutton, Prof. F. Horton; (*Engineering*), Prof. E. G. Coker; (*Economics*), Prof. Graham Wallas.

Organisation of Teaching.

On January 1, 1907, University College was transferred to the University, of which it now forms an integral part in the Faculties of Arts, Laws, Medicine, Science, Engineering, and Economics. On January 1, 1910, King's College was, in respect of all its Departments except that of Theology, transferred to the University, of which it now forms an integral part, in the Faculties of Arts, Laws, Medicine, Science, Engineering, and Economics. The Theological Department of the College remains a "School of the University" in the Faculty of Theology. Other University Institutions are the Brown Animal Sanatory Institution in Wandsworth Road, Goldsmiths' College at New Cross, the Francis Galton Laboratory for National Eugenics at University College, the Bartlett School of Architecture at University

College, and the Institute of Historical Research in Malet Street.

TEACHING STAFF.

The numbers of the "Appointed" and "Recognised" Teachers in the several Faculties are as follows:—

Theology, 0 and 22; *Arts*, 77 and 121; *Laws*, 5 and 13; *Music*, 0 and 30; *Medicine*, 27 and 353; *Science*, 88 and 223; *Engineering*, 10 and 76; *Economics*, 31 and 16.

UNIVERSITY PROFESSORS.

Accountancy and Business Methods (Cassel), L. R. Dicksee, M.Com., F.C.A.
Anatomy, E. Barclay-Smith, M.D.; W. E. Le Gros Clark, F.R.C.S.; J. E. S. Frazer, F.R.C.S.; T. B. Johnston, M.B.; Mrs. Lucas Keene, M.B.; F. G. Parsons, F.R.C.S.; G. Elliot Smith, M.D., F.R.S.; W. Wright, D.Sc.
Anatomy (Courtauld), T. Yeates, M.B.
Morbid Anatomy, H. M. Turnbull, D.M.
Applied Mathematics and Mechanics (Goldsmid), L. N. G. Filon, D.Sc., F.R.S.
Arabic, Sir T. W. Arnold, C.I.E., Litt. D.
Archæology (Yates), E. A. Gardner, Litt. D.
Architecture, A. E. Richardson, F.R.I.B.A.
Aviation (Zaharoff), L. Baird, C.B.E., F.R.S.
Bacteriology, J. W. H. Eyre, M.D.; J. C. G. Ledingham, C.M.G., D.Sc., F.R.S.
Bacteriology (Goldsmiths' Company's), W. Bulloch, M.D., F.R.S.
Banking and Currency (Cassel), (vacant).
Biochemistry, E. C. Dodds, Ph.D.; J. C. Drummond, D.Sc.; A. Harden, D.Sc., F.R.S.
Botany, F. E. Fritch, Ph.D.; R. R. Gates, Ph.D.; Dame Helen C. I. Gwynne-Vaughan, D.B.E., D.Sc.
Botany (Hildred Cartile), W. Neilson-Jones, M.A.
Botany (Quain), F. W. Oliver, D.Sc., F.R.S.
Chemistry, A. J. Allmand, M.C., D.Sc.; C. S. Gibson, O.B.E., M.Sc.; T. S. Moore, M.A.; J. R. Partington, M.B.E., D.Sc.; R. H. Aders Plimmer, D.Sc.; C. K. Tinkler, D.Sc.; W. B. Tuck, D.Sc.
Chemistry (Daniell), S. Smiles, O.B.E., D.Sc., F.R.S.
Chemistry (General), F. G. Donnan, C.B.E., D.Sc., F.R.S.
Chemistry (Organic), J. Norman Collie, D.Sc., F.R.S.
Chinese, J. P. Bruce, D.Lit.
Classics, J. H. Sleeman, M.A.; J. A. K. Thomson, M.A.
Commerce, A. J. Sargent, M.A.
Commercial and Industrial Law (Cassel), H. C. Gutteridge, M.A.
Comparative Law (Quain), J. E. G. de Montmorency, LL.B.
Constitutional Law, J. H. Morgan, M.A.
Dutch History and Institutions, Pieter Geyl, Lit.D.
Education, C. L. Burt, D.Sc.; T. P. Nunn, D.Sc.; J. D. Wilson, M.A.
Egyptology (Edwards), Sir Flinders Petrie, D.O.L., F.R.S., F.B.A.
Embryology, J. P. Hill, D.Sc., F.R.S.
Engineering, W. E. Dalby, B.Sc., F.R.S.
Chemical Engineering (Ramsay Memorial), E. C. Williams, M.Sc.
Civil Engineering, A. H. Jameson, M.Sc., M.I.C.E.
Civil and Mechanical Engineering, E. G. Coker, D.Sc., F.R.S.; E. H. Lamb, D.Sc., M.Sc.
Electrical Engineering, J. A. Fleming, D.Sc., F.R.S.; J. T. MacGregor-Morris, M.I.E.E.
Do. (Siemens), Ernest Wilson, M.I.E.E.
Mechanical Engineering, G. Cook, D.Sc.

Municipal Engineering (Chadwick), M. T. M. Ormsby, F.R.C.Sc.
English Bibliography, A. W. Pollard, C.B., D.Litt.
English Lang. and Literature, Sir I. Gollancz, Litt.D., F.B.A.; J. R. A. Nicoll, M.A.
Do. (Quain), R. W. Chambers, D.Lit.
English Law, E. Jenks, D.C.L.
English Literature (Hildred Cartile), Miss C. F. E. Spurgeon, Litt.D.
Ethnology, C. G. Seligman, M.D., F.R.S.
Eugenics (Galton), Karl Pearson, LL.D., F.R.S.
Fine Art (Slade), Henry Tonks, F.R.C.S.
French and Romance Philology (Fielden), L. M. Brandin, Ph.D.
French Lang. and Literature, F. J. Tanqueray, D.-ès-L.
French Literature, F. Y. Eccles, M.A.
Geography, L. R. Jones, M.C., Ph.D.; L. W. Lyde, M.A.; J. F. Unstead, D.Sc.
Geology, W. T. Gordon, D.Sc., F.R.S.E.
Geology (Yates-Goldsmid), E. J. Garwood, sc.D., F.R.S.
German, H. G. Atkins, D.Lit.; R. C. Priebsch, Ph.D.; J. G. Robertson, Ph.D.
Greek, M. T. Smiley, M.A.
Helminthology, R. T. Leiper, D.Sc., F.R.S.
History, Miss Hilda Johnstone, M.A.; Miss C. A. J. Skeel, D.Lit.
Central European History (Masaryk), R. W. Seton-Watson, D.Litt.
Economic History, Mrs. L. C. A. Knowles, Litt.D.
English History, A. F. Pollard, Litt.D., F.B.A.
History & Culture of British Dominions in Asia, &c., H. H. Dodwell, M.A.
History of Art, C. T. Borenius, Ph.D.
Imperial History (Rhodes), A. P. Newton, D.Lit.
Medieval History, F. J. C. Hearnshaw, LL.D.
Modern French History and Institutions, Paul Vaucher, L-ès-L.
Modern Greek & Byzantine History, &c. (Korais), (vacant).
Hygiene (Chadwick), (vacant).
International Relations (Cassel), P. J. N. Baker, M.A.
Italian, E. G. Gardner, Litt. D., F.B.A.
Latin, H. E. Butler, M.A.
Latin (Hildred Cartile), H. Williamson, M.A.
Logic & Scientific Method, A. Wolf, D.Lit.
Mathematics (Astor), G. B. Jeffery, D.Sc.
Mathematics, B. B. Baker, D.Sc.; H. Hilton, D.Sc.; A. E. Jolliffe, M.A.; S. A. F. White, M.A.
Medical Zoology, A. W. Alcock, C.I.E., LL.D., F.R.S.
Medicine, T. R. Elliott, C.B.E., D.S.O., M.D., F.R.S.; A. W. M. Ellis, O.B.E., M.D.; F. R. Fraser, M.D.; F. S. Langmead, M.D.; H. MacLean, M.D.
Music (King Edward), P. C. Buck, Mus. Doc., M.A.
Myology, E. S. Salmon.
Obstetrics and Gynecology, Miss A. L. McIlroy, O.B.E., M.D.
Pathology, Sir F. W. Andrewes, O.B.E., M.D., F.R.S.; J. H. Dible, M.B.; L. S. Dudgeon, C.M.G., C.B.E., F.R.C.P.; J. McIntosh, M.D.
Pathology (Graham), A. E. Boycott, D.M., F.R.S.
Pathology (Dunn), Adrian Stokes, D.S.O., O.B.E., M.D.
Experimental Pathology, C. J. Martin, C.M.G., D.Sc., F.R.S.; Sir Almoth E. J. Wright, K.B.E., C.B., M.D., F.R.S.
Persian, Sir Denison Ross, C.I.E., Ph.D.
Pharmaceutics, H. G. Greenish, D.-ès-Sc., F.I.C.
Pharmacology, A. J. Clark, M.C., M.D.
Philosophy, H. Wildon Carr, D.Lit.
Philosophy of Mind and Logic (Grice), C. E. Spearman, Ph.D., F.R.S.
Social Philosophy, E. J. Urwick, M.A.

Phonetics, Daniel Jones, M.A.
Physics, A. Griffiths, D.Sc.; F. L. Hopwood, D.Sc.; F. Horton, D.Sc., F.R.S.; C. H. Lees, D.Sc., F.R.S.; A. W. Porter, D.Sc., F.R.S.; O. W. Richardson, D.Sc., F.R.S.
Physics (Hilared Cartile), W. Wilson, D.Sc., F.R.S.
Physics (Joel), S. Russ, D.Sc.
Physics (Quatin), (vacant).
Do. (Wheatstone), E. V. Appleton, D.Sc.
Physiology, B. J. Collingwood, O.B.E., M.D.; Miss W. C. Cullis, O.B.E., D.Sc.; C. A. Lovatt Evans, D.Sc., F.R.S.; R. J. S. McDowall, D.Sc.; J. Mellanby, M.D.; V. H. Mottram, M.A.; M. S. Pembrey, M.D., F.R.S.; H. E. Roaf, M.D.; S. Vincent, M.D.
Physiology (Jodrell), A. V. Hill, O.B.E., Sc.D., F.R.S.
Political Economy, E. Cannan, J.L.D.; H. S. Foxwell, M.A., F.B.A.
Portuguese Language, Literature and History (Camões), Edgar Prestage, D.Litt.
Public Administration, Rt. Hon. Sidney J. Webb, LL.B., M.P.
Russian Language, Literature and History, Sir Bernard Pares, K.B.E., M.A.
Sanskrit, R. L. Turner, M.C., M.A.
Sculpture, (vacant).
Sociology (Martin White), L. T. Hobhouse, D.Litt., F.B.A.; E. A. Westernmark, Ph.D.
Statistics, A. L. Bowley, Sc.D., F.B.A.
Surgery, C. C. Choyce, C.M.G., C.B.E., M.D.; G. E. Gask, C.M.G., D.S.O., F.R.C.S.; C. A. Pannett, M.D.
Swahili and the Bantu Languages, Miss Alice Werner, LL.A.
Town Planning, S. D. Adshead, M.A., F.R.I.B.A.
Veterinary Pathology and Bacteriology, Sir John McFadyean, LL.D., F.R.S.E.
Zoology, C. L. Boulenger, D.Sc.; J. S. Huxley, M.A.
Zoology and Comparative Anatomy (Jodrell), D. M. S. Watson, M.Sc., F.R.S.

UNIVERSITY COLLEGE, Gower Street, W.C. 1.
Chairman of Committee, Viscount Chelmsford.
Provost, Sir Gregory Foster.

The College comprises the Faculties of Arts, Laws, Medical Sciences, Engineering and Economics, and the following Special Schools:—The Bartlett School of Architecture (incl. Department of Town Planning), the Slade School of Fine Art (Drawing, Painting and Sculpture), and the School of Librarianship.

KING'S COLLEGE, Strand, W.C. 2.
Chairman of Delegacy, Viscount Hambleden.
Principal, Ernest Barker, LL.D.

The College comprises the Faculties of Arts, Laws, Medicine, Science, Engineering and Economics.

KING'S COLLEGE FOR WOMEN.
Household and Social Science Department,
 Campden Hill Road, W. 8.

Dean, Helene Reynard, M.A.

GOLDSMITHS' COLLEGE, New Cross, S.E. 14.
Warden, T. Raymont, M.A.

SCHOOLS OF THE UNIVERSITY.

In the Faculty of Theology:—
Hackney and New College, Hampstead (Congregational).
Principal, Rev. A. E. Garvie, D.D.
Regent's Park College, N.W. 8 (Baptist).
Principal, Rev. H. Wheeler Robinson, M.A.

King's College (Theological Department),
 Strand, W.C. 2 (Church of England).
Dean, Rev. W. R. Matthews, D.D.
Wesleyan College, Richmond (Wesl. Methodist).
Principal, Rev. W. T. A. Barber, D.D.
St. John's Hall, Highbury (Church of England).
Principal,
Arts, Science, and Engineering:—
East London College, Mile End Road, E.
Principal, John L. S. Hatton, M.A.

Arts and Science:—
Royal Holloway College, Englefield Green.
Principal, Miss Ellen C. Higgins, B.A.
Bedford College for Women, Regent's Park, N.W. 1.
Principal, Miss M. J. Tuke, M.A.
Birkbeck College, Bream's Buildings, E.C. 4.
(For evening and part-time students.)
Principal, George Senter, D.Sc.

Arts:—
Westfield College, Hampstead, N.W. 3.
Principal, Miss Eleanor C. Lodge, M.A.
Arts—in Pedagogy only:—
London Day Training College, Southampton Row, W.C. 1.
Principal, Prof. T. P. Nunn, D.Sc.
Arts—in Oriental Research only:—
School of Oriental Studies, Finsbury Circus, E.C. 2.
Director, Prof. Sir Denison Ross, C.I.E., Ph.D.
Medicine:—
 The Medical Schools of certain Hospitals, &c.
 (see p. 271).

Science and Engineering:—
Imperial College of Science and Technology:—
Royal College of Science and Royal School of Mines.
Rector, Sir Thomas H. Holland, K.C.S.I., K.C.I.E., F.R.S.

City and Guilds (Engineering) College.
Dean, Prof. W. E. Dalby, M.A., F.R.S.
Science—in Agriculture only:—
South-Eastern Agricultural College, Wye, Kent.
Principal, Robert M. Wilson, B.Sc.
Arts (in Anthropology, History, Sociology and Geography only), Laws and Economics and Political Science:—

London School of Economics and Political Science,
 Houghton Street, Aldwych, W.C. 2.
Director, Sir William H. Beveridge, K.C.B., B.C.L.
THE UNIVERSITY OF DURHAM, 1832.
Chancellor, The Earl of Durham, K.G.
Vice-Chancellor, Sir Theodore Morison, K.C.S.I., K.C.I.E., O.B.E., D.C.L.
Princors, Rev. H. Ellershaw, M.A.; H. J. Hutchens, D.S.O., M.A.
Registrar, H. G. Theodosius, M.A.
Librarian, E. V. Stocks, M.A.
Hon. Director of Observatory, Harold Thomson, M.Sc., F.R.A.S.
Observer, Frank Sargent, F.R.A.S.

UNIVERSITY COLLEGE, Durham.
Master, Rev. Henry Ellershaw, M.A.
HATFIELD COLLEGE, Durham.
Master, Arthur Robinson, D.C.L.

ST. CHAD'S COLLEGE, Durham.
Principal, Rev. S. R. P. Mousdale, B.D.
ST. JOHN'S COLLEGE, Durham.
Principal, Rev. C. S. Wallis, M.A.

ST. MARY'S COLLEGE, Durham.
Principal, Miss R. E. D. Donaldson, M.A.
BRIDE COLLEGE, Durham.
Principal, Rev. E. E. Bruley, M.A.

ST. HILD'S COLLEGE, Durham.

Principal, Miss E. C. Christopher, M.A.
NEVILLE'S CROSS COLLEGE, Durham.
Principal, Miss Z. G. D. May, M.A.

NON-COLLEGIATE STUDENTS.

Censor, Rev. N. D. Coleman, M.A.
HOME STUDENTS (Women).
Censor, Kathleen Lambley, M.A.

COLLEGE OF MEDICINE, Newcastle.

President, Sir David Brummond, C.B.E., M.D.

ARMSTRONG COLLEGE, Newcastle.

Principal, Sir Theodore Morison, K.C.S.I., K.C.I.E., C.B.E., D.C.L.

THE VICTORIA UNIVERSITY OF MANCHESTER. (£3,000.)

Founded 1850; re-organised 1880 and 1903.

Chancellor, The Earl of Crawford and Balcarres, K.T., LL.D.

Vice-Chancellor, Sir Henry A. Miers, D.Sc., F.R.S.

Senior Pro Vice-Chancellor, Edward Fiddes, M.A.

Internal Registrar, Norman Smith, D.Sc.

External Registrar, H. P. Turner, M.A.

Bursar, Sydney Chaffers, M.A.

Adviser to Women Students, Phyllis E. Crump, M.A.

Chairman of Convocation, H. P. Turner, M.A.

Clerk of Convocation, A. E. G. Chorlton, LL.B.

Tutor and Sec., Faculty of Arts, J. A. Petch, M.A.

Tutor and Sec., Faculty of Science, J. E. Myers, C.B.E., D.Sc.

Tutor and Sec., Faculty of Medicine, B. A. McSwiney, M.B.

TRAINING DEPARTMENT (for Men and Women).

Professor and Director of Dept., H. Bompas Smith, M.A.

HALLS OF RESIDENCE.

Men—Dalton Hall, *Princ.*, G. A. Sutherland, M.A.

"—Hulme Hall, *Warden*, Rev. T. Nicklin, M.A.

"—St. Anselm's Hall, *Warden*, Rev. Lindsay Dewar, B.D.

"—Lancashire Independent College, *Princ.*, Rev. A. T. Grieve, D.D.

Women—Ashburne Hall, *Warden*, Mrs. Hope Hogg, M.A.

"—Lees Hall, *Warden*, Miss Elsie A. Underwood, B.Sc.

"—Ellis Llwyd Jones Hall, *Warden*, Miss C. Spurling, M.A.

"—Langdale Hall, *Warden*, Miss J. M. Hughes, B.A.

"—St. Gabriel's Hall, *Warden*, Miss F. Whatley.

THE UNIVERSITY OF BIRMINGHAM.

Birmingham, 1900. (£2,000.)

Chancellor, Rt. Hon. Viscount Cecil of Chelwood, K.C.

Vice-Chancellor, Sir Gilbert Barling, Bart., C.B., C.B.E., F.R.C.S.

Principal, C. Grant Robertson, C.V.O., LL.D.

Registrar, John H. Costain, M.A.

Secretary, C. G. Burton.

THE UNIVERSITY OF LIVERPOOL.

Liverpool, 1903. (£3,000.)

Chancellor, The Earl of Derby, K.G., G.C.B., G.C.V.O., LL.D.

Vice-Chancellor, J. George Adami, C.B.E., M.D., F.R.S.

Registrar, Edward Carey, LL.B.

Librarian, John Sampson, D.Litt.

HALLS OF RESIDENCE.

Men—Warden, W. S. Angus, B.A.

Women—Warden, Miss D. Chapman, M.A.

THE UNIVERSITY OF LEEDS.

Leeds, 1904. (£60,000.)

Chancellor, The Duke of Devonshire, K.G., G.C.M.G., G.C.V.O., LL.D.

Pro-Chancellor, E. G. Arnold, LL.D.

Vice-Chancellor, J. B. Baillie, O.B.E., D.Ph.

Accountant, E. J. Brown, B.Com.

Clerk to the Senate, F. T. Baines, B.A.

Registrar, A. E. Wheeler, M.A.

Librarian, R. Offer, B.A.

UNIVERSITY OF SHEFFIELD. 1905. (£2,000.)

Chancellor, The Marquess of Crewe, K.G.

Pro-Chancellors, Lt.-Col. H. K. Stephenson, D.S.O., LL.D.; Sir William E. Clegg, C.B.F., LL.D.

Vice-Chancellor, Sir W. Henry Hadow, C.B.E., D.Mus., LL.D.

Treasurer, D. Vickers, D.Eng.

Registrar, W. M. Gibbons, O.B.E., M.A.

Librarian, A. P. Hunt, B.A.

Curator of the Observatory, R. R. S. Cox, M.A.

Tutor for Women Students, Mrs. Storr-Best, M.A.

HALLS OF RESIDENCE.

Men—Stephenson Hall, *Warden*, Rev. E. H. Ward, M.A.

Women—Oakholme Univ. Hall, *Warden*, Miss F. E. Hollis.

"—Tipton Cliffe Univ. Hall, *Warden*, Miss W. A. Bone, B.A.

"—Endcliffe Univ. Hall, *Warden*, Miss G. M. Hadley, B.A.

TRAINING DEPARTMENT (for Men and Women).

Professor, G. H. Turnbull, Ph.D.

UNIVERSITY OF BRISTOL. 1909.

Chancellor, Viscount Haldane, K.T., O.M., LL.D.

Vice-Chancellor, Thomas Loveday, M.A.

Treasurer, S. H. Badcock, J.P.

Registrar, E. G. Francis, M.A.

Agricultural and Horticultural Research Station, Long Ashton.

Director, Professor B. T. P. Barker, M.A.

Fruit and Vegetable Preserving Station, Chipping Camden.

Resident Director, A. Appleyard, M.Sc.

Department of Education.

Professor of Education, Helen M. Wodehouse, D.Phil.

Master of Method, T. S. Foster, M.A.

Mistress of Method, Miss A. Mullock, M.Sc.

HALLS OF RESIDENCE.

Men—Mortimer House and Canynge Hall.

Women—Clifton Hill House.

" (Dept. of Education)—4 Hostels.

EAST MIDLANDS UNIVERSITY.

(In process of formation.)

NOTTINGHAM UNIVERSITY COLLEGE,

Nottingham (1880).

Principal, W. H. Heaton, M.A.

Registrar, J. E. Shinfield.

HALLS OF RESIDENCE.

Men—Mapperley Hall and Waverley House.

Women—Cavendish House and Hollygirt House.

LEICESTER, LEICESTERSHIRE AND RUTLAND UNIVERSITY COLLEGE, Leicester.

(1921).

Principal, R. F. Rattray, Ph.D.

Secretary, W. G. Gibbs.

Women Students' Hostel.

Warden, Miss C. Laycock.

UNIVERSITY EXTENSION.

The Universities of Oxford, Cambridge, London, Manchester, Liverpool, Leeds, Bristol, Durham, Birmingham, and Nottingham organise courses of University Extension Lectures, followed by class work and examinations, in all parts of the kingdom. Full particulars may be obtained from the following:—

Oxford, Rev. F. E. Hutchinson, M.A., Delegacy for Extra-Mural Studies, Acland House, Oxford.
Cambridge, Rev. D. H. S. Cranage, Litt.D., Syndicate Buildings.
London, John Lea, M.A., University Extension Registrar, University of London.
Manchester, the External Registrar.
Liverpool, Secretary, University Extension Board.
Leeds, Secretary, University Extension Committee.
Bristol, W. A. Nicholson, M.A., Extra-Mural Dept.
Durham, Secretary, Extra-Mural Dept.
Birmingham, Secretary, Extra-Mural Dept.
Nottingham, Professor R. Peers, M.A., Univ. Coll., Nottingham.

ENGLISH UNIVERSITY COLLEGES.

BEDFORD COLLEGE FOR WOMEN.

(See University of London.)

BRISTOL—MERCHANT VENTURERS' TECHNICAL COLLEGE.

Principal, Prof. Andrew Robertson, D.Sc.
Secretary, W. W. Ward, LL.D.
Registrar, Kate L. Ford.

CHELTENHAM—LADIES' COLLEGE.

Principal, Miss Beatrice M. Sparks, M.A.
Vice-Principal, Miss O. F. Martin, M.A.
Secretary, Lt.-Col. J. F. Tarrant.

EXETER—UNIVERSITY COLLEGE OF THE SOUTH WEST OF ENGLAND.

President, H.R.H. the Prince of Wales, K.G.
Deputy President, Sir Hy. Y. B. Lopes, Bt., M.A., D.L.

Principal, W. H. Moberly, D.S.O., M.A.
Sec. and Registrar, A. K. Woodbridge.

TEACHERS' TRAINING DEPARTMENT (Men and Women).

Head of Dept., Prof. S. H. Watkins, Ph.D.
Tutor to Women Students, Miss A. J. Walker, M.A.

LONDON—QUEEN'S COLLEGE.

43, 45 & 47 Harley Street, W. 1.

Principal, Joseph Edwards, M.A.
Dean, Rev. T. W. Crafer, D.D.
Warden, Miss C. E. Lever, B.A.
Librarian, Prof. K. J. Spalding, M.A.
Bursar, Prof. P. A. Ellis Richards, F.I.C.

MANCHESTER—MUNICIPAL COLLEGE OF TECHNOLOGY.

Principal, B. Mouat Jones, D.S.O., M.A.
Registrar, J. A. Binks.

NEWCASTLE-UPON-TYNE—ARMSTRONG COLLEGE. (See University of Durham.)

READING—UNIVERSITY COLLEGE.

(£26,500.)

Principal, W. M. Childs, M.A.
Registrar, Rev. F. H. Wright, M.A.
Halls of Residence—Wantage Hall and St. Patrick's Hall (for Men); St. Andrew's Hall, Wessex Hall, St. George's Hall, and Cintra Lodge (for Women); St. David's Hall (Home Students and Students in Licensed Lodgings).

SOUTHAMPTON—UNIVERSITY COLLEGE.

Principal, Kenneth H. Vickers, M.A.

Registrar, George Grant, B.A.

HALLS OF RESIDENCE

(Men) South Stoneham, Warden, Prof. A. A.

Cock, B.A.

(Women) Highfield Hall, Warden, Miss Aubrey, M.A.; South Hill, Warden, Mrs. Ashdown.

The University of Wales, 1893.

Chancellor, H.R.H. The Prince of Wales, K.G. (1921).

Pro-Chancellor, The Lord Kenyon, K.C.V.O.

Vice-Chancellor, Principal T. Franklin Sibly, D.Sc.

Warden, Guild of Graduates, Miss F. M. Rees, B.A.
Registrar, D. B. Anthony, M.A. (Cathays Park, Cardiff).

Sec., University Council, Jenkin James, M.A.

Treas., Guild of Graduates, F. E. Rees, B.Sc.

Clerk, Guild of Graduates, John Hughes, M.A.

Representative in Parliament, Ernest Evans, LL.B.

I. UNIVERSITY COLLEGE OF WALES—

Aberystwyth (1872).

Principal, J. H. Davies, M.A.

General Secretary, J. L. Newbon

Academic do., G. J. Walker.

Librarian, J. D. Williams, B.A.

HALLS OF RESIDENCE FOR WOMEN.

Senior Warden, Miss K. Guthkeloh, B.A.

MEN STUDENTS' HOSTEL.

Warden, E. D. T. Jenkins, M.A.

II. UNIVERSITY COLLEGE OF NORTH

WALES—Bangor (1884).

Principal, Sir Harry R. Reichel, M.A., LL.D.

Secretary and Registrar, W. P. Wheldon, D.S.O., M.A., LL.B.

HALLS OF RESIDENCE.

Men—Warden, Prof. R. L. Archer, M.A.

Women—Warden, Miss M. O. Davis.

III. UNIVERSITY COLL. OF SOUTH WALES AND MONMOUTHSHIRE—Cardiff (1883).

Principal, A. H. Trow, D.Sc.

Registrar, D. J. A. Prown.

ABERDARE HALL.

Principal, Miss Kate Hurlbatt.

IV. UNIVERSITY COLLEGE OF SWANSEA.

Principal, T. Franklin Sibly, D.Sc.

Registrar, Edwin Drew.

HALL OF RESIDENCE.

Women—Warden, Miss E. Martin.

LAMPETER.

ST. DAVID'S COLLEGE (1827).

Principal, Rev. Maurice Jones, D.D.

[Lampeter possesses by Charter the privilege of conferring degrees B.A. and B.D., and is affiliated to Oxford and Cambridge.]

Scotland.

UNIVERSITY OF ST. ANDREWS. 1411.

(£42,500.)

Chancellor, Field-Marshal Earl Haig, K.T., G.C.B., O.M., G.C.V.O., K.C.I.M., D.C.L.

Vice-Chancellor, Principal Sir James C. Irvine.

Rector, Dr. Fridtjof Nansen (1925).

 (Marine Society.)

SCHOOL OF ORIENTAL STUDIES.

London Institution, Finsbury Circus, E.C. 4.
 Chairman of Governing Body, Sir Harry L.
 Stephen.
 Director, Prof. Sir E. Denison Ross, C.I.E., Ph.D.
 Secretary, Miss C. L. Clegg.

PHYSICAL TRAINING.

Training Colleges for Women Teachers.

BEDFORD (P. T. Coll., Lansdowne Rd.).—*Princ.*,
 Miss Stansfeld.
 CHELSEA (Polytechnic, Manresa Road, S.W. 3).
 —*Principal*,
 DARTFORD HEATH, KENT.—*Principal*,

LIVERPOOL (P. T. Coll., Bedford St.).—*Principal*,
 Miss Irene M. Marsh.

TECHNICAL EDUCATION.

See also "Commercial Education."

In addition to the Institutions enumerated
 below there are Faculties of Engineering at the
 Universities of Birmingham, Bristol, Cambridge,
 Durham, Leeds, Liverpool, London, Manchester,
 and Sheffield; Wales; St. Andrews, Glasgow,
 and Edinburgh; Dublin, National University of
 Ireland, and the Queen's University of Belfast.

I.—UNDER LONDON COUNTY COUNCIL.

The principal technical institutes maintained
 or aided by the L.C.C. are the following:—

Institutes entirely maintained by the L.C.C.
 BEAUFY INFANTRY, Prince's Road, Vauxhall
 Street, S.E. 11.—*Princ.* A. Ritchie-Scott, D.Sc.,
 F.R.S.E.

CAMBERWELL SCHOOL OF ARTS AND CRAFTS,
 Peckham Rd., S.E. 5.—*Princ.*, S. Thorogood,
 A.R.C.A.

CENTRAL SCHOOL OF ARTS AND CRAFTS, South-
 ampton Row, W.C.—*Principal*, Fred V. Bur-
 ridge, R.E.

CLAPHAM SCHOOL OF ART, Edgely Road, High
 St., Clapham, S.W. 4.—*Principal*, G. R. Wool-
 way, A.R.C.A.

HACKNEY INFANTRY.—*Principal*, Percy R. Kirk,
 M.A., A.M.I.C.E.

(a) *Hackney Institute*, Dalston Lane, E. 8.

(b) *Hackney Institute*, Sir John Cass
 Branch, Cassland Road, E. 9.

HAMMERSMITH SCHOOL OF ARTS AND CRAFTS,
 Lime Grove, Shepherd's Bush, W. 12.—*Princ.*
 J. Williams.

LONDON SCHOOL OF PRINTING AND KINDRED
 TRADES, 61 Stamford Street, S.E. 1.—*Principal*,
 J. R. Riddell.

NORWOOD TECHNICAL INSTITUTE, Knight's Hill,
 West Norwood, S.E.—*Principal*, Capt. L. M.
 Coombs, B.Sc.

PADDINGTON TECHNICAL INSTITUTE, Saltram
 Crescent, W.—*Principal*, A. G. Cooke, M.A.

PUTNEY SCHOOL OF ART, Oxford Road, Putney.—
Principal, J. Bowyer.

SCHOOL OF BUILDING, Ferndale Road, Brixton,
 S.W. 4.—*Principal*, A. R. Sage, M.B.E.

SCHOOL OF ENGINEERING AND NAVIGATION,
 High Street, Poplar, E.—*Principal*, H. A.
 Garratt, A.M.I.C.E.

SCHOOL OF PHOTO-ENGRAVING AND LITHO-
 GRAPHY, 6 Bolt Court, Fleet Street, E.C. 4.—
Principal, A. J. Bull, M.Sc.

SHOREDITCH TECHNICAL INSTITUTE, Pitfield
 Street, Hoxton, N.—*Principal*, Shadrach Hicks.

TRADE SCHOOL FOR GIRLS AND WOMEN, Barrett
 Street, Oxford Street, W. 1.—*Headmistress*,
 Miss E. E. Cox, B.A.

TRADE SCHOOL FOR GIRLS, Queen Square,
 Bloomsbury, W.C. 1.—*Headmistress*, Miss A.
 Crawley, B.Sc.

WESTMINSTER TECHNICAL INSTITUTE, Vincent
 Square, S.W., with which is incorporated the
 WESTMINSTER SCHOOL OF ART.—*Principal*,
 J. Stuart Ker, B.Sc.; *Head* (School of Art),
 Walter Bayes, A.R.W.S.

Polytechnics aided by the L.C.C.

BATTERSEA POLYTECHNIC, Battersea Park Road, S.W. 1.—*Principal*, Robt. H. Pickard, D.Sc., F.R.S.
BOROUGH POLYTECHNIC, Borough Road, S.E. 1.—*Principal*, J. W. Bispham, O.B.E., B.Sc.

CHELSEA POLYTECHNIC, Manresa Road, Chelsea, S.W. 3.—*Principal*, S. Skinner, M.A.

CITY OF LONDON COLLEGE, White Street, Moorfields, E.C. 2.—*Director*, J. W. Ramsbottom, M.A.

NORTHAMPTON POLYTECHNIC, 280 St. John Street, E.C. 1.—*Principal*, S. C. Laws, M.Sc.

NORTHERN POLYTECHNIC INSTITUTE, Holloway Road, N. 7.—*Principal*, R. S. Clay, D.Sc.

REGENT STREET POLYTECHNIC, 309 Regent Street, W. 1.—*Director of Education*, T. Worswick, O.B.E., M.Sc.

SIR JOHN CASS TECHNICAL INSTITUTE, Aldgate.—*Principal*, C. A. Keane, D.Sc.

WOOLWICH POLYTECHNIC, William Street, Woolwich, S.E. 18.—*Principal*, A. F. Hogg, M.A.

Technical Institutes, &c., aided by the L.C.C.

ALBANY INSTITUTE DOMESTIC ECONOMY SCHOOL FOR GIRLS, Creek Road, Deptford, S.E. 8.—*Head Mistress*, Miss M. E. Stuart.

BERMONDSEY SETTLEMENT, Farincombe Street, Jamaica Road, S.E. 15.—*Warden*, Rev. J. Scott Lidgett, D.D.

CAMPDEN TECHNICAL INSTITUTE, Lancaster Road, W. 11.—*Supt.*, Miss G. L. Abbott.

COLLEGE FOR WORKING WOMEN, 7 Fitzroy Street, W. 1.—*Lady Supt.*, Miss K. Vialls.

CORDWAINERS' TECHNICAL COLLEGE, St. John's Lane, Finsbury, E.C. 1.—*Princ.*, F. Y. Golding.

FINSBURY TECHNICAL COLLEGE, Leonard Street, City Road, E.C. 1.—*Dean*, A. J. Hale, B.Sc.

GOLDSMITHS' COLLEGE, New Cross, S.E. 14.—*Warden*, T. Rayment, M.A.

LEATHERSELLERS' COMPANY'S TECHNICAL COLLEGE, 176 Tower Bridge Road, S.E. 1.—*Principal*, Dr. J. Gordon Parker, F.I.C.

MARY WARD SETTLEMENT, Tavistock Place, W.C. 1.—*Warden*, Miss H. D. Oakley, M.A.

MORLEY COLLEGE, 61 Westminster Bridge Road, S.E. 1.—*Vice-Principal*, Miss C. I. Brennan.

NEWCOMEN'S FOUNDATION TRADE SCHOOL FOR DOMESTIC SERVICE, Newcomen St., Borough, S.E. 1.—*Lady Principal*, Miss R. A. Roberts.

ROYAL SCHOOL OF NEEDLEWORK, Exhibition Road, S.W. 7.—*President*, H.R.H. the Duchess of York; *Principal*, Miss E. Bradshaw.

SAILORS HOME, Dock Street, E. 1 (School of Nautical Cookery).—*Secretary*, Payr.-Comm. A. E. Loder, R.N.R.

SCHOOL OF WOOD-CARVING, 39 Thurloe Place, S.W. 7.—*Secretary*, J. Bailey.

TOYNBEE HALL, 28 Commercial Street, E. 1.—*Warden*, J. J. Mallon, M.A.

WANDSWORTH TECHNICAL INSTITUTE, High Street, Wandsworth, S.W. 18.—*Principal*, D. N. Griffiths, B.Sc., A.M.I.M.E.

Schools of Art aided by the L.C.C.

BLACKHEATH, LEE, LEWISHAM AND GREENWICH, Lee Road, Blackheath, S.E. 3.—*Principal*, J. Howard Hale, R.B.A.

ST. MARTIN'S, 107 Charing Cross Road, W.C. 2.—*Princ.*, J. E. Allen, A.R.C.A.

In addition to the above schools there are Art Schools or Classes attached to all the Polytechnics, except the Northern Polytechnic, and to Goldsmiths' College. Schools of Art are also conducted by the City and Guilds of London Institute at Finsbury Technical College and at the South London Technical Art School, 122-124 Kennington Park Road (see below).

II.—OTHER LONDON INSTITUTIONS.

Imperial College of Science and Technology,

South Kensington, S.W. 7.

Visitor: H.M. THE KING.

Chairman of Governing Body, The Rt. Hon. Lord Buckmaster.

Chairman of Executive Committee, Herbert Wright.

Chairman of Delegacy, Walter T. Pridaux.

An Institution for the most advanced training and research in Science, especially in its application to industry. The Departments and Professors are:—

Royal College of Science.

Aeronautics: L. Bairstow, O.B.E., F.R.S. (Aviation); Sir Gilbert T. Walker, C.S.I. Sc.D., F.R.S. (Meteorology).

Mathematics: S. Chapman, H. Levy (Applied);

Physics: H. L. Callender, C.B.E., F.R.S.,

A. O. Raukin, O.B.E., A. Fowler, F.R.S.

(Astro-Physics); *Technical Optics*, A. O.

Rankine, O.B.E.; A. E. Conrady, *Optical*

design; A. F. C. Pollard, *Mechanical design*;

Chemistry: H. B. Baker, C.B.E., F.R.S., J. F.

Thorpe, C.B.E., F.R.S. (Organic), J. C. Philip,

O.B.E., F.R.S. (Physical); *Chemical Techno-*

logy—Fuel and Refractory Materials; W. A.

Bone, F.R.S.; *Biology*: J. B. Farmer, F.R.S.

(Botany), E. W. McBride, F.R.S. (Zoology),

V. H. Blackman, F.R.S. (Plant Physiology),

P. Groom, F.R.S. (Woods and Fibres Technology),

H. M. Lefroy (Entomology); S. B. Schryvor

(Biochemistry); *Geology*: W. W. Watts,

F.R.S., C. G. Cullis (Economic Mineralogy).

Royal School of Mines.

Mining: S. J. Truscott; *Mine Surveying*, L. H.

Cooke; *Mining Geology*, W. W. Watts, F.R.S.;

Metallurgy: H. C. H. Carpenter, F.R.S.;

Oil Technology: W. W. Watts, F.R.S.

City and Guilds (Engineering) College.

Mechanical Engineering and Motive Power:

W. E. Dalby, F.R.S.; *Civil Engineering*: S. M.

Dixon; *Electrical Engineering*: C. L.

Portescue, O.B.E.

Rector, Sir Thomas H. Holland, K.C.S.I., K.C.I.E.,

D.Sc., F.R.S.

Secretary, A. G. Gow, M.A.

City and Guilds of London Institute.

Gresham College, E.C. 2.

(1.) *City Guilds Engineering College* (see Imperial College of Science and Technology).

(2.) *Finsbury Technical College*, Leonard Street, Finsbury, E.C.

WOODBROOKE SETTLEMENT, Selly Oak, Birmingham (Friends).—*Warden*, Francis L. P. Sturge.

WORKING WOMEN'S COLLEGE.

RESIDENTIAL COLLEGE FOR WORKING WOMEN, The Holt, Rectory Road, Beckenham, Kent.—*Principal*, Miss F. Street, M.A.

THE BOY'S BRIGADE. (Incorporated.)

The senior boys' organisation; founded in 1883 by the late Sir William A. Smith. The object of the Brigade is attained by a combination of discipline and religious training. Every Company is connected with a Church or other Christian body. The total strength is 70,000 officers and boys. *Sec.*, R. S. Peacock, 34 Paternoster Row, E.C. 4.

CHURCH LADS' BRIGADE.

An organisation especially valuable for helping a parish to keep the elder lads to their religious duties; was founded in 1891, and combines a military method with moral and religious instruction. It is estimated that 1,000,000 lads have had the advantage of the Brigade's training, and to-day there are 1,275 Companies throughout the Empire, with upwards of 60,000 lads.—*Headquarters*, Aldwych House, Catherine Street, W.C. 2. *Chaplain-General and Secretary*, Rev. Edgar Rogers, O.B.E., M.A.

BOY SCOUTS. (Incorporated.)

A Movement initiated and organised by Sir Robert Baden-Powell, G.C.V.O., K.C.B., Chief Scout, to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance; inculcating loyalty and thoughtfulness for others; teaching them services useful to the public and handicrafts useful to themselves, and promoting their physical development and hygiene.

The Movement (whose membership approximates 2,000,000) has taken root in all parts of the British Empire, and nearly every other country has adopted it.—*Imperial Headquarters*, 25 Buckingham Palace Road, S.W. 1.

THE GIRL GUIDE ASSOCIATION.

A movement founded by Sir Robert Baden-Powell, Chief Scout, in the year 1910, on the lines of the Boy Scouts and incorporated by Charter in 1915, while in the year 1923 H.M. the King granted the Movement a Royal Charter. Its aim is to develop good citizenship amongst girls by forming their character, training them in habits of observation, obedience, and self-reliance; inculcating loyalty and thoughtfulness for others, and teaching them services useful to the public and handicrafts useful to themselves. It also seeks to promote their physical development, making them capable of keeping good homes and of bringing up good children. Its desire is to co-operate with educational and other bodies working to this end. The membership of the Movement now numbers over 550,000 all over the world, that of the British Isles alone being over 345,000. *Imperial Headquarters*, 25 Buckingham Palace Road, London, S.W. 1.

SCHOLASTIC ASSOCIATIONS.

THE HEAD MASTERS' CONFERENCE (*Secy.*, W. A. Bulkeley-Evans, C.B.E., M.A., 5 Paper Buildings, Temple, E.C. 4).—The object of the Conference is the discussion of educational questions which affect such schools as are in close connection with the Universities of Oxford and Cambridge. In considering what Schools shall be included in the List, or removed from it, the Committee will have regard to the Scheme or other Instrument under which the School is administered, the numbers in the School and, in the case of Schools in Great Britain and Ireland, the number of resident Undergraduates of Oxford and Cambridge educated at the School. The Committee may also take into account the proportion of boys in the School, who, having passed the School Certificate or other equivalent Examination, are continuing their studies beyond that stage. The annual meetings are, as a rule, held in December, alternately (a) at some school represented on the Conference, (b) at London or some University town.

THE INCORPORATED ASSOCIATION OF HEAD MASTERS, 29 Gordon Square, W.C. 1. (*President* (1925), Dr. E. H. Stevens, B.A. *Joint Hon. Secs.*, W. Jenkyn Thomas, M.A.; F. R. Hurlstone Jones, M.A.).—The qualification for membership is the holding of the head mastership of a Public Secondary school for boys in England or Wales administered under a definite form of public or corporate control by a governing body which has powers both to control the school finances and to appoint and dismiss the head master.

THE SCHOOLMASTERS' ASSOCIATION, IRELAND (*Secy.*, J. Thompson, M.A., The High School, Dublin), is similar to the I.A.H.M.

ASSOC. OF ASSISTANT MASTERS IN SECONDARY SCHOOLS, 29 Gordon Sq., W.C. 1. *Sec.*, G. D. Dunkerley, B.Sc.

Secondary Education (Boys).

For List of Schools and Climates, see Advertisement pages.

The * denotes membership of the Head Masters' Conference; the †, of the Incorporated Association of Head Masters; the ‡ denotes Coeducational Schools (for Boys and Girls).

LUNACY.

ON Jan. 1, 1923, the number of notified insane persons under care in England and Wales was 126,279, an increase of 2,565 since Jan. 1, 1922. The relative percentage distribution of the sexes (males 43·8; females 56·2) shows a slight reversion towards the proportions which obtained immediately prior to the Great War (males 46·2; females 53·8). The average weekly cost of maintenance was:—

In County Mental Hospitals 26 s. d.
 In Borough „ 29 6 3/4
 Mental Deficiency.—On Jan. 1, 1923, the mentally defective patients under care numbered 15,786 (males 7,283; females 8,503).

All the Universities in the British Isles (see pp. 265-273) admit women to membership and degrees.
